

FCP_FCT_AD-7.4 Top Dumps & FCP_FCT_AD-7.4 Study Demo

BONUS!!! Download part of Exams-boost FCP_FCT_AD-7.4 dumps for free: <https://drive.google.com/open?id=1BMN-FD1uX61Zg3nzfgXOY44ZsIHily>

We are a comprehensive service platform aiming at help you to pass FCP_FCT_AD-7.4 exams in the shortest time and with the least amount of effort. As the saying goes, an inch of gold is an inch of time. The more efficient the FCP_FCT_AD-7.4 study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your exams with the help our FCP_FCT_AD-7.4 learning torrent just for 20 to 30 hours even by your first attempt.

Fortinet FCP_FCT_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshooting: This section covers analyzing logs and diagnostic information to identify issues with EMS and endpoints, and resolving common deployment, connectivity, and configuration problems.
Topic 2	<ul style="list-style-type: none">• FortiClient EMS design and deployment: This domain covers the architecture, core components, and deployment modes of FortiClient EMS. It also includes installing and configuring the server to ensure proper setup and initial system operation.
Topic 3	<ul style="list-style-type: none">• Zero trust and Security Fabric integration: This domain explains how to integrate EMS with the Fortinet Security Fabric, configure quarantine for compromised endpoints, and implement zero trust network access to control and secure endpoint connectivity.
Topic 4	<ul style="list-style-type: none">• FortiClient provisioning and deployment: This section focuses on deploying FortiClient to endpoint devices, creating and assigning endpoint profiles, and implementing endpoint security features to enforce protection and compliance.

FCP_FCT_AD-7.4 Study Demo & Dumps FCP_FCT_AD-7.4 Reviews

Our Fortinet dumps torrent contains everything you need to pass FCP_FCT_AD-7.4 actual test smoothly. We always adhere to the principle that provides our customers best quality FCP_FCT_AD-7.4 Exam Prep with most comprehensive service. This is the reason why most people prefer to choose our FCP_FCT_AD-7.4 vce dumps as their best preparation materials.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

What establishes device identity and trust in a zero trust network access (ZTNA) deployment?

- A. public key infrastructure (PKI)
- B. device fingerprinting
- C. FortiClient connection key
- D. token-based authentication

Answer: A

Explanation:

In a ZTNA deployment, device identity and trust are established using a public key infrastructure (PKI). Certificates issued by PKI validate the endpoint's identity and enable secure, trusted communication with the ZTNA server.

NEW QUESTION # 42

Which two statements about ZTNA destinations are true? (Choose two.)

- A. FortiClient ZTNA destinations use an existing VPN tunnel to create a secure connection.
- B. FortiClient ZTNA destination encryption is disabled by default.
- C. FortiClient ZTNA destinations do not support a wildcard FQDN.
- D. FortiClient ZTNA destination authentication is enabled by default.
- E. FortiClient ZTNA destinations provides access through TCP forwarding.

Answer: B,C

NEW QUESTION # 43

Refer to the exhibit. Based on the CLI output from FortiGate, which statement is true?

```
config user
  edit "Server"
    set type fortiems
    set server "10.0.1.200"
    set password ENC ebT9fHIMXN...wCSnGiP+Tpi/EjEdQu4hAa24LiKxHo1WI7JyX...
    set ssl enable
  next
end
```

- A. FortiGate is configured to pull user groups from FortiClient EMS
- B. FortiGate is configured to pull user groups from FortiAuthenticator
- C. FortiGate is configured with local user group
- D. FortiGate is configured to pull user groups from AD Server.

Answer: A

Explanation:

Based on the CLI output from FortiGate:

The configuration shows the use of "type fortiems," indicating that FortiGate is set up to interact with FortiClient EMS.

The "server" field points to an IP address (10.0.1.200), which is typically the address of the FortiClient EMS server.

The configuration includes an SSL-enabled connection, which is a common setup for secure communication between FortiGate and

FortiClient EMS.

Thus, the configuration indicates that FortiGate is set up to pull user groups from FortiClient EMS.

NEW QUESTION # 44

Which two are benefits of using multi-tenancy mode on FortiClient EMS? (Choose two.)

- A. It provides granular access and segmentation.
- B. Separate host servers manage each site.
- C. The fabric connector must use an IP address to connect to FortiClient EMS.
- D. Licenses are shared among sites

Answer: A,D

Explanation:

Understanding Multi-Tenancy Mode:

Multi-tenancy mode allows multiple independent sites or tenants to be managed from a single FortiClient EMS instance.

Evaluating Benefits:

Licenses can be shared among sites, making it cost-effective (B).

It provides granular access and segmentation, allowing for detailed control and separation between tenants (D).

Eliminating Incorrect Options:

Separate host servers managing each site (A) is not a feature of multi-tenancy mode.

The fabric connector's use of an IP address (C) is unrelated to multi-tenancy benefits.

NEW QUESTION # 45

Refer to the exhibits. Based on the FortiGate Security Fabric settings shown in the exhibits, what must an administrator do on the EMS server to successfully quarantine an endpoint. When it is detected as a compromised host (loC)?

FortiGate Telemetry

Security Fabric role **Serve as Fabric Root** Join Existing Fabric

Fabric name

Topology FGVM010000052731 (Fabric Root)

Allow other FortiGates to join

Pre-authorized FortiGates None

SAML Single Sign-On

Management IP/FQDN **Use WAN IP** Specify

Management Port **Use Admin Port** Specify

FortiAnalyzer Logging

IP address

Logging to ADOM

Storage usage 144.55 MiB / 50.00 GiB

Analytics usage 91.02 MiB / 35.00 GiB
(Number of days stored: 55/60)

Archive usage 53.53 MiB / 15.00 GiB
(Number of days stored: 54/365)

Upload option Real Time Every Minute Every 5 Minutes

SSL encrypt log transmission

Allow access to FortiGate REST API

Verify FortiAnalyzer certificate FAZ-VMTM19008187

FortiClient Endpoint Management System (EMS)

Name

IP/Domain Name

Serial Number

Admin User

Password

Hostname

Listen on IP

FQDN is required when listening to all ports

Use FQDN

FQDN

Remote HTTPS access Only enforced when Windows Firewall is running.

SSL certificate No certificate imported

- A. The administrator must enable remote HTTPS access to EMS.
- B. The administrator must enable FQDN on EMS.
- C. The administrator must enable SSH access to EMS.
- D. The administrator must authorize FortiGate on FortiAnalyzer.

Answer: A

Explanation:

Based on the FortiGate Security Fabric settings shown in the exhibits, to successfully quarantine an endpoint when it is detected as a compromised host (IOC), the following step is required:

Enable Remote HTTPS Access to EMS: This setting allows FortiGate to communicate securely with FortiClient EMS over HTTPS. Remote HTTPS access is essential for the quarantine functionality to operate correctly, enabling the EMS server to receive and act upon the quarantine commands from FortiGate.

Therefore, the administrator must enable remote HTTPS access to EMS to allow the quarantine process to function properly.

NEW QUESTION # 46

.....

With the simulation function, our FCP_FCT_AD-7.4 training guide is easier to understand and have more vivid explanations to help you learn more knowledge. You can set time to test your study efficiency, so that you can accomplish your test within the given time when you are in the Real FCP_FCT_AD-7.4 Exam. Besides, you can get the real feeling of taking part in the real exam for our FCP_FCT_AD-7.4 exam questions have the function of simulating the real exam. So that you can have a better performance when you attend the real exam.
