## 100% Pass Quiz 2026 Newest Oracle 1z0-1054-25 Passing Score

Our company is your ally in achieving your targeted certification, providing you easy and interactive 1z0-1054-25 exam braindumps. You can totally count on us as we are good at help you get the success on your coming exam. We will always stand by your on your way for the certification as we work as 24/7 online. If you have any question, you can find help from us on the 1z0-1054-25 Study Guide. And our 1z0-1054-25 learning questions are well-written to be understood by the customers all over the world.

## Oracle 1z0-1054-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Configuring Financial Reports: This portion of the exam measures the abilities of Financial Reporting Analysts and includes creating and managing a range of reports using tools like the Financial Reporting Center, Web Studio, OTBI, Smart View, and Dashboards. Candidates must know how to define account groups, set up infolets, and build custom analytics tailored to user needs.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Performing Period Close: Designed for Oracle Financial Application Managers, this section evaluates expertise in executing and managing the period close lifecycle. Topics include reconciliations, revaluation, translation, and consolidation. Candidates are required to configure the Period Close Monitor and associated setups like revaluation, allocations, and chart mappings for financial consolidation.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Implementing Enterprise and Financial Reporting Structures: This section of the exam measures skills of Oracle ERP Implementation Consultants and covers the core components used in setting up enterprise structures and reporting configurations. It assesses knowledge in defining legal entities, jurisdictions, and geographies, as well as the design and configuration of Chart of Accounts. Candidates must also demonstrate how to set up and secure chart structures and manage reporting calendars and currencies.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Using AI</li> <li>ML</li> <li>Mobile and Other Automation Features: This final section assesses Finance Transformation Architects and focuses on the business value derived from incorporating AI, machine learning, and mobile capabilities in Oracle Financials. Candidates are expected to understand automation use cases and the practical benefits these modern features offer in streamlining financial operations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Implementing and Managing Journals: This section targets Oracle General Ledger Consultants and covers the full cycle of journal processing—from creation through approval to management. It includes configuration of journal-related objects and understanding how journals are sourced, tracked, and approved using predefined rules and workflows.</li> </ul>

## Oracle Financials Cloud: General Ledger 2025 Implementation Professional Sample Questions (Q22-Q27):

### NEW QUESTION # 22

Which two statements are true about balances cubes in General Ledger?

- A. New dimensions can be added to a General Ledger balances cube.
- B. They are updated automatically when the General Ledger period is opened.
- C. A new balances cube is created for a unique combination of ledger and currency.
- D. They are updated automatically when the Revaluation process is run.
- E. They are updated automatically when the Translation process is run.

**Answer: A,C**

Explanation:

Balances cubes are multidimensional databases that store financial balances for interactive reporting and analysis. A balances cube is created for each unique combination of ledger and currency, and it contains dimensions such as chart of accounts segments, periods, scenarios, and other user-defined attributes. New dimensions can be added to a balances cube by using the Manage Balances Cube Dimensions task in General Ledger. Balances cubes are updated automatically when journals are posted in General Ledger, and they can also be refreshed manually by using the Refresh Balances Cube task. Balances cubes are not affected by the Translation or Revaluation processes, as these processes only update the balances tables in General Ledger. References:

### NEW QUESTION # 23

When will Intercompany processing balance a journal using the accounts identified here for the UK Ledger?

Ledger	Journal Source	Journal Category	Receivables Account	Payables Account	Start Date	End Date	Summarization	Condition
UK Primary Ledger	Other	Other	303.30.1811.000.000.000	303.30.2371.000.000.000	11/14/10	11/14/10	Summary net	Use clearing company for all many-to-many journals
UK Secondary Ledger	Other	Other	303.30.1810.000.000.000	303.30.2910.000.000.000	11/14/13	11/14/13	Summary net	Use clearing company for all many-to-many journals
UK Primary Ledger	Other	Other	303.30.1811.000.000.000	303.30.2371.000.000.000	11/15/10	mid/yy	Summary net	Error out if many-to-many journal
UK Secondary Ledger	Other	Other	303.30.1810.000.000.000	303.30.2910.000.000.000	11/15/13	mid/yy	Summary net	Error out if many-to-many journal

- A. when there is a many-to-many journal and you want to use a clearing company
- **B. when the journal is balanced by the primary BSV but not by second or third BSV**
- C. when the journal is not balanced by the primary balancing segment value (BSV)
- D. when the journal is balanced by second balancing segment value

**Answer: B**

Explanation:

Intercompany processing will balance a journal using the accounts identified here for the UK Ledger when the journal is balanced by the primary balancing segment value (BSV) but not by second or third BSV. A BSV is a segment in the chart of accounts that identifies a legal entity or business unit for which financial statements are prepared and balanced. A primary BSV is required for every ledger and is used to balance journal entries within a ledger. A secondary or tertiary BSV is optional and is used to balance journal entries across different dimensions other than the primary BSV, such as fund or region. Intercompany processing is a feature that enables intercompany transactions between different legal entities or business units within the same enterprise. Intercompany processing uses intercompany balancing rules to generate intercompany receivables and payables accounts for cross-ledger or cross-BSV journals. Intercompany processing will balance a journal using the accounts identified here for the UK Ledger when the journal is balanced by the primary BSV but not by second or third BSV, as this indicates that there is an intercompany transaction between different legal entities or business units within the UK Ledger that requires intercompany balancing.

Intercompany processing will not balance a journal using the accounts identified here for the UK Ledger when there is a many-to-many journal and you want to use a clearing company, as this is a scenario that involves multiple legal entities or business units across different ledgers that requires a separate clearing company ledger to perform intercompany balancing. Intercompany processing will not balance a journal using the accounts identified here for the UK Ledger when the journal is not balanced by the primary BSV, as this is an invalid scenario that violates the accounting rules and prevents posting of the journal. Intercompany processing will not balance a journal using the accounts identified here for the UK Ledger when the journal is balanced by second balancing segment value, as this is an incomplete scenario that does not specify whether the journal is also balanced by primary and third BSV.

2022 Implementation Professional Objectives - Configure and Process Intercompany 12

**NEW QUESTION # 24**

The intercompany accountants on the cloud project are trying to reconcile intercompany balances using the latest intercompany reconciliation report.

However, they have some concerns about the information presented in the report and want you to clarify the content in the standard reconciliation report.

What is included in the intercompany reconciliation report?

- **A. It displays the intercompany receivables and intercompany payables lines generated for the provider and receiver of each intercompany transaction.**
- B. It displays ledger balancing lines generated when the primary balancing segment (BSV) is in balance but not the second or third BSVs.
- C. It displays all clearing company balances for the period.

**Answer: A**

**NEW QUESTION # 25**

When creating your financial statements, you want a chart such as a bar graph to be included in the report output. Which two reporting tools allow you to achieve this?

- **A. Financial Reporting Studio**
- B. Financial Statement Generator
- C. Account Inspector
- **D. Smart View**

**Answer: A,D**

Explanation:

Smart View and Financial Reporting Studio are two reporting tools that allow you to create and include charts such as bar graphs in your financial statements. Smart View is a multidimensional pivot analysis tool that enables you to interactively analyze your balances and define reports using a familiar spreadsheet environment. You can also insert charts and graphs to visualize your data. Financial Reporting Studio is a tool that lets you design and format financial reports using data from the Oracle General Ledger balances cube.

You can also add charts and graphs to enhance your reports and display data trends. References:

## NEW QUESTION # 26

When constructing a new chart of accounts instances, it has been decided to control the list of values within certain segments, with the use of related value sets.

When defining new related value sets, which three configuration steps should be considered?

- **A. Use independent validation type value sets only**
- B. Order of the segments does not determine filtering sequence.
- C. Use table validated type value sets only
- **D. Link two value sets together**
- E. Link multiple value sets together
- **F. Order of the segments determines filtering sequence**

**Answer: A,D,F**

## NEW QUESTION # 27

.....

The goal of 1z0-1054-25 preparation material is to help applicants prepare for the Oracle Financials Cloud: General Ledger 2025 Implementation Professional certification exam by providing them with the Actual 1z0-1054-25 Exam Questions they need to pass the exam. This Oracle Financials Cloud: General Ledger 2025 Implementation Professional (1z0-1054-25) study material is in the form of practice tests and 1z0-1054-25 PDF that thoroughly covers the content of the test.
