## Oracle 1Z0-1075-25 Oracle Manufacturing Cloud 2025 Implementation Professional QUESTION & ANSWERS

Visit Now: <https://www.dumps-certify.com>

Sie können im Internet kostenlos die Lerntipps und einen Teil der Prüfungsfragen und Antworten zur Oracle 1z0-1075-25 Zertifizierungsprüfung von Zertprüfung als Probe herunterladen.

Die Schulungsunterlagen für die Vorbereitung der Oracle 1z0-1075-25 Zertifizierungsprüfung beinhalten die Simulationsprüfungen sowie die jetzigen Prüfungsfragen und Antworten zur Oracle 1z0-1075-25 Zertifizierungsprüfung. Im Internet haben Sie vielleicht auch einige ähnliche Ausbildungswebsites gesehen. Nach dem Vergleich würden Sie aber finden, dass die Schulungsunterlagen zur Oracle 1z0-1075-25 Zertifizierungsprüfung von Zertprüfung eher zielgerichtet sind. Sie sind nicht nur von guter Qualität, sondern auch die umfassendste.

>> 1z0-1075-25 Fragen Antworten <<

### 1z0-1075-25 Übungsmaterialien, 1z0-1075-25 Testking

Wünschen Sie jetzt die früheren Prüfungsfragen und Nachschlagebücher von Oracle 1z0-1075-25 Zertifizierungsprüfungen? Sie haben nicht genug Zeit, die Oracle 1z0-1075-25 Zertifizierungsprüfung vorzubereiten, wenn Sie sich mit der Arbeit beschäftigt sind. Deshalb ist es sehr wichtig für Sie, hocheffektive Prüfungsunterlagen auszuwählen. Deshalb ist es sehr wichtig, ein richtiges Lerngerät zu wählen. Wählen Sie bitte Oracle 1z0-1075-25 Dumps von Zertprüfung.

### Oracle Manufacturing Cloud 2025 Implementation Professional 1z0-1075-25

## Prüfungsfragen mit Lösungen (Q29-Q34):

### 29. Frage

Production operations need operators to execute the right steps to produce quality products, so want to use " View Document Items on a Dispatch List. " Which statement is NOT true?

- A. You will always see the active revision of the attachment from currently effective revision of the document from Master Organization.
- B. You can view the document item attachment in the dispatch list and on the Manage Supplier Operations page by using the attachment icon.
- C. You can add attachments to the document item and invoke the engineering change order to release the latest revision of the document item and attachment.
- D. You cannot view the document item attachment on the Manage Supplier Operations page.

**Antwort: A**

Begründung:

When using the " View Document Items on a Dispatch List " functionality, production operators can view and access necessary document attachments to ensure correct steps in the manufacturing process. The statement that is not true is:

\* Statement B is incorrect because you do not always see the active revision of the attachment from the currently effective revision in the Master Organization. The revision displayed in the dispatch list may depend on the specific version that was assigned to the work order or operation at the time of creation, not necessarily the most current revision in the Master Organization.

Correct statements:

\* Statement A : Document attachments cannot be viewed on the Manage Supplier Operations page.

\* Statement C : Attachments can be added to document items, and updates can be managed through engineering change orders.

\* Statement D : Document item attachments are viewable both in the dispatch list and on the Manage Supplier Operations page via the attachment icon.

Oracle Manufacturing Cloud's " Dispatch List " functionality documentation outlines how document item attachments are handled and displayed.

### 30. Frage

Your customer has multiple distribution centers and a few manufacturing plants. The plants manufacture different items with some overlap between them. The distribution centers stock parts from all plants.

A Corporate Engineering team is responsible for centrally defining items and catalogs. This team defines the items and sets the attributes for most parameters. The respective distribution centers and manufacturing plants must be allowed to change some attributes locally.

What is the best way to achieve this?

- A. Set up plants and the Corporate Engineering organization as item organizations, and distribution centers as inventory organizations.
- B. Set up plants, distribution centers, and the Corporate Engineering organization as inventory organizations.
- C. Set up plants and distribution centers as inventory organizations, and the Corporate Engineering organization as an Item organization.
- D. Set up plants and the Corporate Engineering organization as Inventory organizations, and distribution centers as item organizations.
- E. Set up plants as inventory organizations, and distribution centers and the corporate Engineering organization as item organizations.

**Antwort: C**

Begründung:

In Oracle Cloud, managing items and their attributes across multiple organizations requires careful structuring of inventory and item organizations. The best way to configure this setup given the customer ' s requirements is as follows:

\* Plants and Distribution Centers as Inventory Organizations : Inventory organizations are required to manage on-hand quantities, perform transactions, and handle the physical movement of materials.

Plants need to be inventory organizations to manage production, and distribution centers need to be inventory organizations to manage stocking and distribution.

\* Corporate Engineering Organization as an Item Organization : An item organization is responsible for centrally defining item attributes. By setting the Corporate Engineering team as an item organization, you ensure that item definitions are controlled centrally. The team can define standard attributes while allowing inventory organizations (plants and distribution centers) to modify certain

attributes at their level based on local needs.

This structure allows for centralized item management with localized flexibility for plants and distribution centers.

Oracle SCM Cloud guides for "Item and Inventory Organizations" explain how item organizations allow centralized management of item definitions while inventory organizations handle the physical inventory and can override certain attributes locally.

Incorrect Options:

A : Defining all entities as inventory organizations would not allow centralized control of item attributes.

C , D , E : These setups would either limit the ability to control item attributes centrally or misassign organizations that need to handle physical inventory as item-only organizations.

### 31. Frage

Which three statements are true about the main areas of Managerial Accounting?

- A. Receipt Accounting Is the application that performs accrual accounting for all types of receipts.
- B. Landed Cost Management gives organizations financial visibility into their extended supply chain costs.
- C. Supply Chain Orchestration automatically selects the correct process based on user-defined Subledger Accounting rules when a supply creation is initiated.
- D. Cost method can be defined with granularity down to individual items.

Antwort: A,B,D

Begründung:

In Oracle Manufacturing Cloud and related financial applications, managerial accounting plays a significant role in tracking and managing costs across supply chain and manufacturing activities. The following is a breakdown of the correct statements:

\* Statement A : Receipt Accounting is the application that performs accrual accounting for all types of receipts - Receipt Accounting is a crucial module in Oracle Cloud that supports the tracking of costs and performs accruals related to receipts. This includes processes such as procurement receipts, interorganization transfers, and supplier shipments. This allows organizations to recognize and account for the expenses associated with these receipts.

Oracle Cloud SCM Documentation for Receipt Accounting outlines how the system manages accruals and matches them with purchase orders and invoices.

Statement B : Landed Cost Management gives organizations financial visibility into their extended supply chain costs - Landed Cost Management is designed to capture additional costs that arise during the transportation, handling, and processing of goods. This includes costs like shipping, insurance, and customs duties. By including these in the overall cost, it provides a more comprehensive view of the actual costs of goods in the supply chain.

Reference : Oracle Fusion SCM Guide, "Landed Cost Management," describes how it aggregates various indirect supply chain costs to give better financial visibility.

Statement D : Cost method can be defined with granularity down to individual items - In Oracle Manufacturing Cloud, costing methods can be assigned not only at the organization level but also at a granular level down to individual items. This provides flexibility in defining different costing strategies for different products depending on their nature, manufacturing process, or market conditions.

Reference : Oracle Manufacturing Cloud User Guide explains the flexibility in configuring cost methods at different organizational and item-specific levels.

Incorrect Statements:

Statement C : Supply Chain Orchestration automatically selects the correct process based on user-defined Subledger Accounting rules when a supply creation is initiated - While Supply Chain Orchestration automates various supply chain processes, it does not select processes based on Subledger Accounting rules.

The orchestration system is more focused on managing and coordinating supply chain processes rather than determining accounting rules.

### 32. Frage

Which statement is NOT true about using a Quick Complete action for an operation transaction?

- A. You can use it for simultaneous reporting of one or more transactions.
- B. You can use it to collect Inspection results.
- C. It is used on serial tracked operations and non-serial tracked operations with or without inspections.
- D. You can use it to transact one or more serial numbers.
- E. You can use it to transact only one serial number at a time.

Antwort: E

Begründung:

The Quick Complete action allows for fast, simplified transaction processing for work orders and operations.

The statement that is not true is:

\* Statement E is incorrect because Quick Complete can be used to transact multiple serial numbers at a time, not just one. This feature is designed to handle both serial-tracked and non-serial-tracked operations efficiently.

Correct statements:

\* Statement A : Quick Complete supports simultaneous reporting of multiple transactions, allowing for streamlined processing.

\* Statement B : It can be used for both serial-tracked and non-serial-tracked operations, whether or not inspections are involved.

\* Statement C : Multiple serial numbers can be transacted at once using this feature.

\* Statement D : While Quick Complete can handle inspection-related transactions, it is not specifically for collecting inspection results.

Oracle Cloud documentation on Quick Complete explains how this feature works for processing multiple transactions and handling serial-numbered items.

### 33. Frage

Your customer runs production 24 x 7 x 365 and wants to track Overall Equipment Effectiveness (OEE) online.

Which key setup can they use to achieve this?

- A. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production
- B. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " In Plant Parameters.
- C. Enable IoT Fleet Monitoring and enable synchronization to IoT Production Monitoring in Plant Parameters.
- **D. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production Monitoring " In Inventory Organization.**
- E. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " in Resources.

**Antwort: D**

### 34. Frage

.....

Es gibt zwei Dumps-Versionen bei Zertprüfung, nämlich PDF-Version und Software-Version. Damit können Sie selbst wählen. Sie können irgendwann und irgendwo lernen, indem sie die exam Fragen und Testantworten von PDF-Version drucken. Die Software-Version simuliert die aktuelle Prüfung, damit können Sie sich die 1z0-1075-25 Prüfungsatmosphäre fühlen. Wenn sie die Oracle 1z0-1075-25Zertifizierungsprüfung ablegen, können Sie die Prüfung leichter nehmen.
