## &gt;&gt; Exam MD-102 Cram Questions &lt;&lt;

**MD-102 Trustworthy Source - Reliable MD-102 Test Duration**

Our company deeply knows that product quality is very important, so we have been focusing on ensuring the development of a high quality of our MD-102 test torrent. All customers who have purchased our products have left deep impression on our MD-102 guide torrent. Of course, the customer not only has left deep impression on the high quality of our products but also the efficiency of our products. Our MD-102 Exam Questions can help you save much time, if you use our products, you just need to spend 20-30 hours on learning, and you will pass your exam successfully. What most important is that you can download our study materials about 5~10 minutes after you purchase.

**Microsoft Endpoint Administrator Sample Questions (Q121-Q126):****NEW QUESTION # 121**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1.

You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to C:\Folder1, and then you run the RegSvr32.exe

Package1.ppkcommand.

Does this meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

**NEW QUESTION # 122**

Your company implements Azure AD, Microsoft 365, Microsoft Intune, and Azure Information Protection.

The company's security policy states the following:

- \* Personal devices do not need to be enrolled in Intune.
- \* Users must authenticate by using a PIN before they can access corporate email data.
- \* Users can use their personal iOS and Android devices to access corporate cloud services.
- \* Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy.

What should you create?

- A. a data loss prevention (DIP) policy from the Microsoft Purview compliance portal
- B. an insider risk management policy from the Microsoft Purview compliance portal
- C. an app protection policy from the Microsoft Intune admin center
- D. a device configuration profile from the Microsoft Intune admin center

**Answer: A**

### NEW QUESTION # 123

You have a Microsoft 365 subscription.

You need to deploy Microsoft 365 Apps for enterprise applications to Windows 10 devices.

What should you do first?

- A. From the Endpoint Manager admin center, create an app configuration policy.
- B. From the Endpoint Manager admin center, enable Microsoft Store for Business synchronization.
- C. From Microsoft Azure Active Directory (Azure AD), create an app registration.
- **D. From the Endpoint Manager admin center, create an app.**

**Answer: D**

Explanation:

Before you can assign, monitor, configure, or protect apps, you must add them to Intune. One of the available app types is Microsoft 365 apps for Windows 10 devices. By selecting this app type in Intune, you can assign and install Microsoft 365 apps to devices you manage that run Windows 10.

Note: Review + create -

1. Review the values and settings you entered for the app suite.
2. When you are done, click Create to add the app to Intune.
3. The Overview blade is displayed.

### NEW QUESTION # 124

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/app-protection-policy.md>

<https://docs.microsoft.com/en-us/azure/information-protection/configure-usage-rights#do-not-forward-option-for-emails>

Topic 2, Contoso, Ltd.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

Contoso has a Microsoft 365 E5 subscription.

Network Environment

The network contains an on-premises Active domain named Contoso.com. The domain contains the servers shown in the following table.

Contoso has a hybrid Azure Active Directory (Azure AD) tenant named Contoso.com.

Contoso has a Microsoft Store for Business instance.

Users and Groups

The Contoso.com tenant contains the users shown in the following table.

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group and Group have a Membership type of Assign

Devices

Contoso has the Windows 10 devices shown in the following table.

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder 1.

Microsoft Endpoint Manager Configuration

Microsoft Endpoint Manager has the compliance policies shown in the following table.

The Compliance policy settings are shown in the following exhibit.

The Automatic Enrollment settings have the following configurations:

\* MDM user scope: GroupA

\* MAM user scope: GroupB

You have an Endpoint protection configuration profile that has the following Controlled folder access settings:

\* Name: Protection1

\* Folder protection: Enable

\* List of apps that have access to protected folders: CV\AppA.exe

\* List of additional folders that need to be protected: D:\Folder1

\* Assignments

Windows Autopilot Configuration

Currently, there are no devices deployed by using Window Autopilot

The Intune connector for Active Directory is installed on Server 1.

Planned Changes

Contoso plans to implement the following changes:

\* Purchase a new Windows 10 device named Device6 and enroll the device in Intune.

\* New computers will be deployed by using Windows Autopilot and will be hybrid Azure AD joined.

\* Deploy a network boundary configuration profile that will have the following settings:

\* Name: Boundary 1

\* Network boundary: 192.168.1.0/24

\* Scope tags: Tag 1

\* Assignments:

\* Included groups: Group 1, Group2

\* Deploy two VPN configuration profiles named Connection1 and Connection2 that will have the following settings:

\* Name: Connection 1

\* Connection name: VPN1

\* Connection type: L2TP

\* Assignments:

\* Included groups: Group1, Group2, GroupA

\* Excluded groups: -

\* Name: Connection 2

\* Connection name: VPN2

\* Connection type: IKEv2

\* Assignments:

\* Included groups: GroupA

\* Excluded groups: GroupB

\* Purchase an app named App1 that is available in Microsoft Store for Business and to assign the app to all the users.

Technical Requirements

Contoso must meet the following technical requirements:

\* Users in GroupA must be able to deploy new computers.

\* Administrative effort must be minimized.

## NEW QUESTION # 125

Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share.

User1 signs in to Computer1 and performs the following tasks:

- Configures screen saver to start after five minutes of inactivity
- Modifies the default save location for Microsoft Word
- Creates a file named File1.docx on the desktop
- Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2.

What should you identify?

- A. File1.docx only
- B. File1.docx and the desktop background only
- C. File1.docx, the desktop background, and the default save location for Word only
- D. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
