

CMMC-CCA Cheap Dumps - CMMC-CCA Exam Vce

What's more, part of that Prep4sures CMMC-CCA dumps now are free: https://drive.google.com/open?id=1biy4w11H8ZwLXrfevt9dgf-pjQ_AmW6

Prep4sures has one of the most comprehensive and top-notch Cyber AB CMMC-CCA Exam Questions. We eliminated the filler and simplified the Certified CMMC Assessor (CCA) Exam exam preparation process so you can ace the Cyber AB certification exam on your first try. Our Cyber AB CMMC-CCA Questions include real-world examples to help you learn the fundamentals of the subject not only for the Cyber AB exam but also for your future job.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.
Topic 2	<ul style="list-style-type: none">• Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 3	<ul style="list-style-type: none">• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
Topic 4	<ul style="list-style-type: none">• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.

Pass Guaranteed 2026 Cyber AB CMMC-CCA: Certified CMMC Assessor

(CCA) Exam –Reliable Cheap Dumps

The CMMC-CCA examination certification, as other world-renowned certification, will get international recognition and acceptance. People around the world prefer CMMC-CCA exam certification to make their careers more strengthened and successful. In Prep4sure, you can choose the products which are suitable for your learning ability to learn.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q88-Q93):

NEW QUESTION # 88

A company is seeking Level 2 CMMC certification. During the Limited Practice Deficiency Correction Evaluation, the Lead Assessor must decide whether the company can move to a POA&M review. Which condition will result in the Lead Assessor recommending that the OSC's practice deficiencies move to a POA&M review?

- A. A final score below 88
- B. A final score of 80 or better
- C. A final score of 88/110 or better
- D. A final score of 110

Answer: C

Explanation:

For CMMC Level 2, an OSC must score at least 88 out of 110 practices (80%) to qualify for use of POA&Ms. Practices on the DoD's Authorized POA&M List may then be deferred, but only if the OSC meets the 88-point threshold and no high-weight practices are failed.

Exact extracts:

* "Organizations must score at least 88 out of 110 (80%) to be eligible for POA&Ms."

* "POA&Ms may only be applied to a limited subset of practices designated by DoD."

* "Failure to reach the 88-point threshold results in an assessment failure." Why other options are incorrect:

* A: Below 88 is automatic fail.

* B: 110/110 is full compliance (no POA&M needed).

* C: 80 is a distractor; 88 is the actual DoD threshold.

References:

DoD CMMC 2.0 Guidance - POA&M policy.

CMMC Assessment Guide - Level 2.

NEW QUESTION # 89

An assessor reviews the OSC's data protection policy, which requires full disk encryption on company laptops. While interviewing employees, the assessor learns that employees sometimes access data while teleworking on laptops that do not have full disk encryption.

How should the assessor view the implementation of the OSC's policy?

- A. Insufficient because full disk encryption is not required for laptops to comply with CMMC requirements.
- B. Insufficient because there are teleworking instances where the policy is not followed.
- C. Acceptable as long as an equivalent technical safeguard is implemented for all teleworking scenarios.
- D. Acceptable because it requires full disk encryption of company laptops.

Answer: B

Explanation:

The Assessment Guide emphasizes that a policy is insufficient unless it is implemented consistently across all applicable assets.

Evidence from interviews showing exceptions means the practice is NOT MET.

Extract:

"Policies must not only exist but must also be enforced and implemented consistently. Exceptions indicate non-compliance." Thus, the correct answer is B.

NEW QUESTION # 90

You are a CCA collaborating with an OSC to provide specialized consulting services. The OSC representative has inquired about strategies to validate the accuracy of their project scope. In response, you suggest leveraging a data flow diagram. This visual representation could assist in mapping the flow of information and processes within the project, enabling a comprehensive review and verification of the scope's alignment with the client's requirements. If you were on the Assessment Team, how would you use the data flow diagram after it is created?

- A. Compare the data flow diagram with the organization's documented policies and procedures to identify any deviations or noncompliance
- B. Use the data flow diagram as a baseline for a new system architecture, as it provides a comprehensive view of the existing data flows
- **C. Ensure the systems and assets included in the data flow diagram are also included in the network diagram for the assessment's scope and in the asset inventory**
- D. Use the data flow diagram to identify potential vulnerabilities and weaknesses in the information flow, as it is primarily a security analysis tool

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CMMC Assessment Guide Level 2 uses data flow diagrams to define the assessment scope by mapping CUI flows and identifying in-scope systems and assets. After creation, the CCA ensures these align with the network diagram and asset inventory (Option D), per CAP scoping requirements, to confirm completeness.

Option A (vulnerability analysis) is a secondary use, not the primary scoping purpose. Option B (system architecture baseline) exceeds scoping intent. Option C (policy comparison) is tangential to scope validation.

Option D is the correct answer.

Reference Extract:

* CMMC AG Level 2, Section 1.3: "Data flow diagrams ensure all systems and assets handling CUI are reflected in the network diagram and asset inventory." Resources: https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

NEW QUESTION # 91

You are the Lead Assessor for a CMMC Level 2 assessment. During the assessment, the OSC admits that a practice was implemented only a week before the assessment began due to a last-minute effort to prepare. The practice appears to meet the objectives based on the evidence provided. How should you evaluate this evidence?

- A. Document the recent implementation as an evidence gap and assess based on its effectiveness and sustainability.
- B. Request the OSC to provide evidence of longer-term implementation before proceeding.
- **C. Accept the evidence and score the practice as "MET" since it meets the objectives at the time of assessment.**
- D. Score the practice as "NOT MET" because it was not implemented prior to the assessment preparation.

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CAP assesses practices based on their state during the assessment, not prior timing, if objectives are met (Option A). Options B, C, and D impose unnecessary or incorrect criteria.

Extract from Official Document (CAP v1.0):

* Section 2.2 - Conduct Assessment (pg. 25): "Assess practices based on evidence demonstrating compliance at the time of assessment." References:

CMMC Assessment Process (CAP) v1.0, Section 2.2.

NEW QUESTION # 92

You are a CCA who is part of an Assessment Team conducting a CMMC assessment on an aerospace company. While analyzing their network architecture, you realize that it includes a Demilitarized Zone (DMZ) to host their public-facing web servers. What is the primary purpose of a DMZ in a network architecture?

- **A. To logically isolate the organization's public-facing web servers from the internal network**
- B. To allow unrestricted access between the internal network and the internet
- C. To physically isolate the organization's internal network from the internet

- D. To provide physical security for the organization's public-facing web servers

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:

A Demilitarized Zone (DMZ) is a standard network security construct used to enhance the protection of an organization's internal network. Per NIST SP 800-171 and CMMC Level 2 guidelines (e.g., SC.L2-3.13.6), a DMZ logically separates public-facing services, such as web servers, from the internal network containing sensitive data like CUI. This logical isolation is achieved through firewalls, access control lists (ACLs), or routing configurations, not physical separation, reducing the risk of external threats penetrating the internal network.

Option A (physical isolation) misrepresents the DMZ's logical nature. Option B (physical security) pertains to facility controls, not network architecture. Option C (unrestricted access) contradicts the DMZ's purpose of controlled access. Option D correctly identifies the DMZ's role in logical isolation, making it the correct answer.

Reference Extract:

* NIST SP 800-171, 3.13.6: "Deny network communications traffic by default and allow by exception... achieved through logical segmentation like a DMZ."

* CMMC AG Level 2, SC.L2-3.13.6: "A DMZ isolates public-facing services from internal networks logically." Resources: <https://csrc.nist.gov/pubs/sp/800/171/a/final>; https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.0_FINAL_202112016_508.pdf

NEW QUESTION # 93

.....

Society will never welcome lazy people, and luck will never come to those who do not. We must continue to pursue own life value, such as get the test Cyber AB certification, not only to meet what we have now, but also to constantly challenge and try something new and meaningful. For example, our CMMC-CCA prepare questions are the learning product that best meets the needs of all users. There are three version of our CMMC-CCA training prep: PDF, Soft and APP versions. And you can free download the demo of our CMMC-CCA learning guide before your payment. Just rush to buy our CMMC-CCA exam braindump!
