NEW QUESTION # 115
(Select 3) Based on the work of Don Reinertsen, SAFe denotes five primary economic factors that can be used to consider the economic perspective of a particular investment. From the list below, choose three of those primary economic factors.

- A. Return on Investment (ROI)
- B. Lead time
- C. Development expense
- D. Risk
- E. Value stream budget

Answer: A,B,C

Explanation:
SAFe adopts the five primary economic factors from Don Reinertsen's "The Principles of Product Development Flow." These are:
Development expense,
Lead time,
Product cost,
Value,
Risk.
From the options given:
A). Lead time is correct (one of the primary factors).
C). Return on Investment (ROI) is a direct measurement of value, so this aligns with "Value." E). Development expense is correct.
"Value stream budget" is not one of the original economic factors. "Risk" is a primary factor, so if you need only three, the best answers are A, C, and E.
