As you know, the first-class quality always come with the first service. That is exactly what describe our NS0-528 exam materials. No only that our NS0-528 training guide can attract you for its best quality, but also you will be touched by the excellent service. If you have any question about our NS0-528 Learning Engine, our service will give you the most professional suggestion and help. And we work 24/7 online. So you can always find we are accompanying you.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 2	<ul style="list-style-type: none"> Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.
Topic 3	<ul style="list-style-type: none"> NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 4	<ul style="list-style-type: none"> NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
Topic 5	<ul style="list-style-type: none"> Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.

Network Appliance NS0-528 Reliable Test Dumps | Latest NS0-528 Exam Vce

Some people are inclined to read paper materials. Do not worry. Our company has already taken your thoughts into consideration. Our PDF version of the NS0-528 practice materials support printing on papers. All contents of our NS0-528 Exam Questions are arranged reasonably and logically. In addition, the word size of the NS0-528 study guide is suitable for you to read. And you can take it conveniently.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q253-Q258):

NEW QUESTION # 253

You have enabled the SnapMirror global throttling feature to restrict bandwidth that is used by SnapMirror operations over the network for both incoming and outgoing transfers in ONTAP.

In this scenario, which two statements are correct? (Choose two.)

- A. Global throttling is enforced at a node level and works with the per-relationship throttle feature for SnapMirror.
- **B. Global throttling is enforced at a cluster level and works with the per-relationship throttle feature for SnapMirror.**
- C. Global throttling is enforced at a cluster level and does not work with the per-relationship throttle feature for SnapMirror.
- **D. Global throttling is not enforced until the combined bandwidth of per-relationship transfers exceeds the value of global throttle.**

Answer: B,D

NEW QUESTION # 254

You are the administrator of an ONTAP cluster, where the majority of users are using Linux machines with home directories mounted using NFS. You keep six daily, four weekly, and one monthly Snapshot copy locally. However, you do not replicate the data to another instance of ONTAP. One of your users reports having accidentally deleted a file, but does not remember the self-serve restore procedure.

How does the user restore the file without having administrator privileges on the cluster?

- A. Using ONTAP System Manager, restore the volume from a Snapshot copy.
- **B. Copy the deleted file from the .snapshot directory.**
- C. Issue the volume snapshot restore command.
- D. Issue the snapshot restore-file command.

Answer: B

NEW QUESTION # 255

Which NetApp solution safeguards Kubernetes volumes to object storage in public and private cloud providers?

- A. Astra Trident
- **B. BlueXP backup and recovery**
- C. BlueXP observability
- D. BlueXP classification

Answer: B

Explanation:

BlueXP backup and recovery provides protection for Kubernetes volumes by backing them up to object storage across public and private cloud providers. It ensures data durability, long-term retention, and recovery for containerized workloads.

NEW QUESTION # 256

A storage administrator configured a replication relationship between two volumes on separate clusters. Although the baseline

succeeded, the relationship has not been updating. On further investigation, you notice that the administrator did not add an update schedule.

In this situation, what are three ways to solve this problem? (Choose three.)

- A. Use the CLI on the source cluster to modify the SnapMirror schedule.
- B. Execute the ModifySnapMirrorRelationship API method with the dpSchedule field set to ~scheduleName~ on each node ID in the cluster.
- C. Use the CLI on the destination cluster to modify the SnapMirror schedule.
- D. Use OnCommand Unified Manager to modify the volume protection relationship.
- E. Use OnCommand System Manager to modify the volume protection relationship.

Answer: C,D,E

NEW QUESTION # 257

A client is planning to configure a SnapMirror relationship between two sites. Normally their ISP provides network throughput of 100 Mbps; however, they can arrange to have this burst to 1 Gbps for a period of time at an additional cost.

Their intention is to back up 400 GB of Snapshot data each day using the burst option to keep the replication time to a minimum. In this scenario, how much burst time do they need to purchase?

- A. 45 minutes
- B. 15 minutes
- C. 30 minutes
- D. 60 minutes

Answer: A

NEW QUESTION # 258

.....

The Network Appliance NS0-528 certification exam is one of the best certification exams that offer a unique opportunity to advance beginners or experience a professional career. With the Implementation Engineer - Data Protection Exam NS0-528 exam everyone can validate their skills and knowledge easily and quickly. There are other several benefits that you can gain with the Implementation Engineer - Data Protection Exam NS0-528 Certification test. The prominent advantages of the NS0-528 certification exam are more career opportunities, proven skills, chances of instant promotion, more job roles, and becoming a member of the NS0-528 certification community.
