Well-Prepared 1Z0-1163-1 Sample Questions & Professional Reliable 1Z0-1163-1 Study Materials & Excellent Top 1Z0-1163-1 Exam Dumps

P.S. Free & New 1Z0-1163-1 dumps are available on Google Drive shared by PracticeTorrent: https://drive.google.com/open?id=1c6vKgoDlAQvA12R4KKGktrVDhTxpCJkI

The price of Oracle 1Z0-1163-1 updated exam dumps is affordable. You can try the free demo version of any Oracle 1Z0-1163-1 exam dumps format before buying. For your satisfaction, PracticeTorrent gives you a free demo download facility. You can test the features and then place an order.

As we know that if you have an outstanding certification you will have more opportunities for application and promotion, many companies think highly of golden certifications, it will be a step-stone to some great positions. Our website PracticeTorrent is engaging in providing high-pass-rate 1Z0-1163-1 Exam Guide torrent to help candidates clear 1Z0-1163-1 exam easily and obtain certifications as soon as possible. We are engaging in this line more than 8 years on the 1Z0-1163-1 exam questions. Thousands of candidates choose us and achieve their goal every year.

Reliable 1Z0-1163-1 Study Materials - Top 1Z0-1163-1 Exam Dumps

You can land your ideal job and advance your career with the Oracle 1Z0-1163-1 certification. Success in the Oracle 1Z0-1163-1 exam verifies your talent to perform crucial technical tasks. Preparation for this Oracle 1Z0-1163-1 exam is a tricky task. Make

sure you choose the top-notch Oracle 1Z0-1163-1 Study Materials to get ready for this exam. For your smooth 1Z0-1163-1 test preparation, PracticeTorrent provides updated 1Z0-1163-1 practice material with a success guarantee.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Topic 2	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 3	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 4	• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 5	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Topic 6	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 7	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 8	• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q35-Q40):

NEW QUESTION # 35
What is the primary purpose of the Supply Chain Orchestration process in Oracle Fusion Cloud SCM?

- A. It eliminates the need for supplier collaboration.

- B. It provides a manual approach to tracking supply chain transactions.
- C. It only manages warehouse operations without linking to procurement or manufacturing.
- D. It automates the execution of supply chain tasks across different applications.

Answer: D

Explanation:
The Supply Chain Orchestration process (C) in Oracle Fusion Cloud SCM automates the execution of supply chain tasks across applications like procurement, manufacturing, and inventory management. It coordinates activities-e.g., triggering a PO when inventory is low or scheduling production after an order-ensuring seamless integration. Option A is false-supplier collaboration is often required. Option B is incorrect-it links all supply chain areas, not just warehouses. Option D is wrong-automation replaces manual tracking. For example, if a customer order requires 200 units, Orchestration aligns procurement and production automatically, reducing delays and errors, and enhancing end-to-end visibility.

NEW QUESTION # 36
What is the main purpose of the Supply Chain Collaboration feature in Oracle Fusion Cloud SCM?

- A. It automates internal financial reporting without supplier interaction.
- B. It enables real-time communication between suppliers and buyers for improved supply chain visibility.
- C. It eliminates the need for supplier contracts.

Answer: B

Explanation:
The Supply Chain Collaboration feature in Oracle Fusion Cloud SCM facilitates real-time communication between suppliers and buyers through tools like the Supplier Portal, improving visibility into supply chain activities such as order status and inventory levels. Option A is incorrect as it involves supplier interaction, not just internal reporting. Option B is false-contracts remain essential. This collaboration enhances coordination and responsiveness across the supply chain.

NEW QUESTION # 37
Which key metric measures the effectiveness of the Demand Forecast to Supply Plan OMBP?

- A. Demand Fulfillment.
- B. Supplier Service Quality.
- C. Supply Chain Flexibility.
- D. Lead Time Variability.

Answer: A

Explanation:
The Demand Forecast to Supply Plan OMBP in Oracle Fusion Cloud SCM bridges demand forecasting with supply planning, and its effectiveness is best measured by Demand Fulfillment-the percentage of demand met on time and in full. This metric evaluates how well the supply plan, derived from forecasts, satisfies actual customer orders. For example, if a forecast predicts 500 units and the supply plan delivers 480 units on time, the fulfillment rate is 96%. Option A (Lead Time Variability) assesses supplier performance, not the forecast-to-plan process. Option B (Supplier Service Quality) focuses on supplier reliability, a separate concern. Option C (Supply Chain Flexibility) measures adaptability, not direct fulfillment success. Demand Fulfillment ties directly to the OMBP's goal of aligning supply with demand, ensuring customer satisfaction and operational efficiency while minimizing excess inventory or stockouts.

NEW QUESTION # 38
Which two capabilities within the Predict Demand process in the Demand to Management OMBP make it a powerful tool for demand planning and management?

- A. Demand Sensing.
- B. Machine Learning-based Forecasting.
- C. Statistical Forecasting.
- D. Collaborative Forecasting Platform.

Answer: B,D

Explanation:
The Predict Demand process within the Demand to Management OMBP in Oracle Fusion Cloud SCM leverages advanced capabilities to enhance demand planning. Collaborative Forecasting Platform (A) enables stakeholders-such as sales teams, suppliers, and distributors-to collaborate in real time, inputting qualitative insights (e.g., market trends or promotions) that refine forecasts beyond pure data analysis. For example, a retailer might adjust forecasts based on an upcoming sale confirmed via the platform, improving accuracy. Machine Learning-based Forecasting (B) uses algorithms to analyze historical data, detect patterns (e.g., seasonality or anomalies), and adapt predictions dynamically, making it more precise than traditional methods. For instance, it might identify a spike in demand for umbrellas during unexpected rainy seasons. Option C (Statistical Forecasting) is a traditional method relying on statistical models but lacks the adaptive intelligence of machine learning, though it's still used as a foundation. Option D (Demand Sensing) focuses on short-term demand signals (e.g., point-of-sale data) rather than long-term planning, making it complementary but not a core strength of Predict Demand. Together, A and B empower businesses with both human collaboration and cutting-edge AI, ensuring robust demand planning that balances quantitative and qualitative inputs.

NEW QUESTION # 39
Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- A. Supplier Qualification.
- B. Manufacturing Execution.
- C. Inventory Management.
- D. Cost Accounting.

Answer: B

Explanation:
Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A (Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

NEW QUESTION # 40
......

Perhaps you worry about that you have difficulty in understanding our 1Z0-1163-1 training questions. Frankly speaking, we have taken all your worries into account. Firstly, all knowledge of the 1Z0-1163-1 exam materials have been simplified a lot. Also, we have tested many volunteers who are common people. The results show that our 1Z0-1163-1 study braindumps are easy for them to understand. So you don't have to worry that at all and you will pass the exam for sure.
