As long as you free download the demos on our website, then you will love our ANS-C01 praparation braindumps for its high quality and efficiency. All you have learned on our ANS-C01 Study Materials will play an important role in your practice. We really want to help you solve all your troubles about learning the Amazon ANS-C01 exam.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15
A company hosts a web application that runs on a fleet of Amazon EC2 instances behind an Application Load Balancer (ALB). The instances are in an Auto Scaling group. The company uses an Amazon CloudFront distribution with the ALB as an origin.
The application recently experienced an attack. In response, the company associated an AWS WAF web ACL with the CloudFront distribution. The company needs to use Amazon Athena to analyze application attacks that AWS WAF detects.
Which solution will meet this requirement?

- A. Configure the AWS WAF web ACL to deliver logs to an Amazon Kinesis Data Firehose delivery stream. Configure the stream to deliver the data to an Amazon S3 bucket for log analysis.
- B. Configure the ALB and the EC2 instance subnets to produce VPC flow logs. Configure the VPC flow logs to deliver logs to an Amazon S3 bucket for log analysis.

- C. Turn on access logging for the ALB. Configure the access logs to deliver the logs to an Amazon S3 bucket for log analysis.
- D. Create a trail in AWS CloudTrail to capture data events. Configure the trail to deliver logs to an Amazon S3 bucket for log analysis.

Answer: C

NEW QUESTION # 16

You have just deployed a website that utilizes CloudFront, ELB, and S3 to serve content. When users access your site, they are seeing broken image links. You know you configured CloudFront to use cdn.yourdomain.com. What is the most likely reason why your users not seeing the images?
Response:

- A. The images in S3 are saved as .png instead of .jpg.
- B. The users are using Internet Explorer.
- C. There is no rule in your bucket policy allowing public access.
- D. There is no record in Route 53 pointing cdn.yourdomain.com to the ALIAS.

Answer: D

NEW QUESTION # 17

You ping an Amazon Elastic Compute Cloud (EC2) instance from an on-premises server. VPC Flow Logs record the following:
2 12345 6789010 eni-1235b8ca 10.123.234.78 172.11.22.33 0 0 1 8 672 1432917027 1432917142 ACCEPT OK
2 123456789010 eni-1235b8ca 172.11.22.33 10.123.234.78 0 0 1 4 336 1432917027 1432917082 ACCEPT OK
2 123456789010 eni-1235b8ca 172.11.22.33 10.123.234.78 0 0 1 4 33 6 1432917094 1432917142 REJECT OK Why are ICMP responses not received by the on-premises system?
Response:

- A. The outbound network access control list is blocking the traffic
- B. The outbound security group is blocking the traffic.
- C. The inbound network access control list is blocking the traffic
- D. The inbound security group is blocking the traffic.

Answer: A

NEW QUESTION # 18

Which is not a valid Route 53 record?
Note: Answers to this question are not verified by our experts, please study yourself and select the appropriate answers.
Contribute: Please send the correct answers with reference text/link on feedback@VMexam.com to get up to 50% cashback.
Response:

- A. AAAA
- B. NAPTR
- C. BFD
- D. SPF

Answer: D

NEW QUESTION # 19

Your company runs an application for the US market in the us-east-1 AWS region. This application uses proprietary TCP and UDP protocols on Amazon Elastic Compute Cloud (EC2) instances. End users run a real-time, front-end application on their local PCs. This front-end application knows the DNS hostname of the service.
You must prepare the system for global expansion. The end users must access the application with lowest latency.
How should you use AWS services to meet these requirements?

- A. Set the Amazon API gateway in front of the service, and register the API gateway name of the main service as an ALIAS record in Route 53.

- B. Register the IP addresses of the service hosts as "A" records with latency-based routing policy in Amazon Route 53, and set a Route 53 health check for these hosts.
- C. Set the Elastic Load Balancing (ELB) load balancer in front of the hosts of the service, and register the ELB name of the main service host as an ALIAS record with a latency-based routing policy in Route 53.
- D. Set Amazon CloudFront in front of the host of the service, and register the CloudFront name of the main service as an ALIAS record in Route 53.

Answer: C

NEW QUESTION # 20

......

Our ANS-C01 learning guide is very efficient tool for in our modern world, everyone is looking for to do things faster and better so it is no wonder that productivity hacks are incredibly popular. So we must be aware of the importance of the study tool. In order to promote the learning efficiency of our customers, our ANS-C01 Training Materials were designed by a lot of experts from our company. Our ANS-C01 study dumps will be very useful for all people to improve their learning efficiency.
