When you are studying for the OGEA-101 exam, maybe you are busy to go to work, for your family and so on. How to cost the less time to reach the goal? It's a critical question for you. Time is precious for everyone to do the efficient job. If you want to get good OGEA-101 prep guide, it must be spending less time to pass it. Exactly, our product is elaborately composed with major questions and answers. If your privacy let out from us, we believe you won't believe us at all. That's uneconomical for us. In the website security, we are doing well not only in the purchase environment but also the OGEA-101 Exam Torrent customers' privacy protection. We are seeking the long development for OGEA-101 prep guide.

The VCEEngine OGEA-101 exam practice test questions provide a way to assess your understanding of the material, identify areas for improvement, and build confidence and test-taking skills. The VCEEngine OGEA-101 exam practice test questions are real and verified by TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam trainers. They work collectively and strive hard to ensure the top standard of TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam practice questions all the time.

>> Valid OGEA-101 Test Answers <<

Trustable Valid OGEA-101 Test Answers, Ensure to pass the OGEA-101 Exam

Our OGEA-101 practice exams lower the likelihood of failing and are optimal for self-evaluation. You can access the web-based TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) practice exam online without having to install any software. All browsers and operating systems support our web-based OGEA-101 Practice Test. Every Windows computer supports our desktop The Open Group OGEA-101 practice exam software, enabling you to prepare for the OGEA-101 test without an active internet connection. You can customize the time and types of these The Open Group Questions.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28

Complete the sentence. Actions arising from the Business Transformation Readiness Assessment technique should be incorporated in the

- A. Architecture Roadmap
- B. Implementation Governance Model
- C. Implementation and Migration Plan
- D. Architecture Requirements Specification

Answer: C

Explanation:

The Business Transformation Readiness Assessment technique is used to evaluate the readiness of the organization to undergo change and to identify the actions needed to increase the likelihood of a successful business transformation. These actions should be incorporated in the Implementation and Migration Plan, which is the detailed plan to transition from the Baseline Architecture to the Target Architecture. The Implementation and Migration Plan also includes the Transition Architectures, the Architecture Building Blocks, the Work Packages, the Implementation Governance Model, and the Architecture Contract. References: 1: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 27: Business Transformation Readiness Assessment 2: The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 21: Phase F: Migration Planning

NEW QUESTION # 29

Consider the following statement.

Projects may cycle between ADM phases, in planned cycles covering multiple phases.

What does it illustrate?

- A. Enterprise Architecture
- B. Iteration
- C. Implementation governance
- D. Requirements management

Answer: B

Explanation:

The statement "Projects may cycle between ADM phases, in planned cycles covering multiple phases" illustrates the concept of iteration, which is the process of repeating the ADM phases or steps within a phase to refine the architecture outputs and address the changing requirements and stakeholder concerns. Iteration can occur at different levels of granularity and scope, such as within a single phase, across multiple phases, or across the entire ADM cycle. Iteration can also be applied to different architecture domains, such as business, data, application, and technology. Iteration is a key feature of the ADM that enables the development of architectures that are fit for purpose, adaptable, and responsive to change. References: : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 24: Applying Iteration to the ADM

NEW QUESTION # 30

Consider the following chart:

□ Which important concept for Enterprise Architecture Practitioners does it illustrate?

- A. An Enterprise Architecture must be developed in phases with a limited fixed duration.
- B. Enterprise Architects must use Gantt charts to communicate with Stakeholders.
- C. ADM phases must be run simultaneously until the relevant information has been produced.

- **D. ADM phases must be run in a sequenced approach to produce the Architecture.**

Answer: D

Explanation:

The chart shown is a Gantt chart, which is commonly used for project management to illustrate a project schedule. In the context of TOGAF (The Open Group Architecture Framework), which is a framework for enterprise architecture, this Gantt chart is demonstrating the sequenced approach to the Architecture Development Method (ADM). The ADM is the core process of TOGAF which provides a tested and repeatable process for developing architectures. The ADM is described as being iterative, over the whole process, between phases, and within phases. For each iteration of the ADM, a fresh decision must be taken about each of the parameters (scope, granularity, time period, and architecture assets).

The ADM consists of a number of phases that have to be followed in sequence:

- * Preliminary Phase: Framework and principles
- * Phase A: Architecture Vision
- * Phase B: Business Architecture
- * Phase C: Information Systems Architectures, including Data and Application Architectures
- * Phase D: Technology Architecture
- * Phase E: Opportunities and Solutions
- * Phase F: Migration Planning
- * Phase G: Implementation Governance
- * Phase H: Architecture Change Management
- * Requirements Management

Each phase is dependent on the outputs of the previous phase and the Requirements Management phase runs throughout. The Gantt chart clearly shows the dependency and sequence in which these phases occur, implying that a structured approach is followed to produce the enterprise architecture.

Reference:

- * The TOGAF Standard, Version 9.2, a standard of The Open Group
- * The TOGAF documentation available at <https://publications.opengroup.org/standards/architecture> and <https://publications.opengroup.org/guides/architecture>

NEW QUESTION # 31

Which of the following is included as part of Architecture Governance?

- A. Managing Stakeholders and their requirements
- **B. Ensuring compliance with internal and external standards and regulatory obligations**
- C. Interacting with the CxO level on Enterprise Architecture
- D. Creating and maintaining the Statement of Architecture Work throughout the ADM cycle

Answer: B

Explanation:

Ensuring compliance with internal and external standards and regulatory obligations is one of the activities included as part of Architecture Governance. Architecture Governance is the practice and orientation by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level. It involves establishing processes, roles, responsibilities, policies, and standards to ensure that architectures are aligned with the enterprise's strategy and objectives, and meet the quality and performance requirements. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

NEW QUESTION # 32

Consider the following statements:

1. Groups of countries, governments, or governmental organizations (such as militaries) working together to create common or shareable deliverables or infrastructures
 2. Partnerships and alliances of businesses working together, such as a consortium or supply chain
- What are those examples of according to the TOGAF Standard?

- A. Enterprises
- **B. Architectures Scopes**
- C. Organizations
- D. Business Units

Answer: B

Explanation:

According to the TOGAF standard, the two statements provided refer to different scopes within which architecture can be developed:

Groups of countries, governments, or governmental organizations working together typically align with broader, often international, scopes of architecture that transcend individual enterprise boundaries.

Partnerships and alliances of businesses working together, such as a consortium or supply chain, refer to collaborative efforts that can define architecture at a scope involving multiple enterprises.

In both cases, the term "Architectures Scopes" is appropriate because it reflects the varying levels and contexts in which architectures can be defined, ranging from single business units to collaborative inter-organizational efforts.

NEW QUESTION # 33

.....

Our PDF version is a printable document of exam questions which are real and updated. We have included original TOGAF Enterprise Architecture Part 1 Exam questions in this format so that you can get ready for the exam quickly by just memorizing them. This format of TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) test questions is also usable on smart devices such as laptops, tablets, and smartphones.
