

# Learn About Exam Pattern With 1z0-1042-24 PDF Dumps

## OCI 1Z0-1042-24

### Exam Dumps

1. As an integration developer, you are implementing an integration in oracle integration (OIC) to transform a payload with multiple orders. You have decided to leverage the for each action to loop through each order and process them individually. How do you configure the for each action to support this scenario? Answer 1: Select the repeating element field and map the source element that contains the orders.  
Answer 2: Select the group by option separating the orders by their order number.  
Answer 3: Select the parallel processing option and set the number of threads to the number of orders.  
Answer 4: Select the sequential processing option and set the number of threads to the number of orders.

**Answer 1: Select the repeating element field and map the source element that contains the orders.**

2. What is the purpose of adding and configuring a wait action in the schedule pattern integration flow?  
Answer 1: It is used to configure a global variable for delay settings.  
Answer 2: It is used to trigger an error after a specified duration.  
Answer 3: It can be configured to loop through elements until a condition is met.  
Answer 4: It is used to suspend processing within the integration flow.  
Answer 5: It is used to schedule integration runs at specific times.

**Answer 4: It is used to suspend processing within the integration flow.**

3. Which of these tasks are not required to implement a pub/sub (publish-subscribe) solution in oracle integration (OIC)?  
Answer 1: Create a defined event which must use the JSON format.  
Answer 2: Add and configure a publish event action within an integration flow.  
Answer 3: Define an event adapter connection.  
Answer 4: Create an event pattern integration selecting an event as the trigger.

P.S. Free & New 1z0-1042-24 dumps are available on Google Drive shared by ExamsTorrent: <https://drive.google.com/open?id=1GyGoKmxipB47lpTHfgDJnYMIwlk1Zs60>

Studying with us will help you build the future you actually want to see. By giving you both the skills and exposure of your area of work, our 1z0-1042-24 study guides, 1z0-1042-24 dump and practice questions and answers will help you pass 1z0-1042-24 Certification without any problem. Our very special 1z0-1042-24 products which include 1z0-1042-24 practice test questions and answers encourage you to think higher and build a flourishing career in the every growing industry.

You can know what knowledge points you do not master. By the report from our 1z0-1042-24 study questions. Then it will be very easy for you to make your own learning plan. We believe that the learning plan based on the report of our 1z0-1042-24 preparation exam will be very useful for you. So if you buy our 1z0-1042-24 Practice Engine, it will help you pass your exam and get the certification in a short time, and you will find that our study materials are good value for money.

## Latest 1z0-1042-24 Test Dumps, New 1z0-1042-24 Test Camp

Never say you can not do it. This is my advice to everyone. Even if you think that you can not pass the demanding Oracle 1z0-1042-24 exam. You can find a quick and convenient training tool to help you. ExamsTorrent's Oracle 1z0-1042-24 exam training materials is a very good training materials. It can help you to pass the exam successfully. And its price is very reasonable, you will benefit from it. So do not say you can't. If you do not give up, the next second is hope. Quickly grab your hope, it is in the

## Oracle 1z0-1042-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Using OIC Connections &amp; Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.</li></ul>

## Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q66-Q71):

### NEW QUESTION # 66

When creating a new Oracle Integration Cloud (OIC) Connection resource, there are several steps that must be done before it is fully configured and can be used in an integration flow. Which task is NOT required in order to transition a new Connection resource from the draft to the configured state?

- A. Specify the connection role.
- B. Execute a successful test of the connection.
- C. Specify an adapter type.
- D. Configure the security properties.
- E. Configure the connection properties.
- F. Specify the corresponding lookup.

Answer: F

Explanation:

Comprehensive and Detailed Explanation:

Configuring a connection:

\* A, B, C, E: Required-adapter type, role (trigger/invoke), security, and properties define the connection.

\* F: Required-testing validates configuration.

### NEW QUESTION # 67

OIC integrations can be exported so that they can later be imported into another OIC instance environment. Which statement is NOT true about the import and export of OIC integrations?

- A. Integrations must be exported as a package if you want to import them into another OIC environment.
- B. Exported integrations will include all of their dependent connection resource information with the exception of URL and credentials.
- C. Imported integration can be reconfigured to use different connection resources by using the OICREST API.

- D. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment.

**Answer: A**

Explanation:

- \* A, B, and C are all true statements about OIC import/export functionality.
- \* D is false because integrations can be exported individually and imported into another OIC environment without needing to be part of a package. Packages are optional.

**NEW QUESTION # 68**

You created a scheduled integration in Oracle Integration Cloud (OIC) that uses scheduled parameters named startDate and endDate to determine the data range for a data synchronization process. The default values for these parameters are set to the previous day for startDate and the current day for endDate. However, you now want to schedule a run of the instance with a different start date. What should you do?

- A. Modify the parameter value in the integration code and redeploy the integration.
- B. Modify the parameter value in the instance's integration properties and restart the instance.
- **C. Override the parameter value when scheduling the integration instance.**
- D. Create a new version of the integration by modifying the parameter value, and then deploy the new scheduled integration version.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

Scheduled Parameters:

- \* C: True-override at runtime is simplest.

**NEW QUESTION # 69**

Which two are ways Business Rules can be modeled in Process Cloud Service (PCS)?

- **A. Using Decision Model Editor**
- B. Using BPM Rule Editor
- C. Using OIC Rule Editor
- **D. Using Oracle Business Rules Editor**

**Answer: A,D**

Explanation:

Business Rules in PCS can be modeled using the Oracle Business Rules Editor and the Decision Model Editor. These tools provide flexibility in defining and managing business rules.

**NEW QUESTION # 70**

Your design of an asynchronous OIC integration flow includes the requirement for additional processing logic that is conditionally based on the results returned to the integration instance from earlier external service invocations. You decide to leverage the Switch action to facilitate this implementation.

Which is a valid consideration concerning the configuration and capabilities of the Switch action?

- A. You may need to create conditional expressions for each branch with greater complexity because nested Switch actions are not supported.
- **B. XPath version 2.0 functions can be used to create more complex conditional expressions for a branch.**
- C. Any data objects returned within a branch of a Switch action will only be visible within the implicit scope of that branch and not visible in the main flow of the integration outside of the Switch action.
- D. All branches within the Switch action must have a conditional expression defined.

**Answer: B**

### Explanation:

XPath version 2.0 functions can be used within the Switch action to create complex conditional expressions for branch evaluation in OIC.

## NEW QUESTION # 71
