

# Valid Integration-Architect Exam Tutorial & Testking Integration-Architect Exam Questions

BTW, DOWNLOAD part of PassCollection Integration-Architect dumps from Cloud Storage: <https://drive.google.com/open?id=1hou10H0a9aWCrqP09SRNnmhgePXyU2X2>

Our top priority is to help every customer in cracking the Salesforce Certified Integration Architect (Integration-Architect) test. Therefore, we have created these formats so that every applicant can prepare successfully for the Integration-Architect exam on the first attempt. We are aware that the cost for the registration of the Salesforce Integration-Architect examination is not what everyone can pay. After paying the hefty Integration-Architect test registration fee, applicants usually run on a tight budget. This is why PassCollection provides you with the Integration-Architect real questions with up to 90 days of free updates.

Do you want to catch up with the trend in the IT industry? Being certified by Salesforce Integration-Architect exam certification means a large possibility of success. While our Integration-Architect exam targeted training will help you step ahead of others. The valid Integration-Architect study practice will make your thoughts more clear, and you will have the ability to deal with problem in the practical application. Then, passing the Integration-Architect Actual Test is an easy and simple thing. If you still have some doubts, please download PassCollection Integration-Architect free demo for a try. You will be surprised.

## Testking Integration-Architect Exam Questions & Reliable Integration-Architect Test Online

To help you get to know the exam questions and knowledge of the Integration-Architect practice exam successfully and smoothly, our experts just pick up the necessary and essential content in to our Integration-Architect test guide with unequivocal content rather than trivia knowledge that exam do not test at all. To make you understand the content more efficient, our experts add charts, diagrams and examples in to Integration-Architect Exam Questions to speed up you pace of gaining success. So these Integration-Architect latest dumps will be a turning point in your life. And on your way to success, they can offer titanic help to make your review more relaxing and effective. Moreover, the passing certificate and all benefits coming along are not surreal dreams anymore.

## Salesforce Certified Integration Architect Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Service Agents at Northern Trail Outfitters uses Salesforce to manage cases and B2C Commerce for ordering.

Which integration solution should an architect recommend in order for the service agents to see order history from a B2C Commerce system?

- A. Mulesoft Anypoint Platform
- B. A REST API offered by Commerce Platform
- C. Salesforce B2C Commerce to Service Cloud Connector
- D. REST API offered by Salesforce Platform

**Answer: C**

Explanation:

Option A is correct because Salesforce B2C Commerce to Service Cloud Connector is an integration solution that allows service agents to see order history from a B2C Commerce system. Salesforce B2C Commerce to Service Cloud Connector is a pre-built package that integrates Salesforce B2C Commerce and Service Cloud using REST APIs and Platform Events. It enables service agents to view, edit, cancel, and refund orders from B2C Commerce within the Service Cloud console. It also supports features such as customer verification, order search, order details, and order history.

Option B is incorrect because a REST API offered by Commerce Platform is not an integration solution that allows service agents to see order history from a B2C Commerce system. A REST API offered by Commerce Platform is a set of web services that expose the functionality and data of the Commerce Platform to external applications. It can be used to create, update, delete, or query resources such as products, catalogs, customers, or orders. However, a REST API offered by Commerce Platform is not a complete integration solution, as it requires additional development, configuration, and maintenance to connect with Service Cloud and display the order history in the Service Cloud console.

Option C is incorrect because Mulesoft Anypoint Platform is not an integration solution that allows service agents to see order history from a B2C Commerce system. Mulesoft Anypoint Platform is a platform that enables developers to build, manage, and monitor integrations and APIs across various systems and applications. It can be used to connect Salesforce B2C Commerce and Service Cloud using various connectors, protocols, and transformations. However, Mulesoft Anypoint Platform is not a pre-built integration solution, as it requires additional development, configuration, and maintenance to connect with Service Cloud and display the order history in the Service Cloud console.

Option D is incorrect because a REST API offered by Salesforce Platform is not an integration solution that allows service agents to see order history from a B2C Commerce system. A REST API offered by Salesforce Platform is a set of web services that expose the functionality and data of the Salesforce Platform to external applications. It can be used to create, update, delete, or query resources such as objects, records, metadata, or Apex classes. However, a REST API offered by Salesforce Platform is not a complete integration solution, as it requires additional development, configuration, and maintenance to connect with B2C Commerce and display the order history in the Service Cloud console.

#### NEW QUESTION # 40

Northern Trail Outfitters' ERP is integrated with Salesforce and syncs several million contacts per day. To prevent specific data from syncing, the integration uses a SOQL query filtered by sharing hierarchy.

Which two things should an architect do to improve the performance of the integration?

Choose 2 answers

- A. Remove the query filters.
- B. Remove the sharing restrictions.
- C. Include selective criteria in query filters.
- D. Include non-selective criteria in query filters.

**Answer: B,C**

Explanation:

<https://help.salesforce.com/articleView?id=000325247&type=1&mode=1>

#### NEW QUESTION # 41

Northern Trail Outfitters has a registration system that is used for workshops offered at its conferences. Attendees use a Salesforce community to register for workshops, but the scheduling system manages workshop availability based on room capacity. It is expected that there will be a big surge of requests for workshop reservations when the conference schedule goes live.

Which integration pattern should be used to manage the influx in registrations?

- A. Remote Call-In
- B. Remote Process Invocation-Fire and Forget
- C. Batch Data Synchronization
- D. Remote Process Invocation-Request and Reply

**Answer: C**

### NEW QUESTION # 42

Northern Trail Outfitters has had an increase in requests from other business units to integrate opportunity information with other systems from Salesforce. The developers have started writing asynchronous @future callouts directly into the target systems. The CIO is concerned about the viability of this approach scaling for future growth and has requested a solution recommendation. What should be done to mitigate the concerns that the CIO has?

- A. Refactor the existing future methods to use Enhanced External Services, import Open API 2.0 schemas and update flows to use services instead of Apex.
- B. Develop a comprehensive catalog of Apex classes to eliminate the need for redundant code and use custom metadata to hold the endpoint information for each integration.
- **C. Implement an Enterprise Service Bus for service orchestration, mediation, routing and decouple dependencies across systems.**
- D. Implement an ETL tool and perform nightly batch data loads to reduce network traffic using last modified dates on the opportunity object to extract the right records.

**Answer: C**

Explanation:

Explanation

Implementing an Enterprise Service Bus (ESB) for service orchestration, mediation, routing and decoupling dependencies across systems is a better solution than refactoring the existing @future methods to use Enhanced External Services. An ESB can provide a centralized platform for integrating multiple systems and applications, while reducing the complexity and maintenance of point-to-point integrations. Enhanced External Services can be used to invoke external REST services from Salesforce, but they are not suitable for complex integration scenarios that require data transformation, error handling, or asynchronous processing.

### NEW QUESTION # 43

Universal Containers (UC) is decommissioning its legacy CRM system and migrating data to Salesforce. The data migration team asked for a recommendation to optimize the performance of the data load. Which approach should be used to meet the requirement?

- A. Contact Salesforce Support to schedule performance load.
- **B. Use Bulk API to process jobs in parallel mode.**
- C. Use Bulk API to process jobs in serial mode.

**Answer: B**

Explanation:

For large-scale data migrations, the Bulk API is the primary architectural tool for high-performance loading.

To maximize throughput and "optimize performance," the architect should recommend processing jobs in parallel mode.

In parallel mode, Salesforce processes multiple batches of a job simultaneously, taking advantage of the multi-tenant platform's concurrent processing capabilities. This significantly reduces the total time required for a massive data migration compared to serial mode (Option B), which processes batches one by one.

However, the architect must warn the team about potential lock contention. If multiple parallel batches attempt to update the same parent record or participate in complex sharing calculations at the same time,

"Unable to lock row" errors may occur. To mitigate this while maintaining parallel speed, the data should be sorted by Parent ID to ensure that batches do not overlap on the same records. Option A is rarely necessary for standard migrations unless the volume exceeds extreme thresholds. Parallel Bulk API is the standard "best practice" for ensuring the migration completes within the allotted cutover window.

### NEW QUESTION # 44

.....

The Salesforce Integration-Architect test materials are mainly through three learning modes, Pdf, Online and software respectively. The Integration-Architect test materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the Salesforce Certified Integration Architect Integration-Architect Quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of Salesforce Certified Integration Architect Integration-Architect test prep more conveniently at the same time.
