Plat-Admn-301 Online Praxisprüfung - Plat-Admn-301 Zertifizierungsprüfung

Sie können Prüfungsfragen und Antworten zur Salesforce Plat-Admn-301 Zertifizierungsprüfung teilweise umsonst als Probe herunterladen. Sobald Sie It-Pruefung wählen, würden wir alles tun, um Ihnen bei der Prüfung zu helfen. Wenn Sie später finden, dass die von uns gebotenen Salesforce Plat-Admn-301 Prüfungsfragen und Antworten den echten Prüfungsfragen und Antworten nicht entsprechen und Sie somit die Prüfung nicht bestehen, dann erstatten wir Ihnen die an uns geleisteten Zahlung.

Salesforce Plat-Admn-301 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Cloud Applications: This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.

Thema 2	<ul style="list-style-type: none"> • Security and Access: This section of the exam measures the skills of Salesforce Administrator and covers how record-level access, field access, and sharing models impact data visibility across the system. It focuses on understanding controlled-by-parent relationships, territory management, role hierarchies, and access to reports, dashboards, and email folders. It also includes comparing custom profiles, permission sets, and delegated administration, along with evaluating different authentication methods. The section also addresses the structure of business models such as person accounts, standard accounts, contacts, and contact-to-multiple-account relationships.
Thema 3	<ul style="list-style-type: none"> • Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.
Thema 4	<ul style="list-style-type: none"> • Environment Management and Deployment: This section of the exam measures skills of Salesforce Administrator and covers moving metadata between environments using tools such as sandboxes, change sets, and managed or unmanaged AppExchange packages. It explains the capabilities and best practices related to deploying changes through change sets to ensure smooth and controlled migrations.

Salesforce Certified Platform Administrator II Plat-Admn-301 Prüfungsfragen mit Lösungen (Q152-Q157):

152. Frage

AW Computing is running a special bundle deal on monitors and keyboards. Normally, discounts need VP approval, but this special bundle is pre-approved.

What should the administrator recommend for these requirements?

- A. Remove the approval process.
- **B. Implement CPQ.**
- C. Create a separate price book.
- D. Enable Subscriptions.

Antwort: B

Begründung:

A price book is a list of products and their prices for a specific segment of customers or market. By creating a separate price book for the special bundle deal on monitors and keyboards, AW Computing can offer different prices for these products without affecting their standard prices or requiring VP approval. The price book can also specify which products are included in the bundle and which are not. References: https://help.salesforce.com/s/articleView?id=sf.products_pricebooks_def.htm&type=5

153. Frage

An administrator at Clod Kicks has built a flow that delivers status update email to customers. Recently, there's been an increase in support cases from customers reporting they had not received the email.

Where should the administrator look to investigate the issue?

- A. Paused Flow Interviews
- **B. Email Logs**
- C. Setup Audit Trail
- D. Process Automation Setting

Antwort: B

Begründung:

Email logs are files that provide information about email delivery and activity in your Salesforce org. Email logs contain details such as sender, recipient, subject, date, status, error code, and more for each email sent or received within a specified time range. You

can use email logs to investigate issues with email delivery or performance in your org. In this case, you can use email logs to check if the status update emails were sent successfully or if there were any errors or failures. References:

[email_logs.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.email_logs_format.htm&type=5) https://help.salesforce.com/s/articleView?id=sf.email_logs_format.htm&type=5

154. Frage

The Cloud Kicks security team has seen an increase in unattended device attacks, where hackers can view sensitive information when users leave devices unlocked in public settings. The security team wants to ensure Salesforce data cannot be viewed after 10 minutes of inactivity.

What is the recommended security setting to configure?

- A. Enforce login IP ranges on every request.
- B. Require a high assurance session.
- C. Lock sessions to the domain in which they were first used.
- **D. Force logout on session timeout.**

Antwort: D

Begründung:

Force logout on session timeout is the recommended security setting to configure because it prevents users from resuming their sessions after they time out due to inactivity, which reduces the risk of unauthorized access to Salesforce data from unattended devices. References: https://help.salesforce.com/s/articleView?id=sf.security_sessions_logout.htm&type=5

[id=sf.security_sessions_logout.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.security_sessions_logout.htm&type=5)

155. Frage

Ursa Major Solar offers customers annual service contracts. Account owners should receive an email renewal reminder 1 month before their customer's planned expiration date. The administrator builds a flow to automate the process, which runs when a record is created, and tests several possible scenarios.

What will occur if the expiration date is changed from January 1 of the next year to yesterday?

- A. The Interview is rescheduled based on the expiration date and sends the email on the last day of the current month.
- **B. The resume event is recalculated and the email goes out to the account owner immediately.**
- C. The Interview resumes 1 month before the original expiration date and will send the email at that time.
- D. The flow is unable to run and a flow error message is sent to the user who initiates the flow.

Antwort: B

Begründung:

The resume event is recalculated and the email goes out to the account owner immediately because the flow uses a scheduled path that evaluates the expiration date field every time it changes. When the expiration date is changed to yesterday, the flow resumes immediately and executes the action of sending the email.

156. Frage

AW Computing has been advertising a new keyboard that was released at the beginning of the month. The sales team has an additional incentive to add the keyboards to every sale. The administrator already added the product to Salesforce but the reps are unable to select the product on the opportunity.

Which two options should an administrator check to ensure the product is available?

Choose 2 answers

- **A. Confirm the correct price book is selected on the opportunity.**
- B. Verify the product has a start date entered.
- C. Make sure the price book is in the company currency.
- **D. Ensure the product is associated with the correct price book.**

Antwort: A,D

Begründung:

Two options that the administrator should check to ensure the product is available are:

* Confirm the correct price book is selected on the opportunity. A price book is a list of products and their prices that can be added to an opportunity. An opportunity can have only one price book at a time, and the products that are available for selection depend on the price book that is chosen. Therefore, the administrator should check if the opportunity has the right price book that contains the new keyboard product.

* Ensure the product is associated with the correct price book. A product is a good or service that can be sold in Salesforce. A product can be associated with one or more price books, depending on how it is priced for different markets or segments. Therefore, the administrator should check if the new keyboard product is added to the appropriate price book that is used by the opportunity.

The other two options are incorrect because:

* Making custom fields does not affect the availability of products on an opportunity. Custom fields are used to store additional information or calculations on an object, but they do not determine which products can be selected from a price book.

* Turning on field tracking does not affect the availability of products on an opportunity. Field tracking is used to monitor changes to certain fields on an object and display them in a history related list, but it does not determine which products can be selected from a price book.
