If you have any question or request for further assistance about the Plat-Dev-210 study braindumps, you can leave us a message on the web page or email us. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our Plat-Dev-210 test guide's growth.

## Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Expression Sets &amp; Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within OmniStudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>OmniScripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.</li> </ul>

## Save Time and Money with Real4exams Salesforce Plat-Dev-210 Actual Questions

Do you want to get the Plat-Dev-210 certification to boost your career? Do you desire to feel competent and confident going into your real Salesforce Certified Omnistudio Developer certification exam? Real Plat-Dev-210 Exam Questions are available right here at Real4exams, so don't waste your time going elsewhere. By practicing with our Real Plat-Dev-210 Exam Questions, which are offered in Plat-Dev-210 PDF, web-based practice test, and desktop practice exam software formats, you can crack your Salesforce Certified Omnistudio Developer (Plat-Dev-210) certification test on first attempt and advance in the Salesforce industry.

### Salesforce Certified Omnistudio Developer Sample Questions (Q90-Q95):

#### NEW QUESTION # 90

A developer has a requirement to create a child FlexCard that contain all of its parent FlexCard's records in a Datatable.

- A. {recordId}
- B. {Params records}
- C. {Records}**
- D. {Records[0]}

**Answer: C**

Explanation:

The correct syntax for passing all of the parent FlexCard's records to a child FlexCard is {Records}, which represents an array of records. The other options are incorrect because they either use an invalid syntax or refer to a single record instead of an array of records.

#### NEW QUESTION # 91

In an OmniScript, a developer needs to configure a Disclosure element to require user input only if the user already checked a Non-Disclosure Agreement Checkbox.

How should the developer configure the conditional view to meet this requirement?

- A. Disable read only if true
- B. Show element if true
- C. Set element to optional if false
- D. Set element to require if true**

**Answer: D**

Explanation:

Setting the element to require if true allows the developer to configure a Disclosure element to require user input only if a condition is met. In this case, the condition is that the user already checked a Non-Disclosure Agreement Checkbox. The other options are either incorrect or irrelevant for this requirement.

### NEW QUESTION # 92

A developer is configuring an integration Procedure Action in an OmniScript. The OmniScript needs a JSON response from the Integration Procedure but does not need to wait for the response for the user to proceed.

Which feature should the developer enable?

- A. **Invoke Mode Fire and Forget**
- B. Toast Completion
- C. Invoke Mode Non-Blocking
- D. Use Future

**Answer: A**

Explanation:

The Invoke Mode Fire and Forget feature enables the OmniScript to invoke the Integration Procedure without waiting for a response. This is useful when the response is not needed for the user to proceed

### NEW QUESTION # 93

A developer needs to configure a calculation procedure to calculate the sum of the entire base price.

What is the most efficient way for the developer to meet this requirement?

- A. Add A Calculation Step as SUM (BasePrice).
- **B. Add an Aggregation Step as SUM (BasePrice)**
- C. Create a Preprocessor class to calculate the sum
- D. Create a Postprocessor apex class to calculate the sum

**Answer: B**

Explanation:

The Aggregation Step in a calculation procedure allows the developer to perform aggregate functions such as SUM, COUNT, MIN, MAX, and AVG on the output of a previous step. The developer can use this step to calculate the sum of the entire base price by specifying the field name and the aggregation function

### NEW QUESTION # 94

What two advantages does a DataRaptor Turbo Extract have over a standard DataRaptor Extract?

Choose 2 answers

- A. It supports complex field mappings
- **B. It is easier to configure**
- **C. It has better performance at runtime**
- D. It populates data in PDF and DocuSign format

**Answer: B,C**

Explanation:

A DataRaptor Turbo Extract is a simplified version of a DataRaptor Extract that can retrieve data from a single object without changing the structure of the output data. It is easier to configure because it does not require defining extraction steps or JSON paths. It also has better performance at runtime because it uses a native query engine instead of a custom one

### NEW QUESTION # 95

.....

Real4exams Plat-Dev-210 product in above-mentioned three formats carries most probable real exam questions. Every person who attempts the exam has different preparation style.
