They work collectively and strive hard to ensure the top standard of Professional Scrum Product Owner I (PSPO-I) exam practice questions all the time.

Scrum Professional Scrum Product Owner I Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which statement best describes a Product Owner 's responsibility?
(choose the best answer)

- **A. Maximizing the value of the work the Scrum Team does.**
- B. Keep stakeholders from distracting the Developers.
- C. Directing the Developers.
- D. Ensuring that the work meets the commitments to the stakeholders.

Answer: A

Explanation:

The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for creating and communicating a vision, ordering the Product Backlog, and ensuring that the best possible job is done to delight customers. The Product Owner does not manage the Developers, but collaborates with them and the Scrum Master to optimize the value delivery. The Product Owner does not ensure that the work meets the commitments to the stakeholders, but rather that the work delivers value to the stakeholders. The Product Owner does not keep stakeholders from distracting the Developers, but rather engages them and manages their expectations.

NEW QUESTION # 63

Sprint Planning is time-boxed to a maximum of eight hours for a one-month Sprint.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 64

Five new Scrum Teams have been created to build one product. A few of the Developers on one of the Scrum Teams ask the Scrum Master how to coordinate their work with the other teams. What should the Scrum Master do?

(choose the best answer)

- **A. Teach them that it is their responsibility to work with the other teams to create an integrated Increment that is inclusive of all five team's work.**
- B. Visit the five teams each day to inspect that their Sprint Backlogs are aligned.
- C. Teach the Product Owner to work with the lead developers on ordering Product Backlog in a way to avoid too much overlap during a Sprint.
- D. Collect the Sprint tasks from the teams at the end of their Sprint Planning and merge that into a consolidated plan for the entire Sprint.

Answer: A

Explanation:

answer: A. Teach them that it is their responsibility to work with the other teams to create an integrated Increment that is inclusive of all five team's work.

Explanation: According to the Scrum Guide, the Scrum Team is responsible for all product-related activities, including coordination and integration with other teams. The Scrum Master should teach the Developers how to work with the other teams to create a potentially releasable product increment that meets the Definition of Done and the Product Goal. One way to facilitate this coordination is to use a Scrum of Scrums meeting, which is a daily or periodic meeting where representatives from each team share their progress, plans, and impediments. The Scrum of Scrums meeting is not mandatory, but it can help the teams align their work

and resolve dependencies.

The other options are not correct because they violate the principles of Scrum, such as self-management, empiricism, and transparency:

* B. Collecting the Sprint tasks from the teams and merging them into a consolidated plan for the entire Sprint is a centralized and controlled way of coordination that undermines the self-management and autonomy of the teams. The Scrum Master should not act as a project manager or a coordinator, but as a servant-leader and a coach who enables the teams to manage their own work.

* C. Visiting the five teams each day to inspect that their Sprint Backlogs are aligned is a micromanagement and inspection approach that does not respect the trust and transparency of the teams.

The Scrum Master should not interfere with the work of the teams, but support them in creating a shared understanding of the product vision, goals, and requirements.

* D. Teaching the Product Owner to work with the lead developers on ordering Product Backlog in a way to avoid too much overlap during a Sprint is a suboptimal and inefficient way of coordination that does not leverage the collective intelligence and creativity of the teams. The Product Owner should not rely on a few individuals to order the Product Backlog, but collaborate with all the teams and stakeholders to maximize value delivery.

References:

* [Scrum Guide], section 2.2: "The Scrum Team is responsible for all product-related activities from stakeholder collaboration, verification, maintenance, operation, experimentation, research and development, and anything else that might be required."

* Scrum Of Scrums - Guide to Agile Scaling Frameworks - Agilest®: "The coordination of the various teams is done in a Scrum of Scrums meeting which can be held daily, twice a week, or at a minimum, once a week. Each Scrum team has its ScrumMaster or a designated team member attend the Scrum of Scrum meeting as its representative."

NEW QUESTION # 65

Which statements are true about the Sprint Retrospective?

- A. It is timeboxed to a maximum of four hours for a one-month Sprint.
- B. The Sprint Retrospective starts the Sprint.
- C. The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness.
- D. It is the appropriate event to change the Definition of Done.

Answer: C,D

NEW QUESTION # 66

It is good practice to maintain the same Product Backlog for multiple Scrum Teams that work on one product.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 67

.....
