## Updated Cisco 300-610 Questions To Clear 300-610 Exam

The 300-610 exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing 300-610 study materials. They know very well what candidates really need most when they prepare for the exam. They also understand the real exam situation very well. So they compiled 300-610 Exam prepare that they hope to do their utmost to help candidates pass the exam and get what job they want. They apply to exam candidates of different level of computer industry. So whichever degree you are at, you can utilize our 300-610 study materials tool with following traits.

## The right way to be prepared for the Cisco 300-610 Exam

In the first place, you need to make sure that you are prepared for the Cisco 300-610 exam. You will find that there are many different sources of information, some of them are better than others. The best kinds of Cisco 300-610 exam preparation materials are those that offer more than just a few questions and answers. You will find that most online Cisco 300-610 study guides offer this

kind of help as well, making it easier for you to learn. A lot of these materials have been created by people who have taken the test and passed, so they know what it takes to pass the test. They can show you what you need to know in order to do well on the exam. The second thing you should do is create an effective study schedule. Many people think that they can simply study in spurts and then cram before the test date, but this is not usually a good idea with such a high stakes test as the Cisco **300-610 Dumps**. You will want to make sure that you cover all of your bases in terms of studying for the exams, and it's important to create a schedule for yourself so you can keep up with your progress. If you follow these two steps, then you should be prepared for your Cisco 300-610 Exam.

## Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q219-Q224):

### NEW QUESTION # 219

An engineer must design a Cisco UCS environment for a customer. The design requires the most efficient use of available bandwidth with active-active uplinks. The upstream Cisco Nexus 9000 Series Switch must automatically initiate the port-channel connectivity to the fabric interconnects. Which configuration must the engineer choose to meet these requirements?

- A. \* fabric interconnects in Ethernet end-host mode  
\* static port-channel from fabric interconnects and Cisco Nexus 9000 switches
- B. \* fabric interconnects in Ethernet switching mode  
\* LACP port-channel from fabric interconnects and Cisco Nexus 9000 switches
- C. \* fabric interconnects in Ethernet switching mode  
\* static port-channel from fabric interconnects and Cisco Nexus 9000 switches
- D. \* fabric interconnects in Ethernet end-host mode  
\* LACP port-channel from fabric interconnects and Cisco Nexus 9000 switches

**Answer: D**

Explanation:

Reference:

Cisco UCS Fabric Interconnect in Switch Mode with Cisco MDS 9000 Family Fibre Channel Switching Modules. When the Cisco UCS Fabric Interconnect is in switch mode, the port channel mode can only be in ON mode and not Active. However, to get the peer wwn information for the Fabric Interconnect, the port channel must be in Active mode.

### NEW QUESTION # 220

What are two reasons to select OTV as the DCI solution to connect multisite topologies? (Choose two.)

- A. It is an open standard.
- B. It constrains HSRP hello messages to each data center.
- C. It extends the spanning tree between data centers.
- D. Layer 3 failures do not propagate beyond the OTV edge device.
- E. It propagates hosts reachability without support of traffic flooding.

**Answer: B,E**

Explanation:

OTV introduces the concept of "MAC routing." [...] it is justified by the need to limit flooding of Layer 2 traffic across the transport infrastructure.

The last capability introduced by OTV is to filter First Hop Redundancy Protocol (FHRP-HSRP, VRRP, and so on) messages across the logical overlay.

### NEW QUESTION # 221

An engineer manages hundreds of Cisco Nexus 3000 Series and 9000 Series Switches that are installed at several data centers and wants to use one of the built-in automation tools of the Cisco NX-OS Guest Shell to automate daily activities. The engineer requires a tool that uses imperative language, has extensive library support, and is object-oriented.

Which automation tool should be used to meet these requirements?

- A. Python

- B. YAML
- C. Bash
- D. Perl

**Answer: A**

Explanation:

Python is object-oriented and imperative language.

YAML is declarative.

#### NEW QUESTION # 222

What are two functions of a Network Services Orchestrator in an NFV environment? (Choose two.)

- A. It operates at the customer-facing services layer and provides the management interface for the virtual network devices.
- **B. It operates at the resource-facing services layer and provides overall lifecycle management at the network service level.**
- **C. It provides an API-based northbound interface for transparent integration with systems that operate at the resource-facing services layer.**
- D. It provides a standards-based southbound interface for transparent integration with systems that operate at the customer-facing services layer.
- E. It provides a standards-based northbound interface for transparent integration with systems that operate at the customer-facing services layer.

**Answer: B,C**

#### NEW QUESTION # 223

A network architect needs secure access to the organization's perimeter routers and firewalls.

The administrator must access network devices from a remote location that is reachable from the WAN cloud.

Which action meets these requirements?

- A. Create a secure IPsec tunnel interface using an internet link for device management purposes
- B. Create an in-band network management network
- C. Enable the SSH protocol with a strong username and password using an internet link for management purposes
- **D. Create an out-of-band network management network**

**Answer: D**
