

# NSK300 Reliable Test Topics - NSK300 Exam Cost

BONUS!!! Download part of Pass4Leader NSK300 dumps for free: [https://drive.google.com/open?id=1XsBIsJG1P5uA1O7OC1IP\\_ljUoSdry7ZB](https://drive.google.com/open?id=1XsBIsJG1P5uA1O7OC1IP_ljUoSdry7ZB)

If you feel nervous in the exam, and you can try us, we will help you relieved your nerves. NSK300 Soft test engine can stimulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam will also be strengthened. In addition, NSK300 exam materials are high quality and accuracy, and we can help you pass the exam just one time if you choose us. We have online and offline chat service stuff, and if you have any questions about NSK300 Exam Dumps, just contact us, we will give you reply as soon as possible.

Pass4Leader helps you in doing self-assessment so that you reduce your chances of failure in the examination of Netskope Certified Cloud Security Architect (NSK300) certification. Similarly, this desktop NSK300 practice exam software of Pass4Leader is compatible with all Windows-based computers. You need no internet connection for it to function. The Internet is only required at the time of product license validation.

## NSK300 Exam Cost | Online NSK300 Bootcamps

Pass4Leader always provides customer support for the convenience of desktop Netskope NSK300 practice test software users. The Netskope NSK300 certification provides both novices and experts with a fantastic opportunity to show off their knowledge of and proficiency in carrying out a particular task. You can benefit from a number of additional benefits after completing the Netskope NSK300 Certification Exam.

### Netskope NSK300 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Implementation:</b> This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Monitoring:</b> This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Cloud Security Solutions:</b> This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Troubleshooting:</b> This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Management:</b> This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.</li> </ul>

## Netskope Certified Cloud Security Architect Sample Questions (Q34-Q39):

### NEW QUESTION # 34

You are asked to ensure that a Web application your company uses is both reachable and decrypted by Netskope. This application is served using HTTPS on port 6443. Netskope is configured with a default Cloud Firewall configuration and the steering configuration is set for All Traffic.

Which statement is correct in this scenario?

- A. Nothing is required since Netskope is steering all traffic.
- B. Enable "Steer non-standard ports" in the steering configuration and create a corresponding Real-time Protection policy to allow the traffic
- C. Create a Firewall App in Netskope along with the corresponding Real-time Protection policy to allow the traffic.
- **D. Enable "Steer non-standard ports" in the steering configuration and add the domain and port as a new non-standard port**

**Answer: D**

Explanation:

To ensure that the web application using HTTPS on port 6443 is both reachable and decrypted by Netskope, the correct action is to enable "Steer non-standard ports" in the steering configuration and add the domain and port as a new non-standard port. This is because Netskope's default configuration steers standard HTTP/HTTPS traffic, typically on ports 80 and 443. Since port 6443 is a non-standard port for HTTPS traffic, it requires explicit configuration to be steered through Netskope1.

### NEW QUESTION # 35

You are building an architecture plan to roll out Netskope for on-premises devices. You determine that tunnels are the best way to achieve this task due to a lack of support for explicit proxy in some instances and IPsec is the right type of tunnel to achieve the desired security and steering.

What are three valid elements that you must consider when using IPsec tunnels in this scenario? (Choose three.)

- A. the impact of threat scanning performance
- B. cipher support on tunnel-initiating devices
- C. the categories to be blocked
- D. bandwidth considerations
- E. Netskope Client behavior when on-premises

**Answer: A,B,D**

Explanation:

When using IPsec tunnels, especially in the context of deploying Netskope for on-premises devices, several factors must be considered to ensure a secure and efficient architecture:

Cipher support on tunnel-initiating devices (A): It is crucial to ensure that the devices initiating the IPsec tunnels support the ciphers used by Netskope. This compatibility is necessary for establishing secure connections.

Bandwidth considerations (B): The bandwidth available for the IPsec tunnels will affect the data throughput and performance of the connection. Adequate bandwidth must be allocated to handle the expected traffic without causing bottlenecks.

The impact of threat scanning performance (D): The performance of threat scanning can be affected by the encryption and decryption processes in IPsec tunnels. It is important to consider how the threat scanning capabilities will perform under the additional load of encrypted traffic.

These elements are essential for the successful implementation of IPsec tunnels in a Netskope architecture plan for on-premises devices<sup>12</sup>.

#### NEW QUESTION # 36

You created a Real-time Protection policy that blocks all activities to non-corporate S3 buckets, but determine that the policy is too restrictive. Specifically, users are complaining that normal websites have stopped rendering properly.

How would you solve this problem?

- A. Create a Real-time Protection policy to allow the Browse activity to the Amazon S3 application.
- B. Create a Real-time Protection policy to allow the Download activity to the Amazon S3 application
- C. Create a Real-time Protection policy to allow the Download activity to the Cloud Storage category
- D. Create a Real-time Protection policy to allow the Browse activity to the Cloud Storage category

**Answer: D**

Explanation:

To solve the problem of normal websites not rendering properly due to a Real-time Protection policy that blocks all activities to non-corporate S3 buckets, the best solution is to create a Real-time Protection policy to allow the Browse activity to the Cloud Storage category. This approach will enable users to view content from various cloud storage services, including Amazon S3, without allowing full access to non-corporate S3 buckets. It's a more granular and less restrictive policy that allows necessary browsing activities while still maintaining control over the upload and download activities to non-corporate buckets<sup>1</sup>.

#### NEW QUESTION # 37

You want to integrate with a third-party DLP engine that requires ICAP. In this scenario, which Netskope platform component must be configured?

- A. Secure Forwarder
- B. On-Premises Log Parser (OPLP)
- C. Netskope Adapter
- D. Netskope Cloud Exchange

**Answer: A**

Explanation:

To integrate Netskope with a third-party DLP engine using ICAP, you must configure the Netskope Secure Forwarder.

Secure Forwarder is the only Netskope component that supports:

\* ICAP communication

\* Forwarding inline web traffic to external DLP engines

\* Bidirectional ICAP requests/responses (REQMOD/RESPMOD)

This allows Netskope to send inspected content to your on-prem or third-party DLP appliance for additional scanning.

Why the other options are incorrect

- \* A. On-Premises Log Parser (OPLP) Used for ingesting logs into Netskope - not for ICAP or traffic processing.
- \* C. Netskope Cloud Exchange Used for integrations with SIEM, SOAR, ticketing, threat intel - not for inline DLP.
- \* D. Netskope Adapter Used mainly for SSPM/API integrations - not relevant for ICAP or external DLP engines.

### NEW QUESTION # 38

You need to monitor the health of configured IPsec or GRE tunnels.

In this scenario, which two methods are supported by Netskope to accomplish this task? (Choose two.)

- A. Use Netskope Trust Portal.
- **B. Use Layer 4 health checks.**
- C. Use ICMP keepalive probing.
- **D. Use Dead Peer Detection.**

Answer: B,D

### NEW QUESTION # 39

.....

If you want to pass your exam just one time, then our NSK300 exam torrent will be your best choice. We can help you pass your exam just one time, and if you fail the exam in your first attempt after using NSK300 exam torrent, we will give you refund, and no other questions will be asked. Moreover, NSK300 Exam Braindumps of us are high-quality, and we have helped lots of candidates pass the exam successfully. We have received many good feedbacks from our customers. We offer you online and offline chat service stuff, if you have any questions about NSK300 exam torrent, you can consult them.
