GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which of the following are roles on a Scrum Team? (Choose the best three answers)

- A. Developers
- B. Product Owner
- C. Scrum Master
- D. Users
- E. Customers

Answer: A,B,C

Explanation:
TheScrum Guidedefines the Scrum Team as consisting of three roles: "The Scrum Team consists of one Scrum Master, one Product Owner, and Developers." Option A (Developers) is the group responsible for building the Increment. Option D (Product Owner) manages the Product Backlog and value delivery. Option E (Scrum Master) facilitates Scrum adoption and team effectiveness. Options B (Users) and C (Customers) are external stakeholders, not Scrum Team roles-they interact with the product but aren't part of the team.
Thus, A, D, and E are the correct roles.

NEW QUESTION # 17
True or False: There must be a release every Sprint.

- A. True
- B. False

Answer: B

Explanation:
Scrum requires a "potentially releasable" Increment each Sprint, but actual release is at the Product Owner's discretion. TheScrum Guidestates: "The Increment must be usable... The Product Owner may choose to release it immediately."
* A:False-release isn't mandatory.

NEW QUESTION # 18
A Product Owner is entitled to postpone the start of a new Sprint after the conclusion of a previous Sprint for the following reason: (Choose the best answer)

- A. Not enough Product Backlog items are "Ready".
- B. The Product Owner has not identified a Sprint Goal.
- C. There is no acceptable reason. A new Sprint starts immediately after the conclusion of the previous Sprint.
- D. The QA department needs more time to make the previous Increment "Done".
- E. The stakeholders are not happy with the value produced in the previous Sprint.

Answer: C

Explanation:
In Scrum, Sprints are continuous and fixed-length, with no gaps allowed between them. TheScrum Guide explicitly states: "A new Sprint starts immediately after the conclusion of the previous Sprint." This ensures a consistent cadence of delivery and adaptation, a

cornerstone of Scrum's empirical process. Let's examine each option:
* A (Not enough "Ready" items):The Product Backlog can be refined incrementally; a lack of "Ready" items doesn't justify delaying a Sprint. The team can start with what's available and refine further during the Sprint.
* B (No Sprint Goal):The Sprint Goal is defined during Sprint Planning, not beforehand. Its absence pre- Sprint isn't a valid delay reason.
* C:This aligns with theScrum Guide's mandate for immediate succession, making it correct.
* D (QA needs more time):Scrum rejects external dependencies like a separate QAdepartment; the Developers must deliver a "Done" Increment within the Sprint. Delaying contradicts this.

NEW QUESTION # 19

In order to make investment decisions, the Product Owner is likely to look at the Total Cost of Ownership (TCO) of the product being built. What costs will a Product Owner take into account? (Choose the best answer)

- A. All investments required to conceive, develop, operate, and maintain the product
- B. The accumulated cost over the earned value of the product
- C. The money spent on development of the product, often a fixed cost per Sprint multiplied by the Sprints required

Answer: A

Explanation:
TCO encompasses all costs across a product's lifecycle, not just development. While theScrum Guidedoesn't define TCO, the Product Owner's value focus implies a broad view: "The Product Owner is accountable for maximizing the value of the product." Option B-conception, development, operation, and maintenance- reflects this holistic perspective.
* A:Development cost alone is too narrow.

NEW QUESTION # 20

The Product Owner is accountable for the functionality included in each Increment. Does he or she have the final say over the definition of "Done"?

- A. No, the Scrum Team is responsible for the definition of "Done". The Product Owner may be consulted.
- B. Yes, the Product Owner is responsible for the definition of "Done". The Developers may be consulted.

Answer: A

Explanation:
TheScrum Guideclarifies that the definition of "Done" is a shared commitment created by the Scrum Team:
"The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product." While the Product Owner defines what goes into the Increment (via the Product Backlog), the definition of "Done" is a collaborative effort, often driven by the Developers' technical expertise and organizational standards, with input from the Product Owner on value and quality expectations.
Option A incorrectly gives the Product Owner sole authority, while B correctly reflects the team's collective responsibility, with the Product Owner as a contributor, not the final arbiter.

NEW QUESTION # 21

......

We know that tenet from the bottom of our heart, so all parts of service are made due to your interests. You are entitled to have full money back if you fail the exam even after getting our CASPO-001 test prep. Our staff will help you with genial attitude.
