

# NCP-US-6.10 Discount, Reliable NCP-US-6.10 Dumps Ebook

**Why DumpsPlanet is No.1 Choice?**

- Provide Real Questions According to Exam Topics & Pattern
- Possess A Pool of Satisfied Customers Whom Get Brilliant Results
- Have a Excellent Team of Experts Ready to Serve You 24/7

Download Free Demo & Get Full Version For 100% Guaranteed Results

**DOWNLOAD** Safe & Secure Payment Methods

PayPal MasterCard Maestro VISA

DOWNLOAD the newest FreePdfDump NCP-US-6.10 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1QNohy7czIWckRJsRA5SfRWRgh0h3we6l>

Where there is life, there is hope. Never abandon yourself. You still have many opportunities to counterattack. If you are lack of knowledge and skills, our NCP-US-6.10 guide questions are willing to offer you some help. Actually, we are glad that our NCP-US-6.10 Study Materials are able to become you top choice. Just look at the warm feedbacks from our NCP-US-6.10 learning braindumps, we are very popular in the whole market. And our NCP-US-6.10 exam guide won't let you down.

The passing rate of our NCP-US-6.10 exam materials are very high and about 99% and so usually the client will pass the exam successfully. But in case the client fails in the exam unfortunately we will refund the client immediately in full at one time. The refund procedures are very simple if you provide the NCP-US-6.10 exam proof of the failure marks we will refund you immediately. If any questions or doubts exist, the client can contact our online customer service or send mails to contact us and we will solve them as quickly as we can. We always want to let the clients be satisfied and provide the best NCP-US-6.10 Test Torrent and won't waste their money and energy.

## Reliable NCP-US-6.10 Dumps Ebook - NCP-US-6.10 Guaranteed Questions Answers

First of all, we have the best and most first-class operating system, in addition, we also solemnly assure users that users can receive the information from the NCP-US-6.10 certification guide within 5-10 minutes after their payment. Second, once we have written the latest version of the NCP-US-6.10 certification guide, our products will send them the latest version of the NCP-US-6.10 Test Practice question free of charge for one year after the user buys the NCP-US-6.10 exam questions. Last but not least, our perfect customer service staff will provide users with the satisfaction in the hours.

## Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Sample Questions (Q32-Q37):

### NEW QUESTION # 32

A company is planning to upgrade the Nutanix Objects cluster deployed on-premise to the latest version. An administrator has logged into Prism Central using domain credentials. After navigating to the LCM page and performing an inventory, the administrator notices that the latest version of Objects is not showing. The following components have been updated to the latest available version listed in LCM: MSP Controller, Objects Manager, Objects Services. After running an LCM inventory successfully, the latest version of Objects still is not listed. What could be the reason?

- A. The MSP Controller on Prism Element has not been updated
- B. The administrator does not have needed permissions
- C. The Objects version is not supported on-premise
- D. Prism Central is not running a compatible version

**Answer: D**

Explanation:

The issue involves an administrator attempting to upgrade a Nutanix Objects cluster using Prism Central's Lifecycle Manager (LCM), but the latest version of Nutanix Objects is not listed after running an inventory, despite other components (MSP Controller, Objects Manager, Objects Services) being updated. The most likely reason is that Prism Central is not running a compatible version required to support the latest Nutanix Objects version.

The Nutanix Unified Storage Administration (NUSA) course states, "LCM upgrades for Nutanix Objects require Prism Central to be running a version that is compatible with the target Objects version; if Prism Central is not on a compatible version, the latest Objects version will not be listed in the LCM inventory." Prism Central orchestrates LCM upgrades, and its version must support the new features, APIs, and metadata of the target Nutanix Objects version. If Prism Central is running an older version, it may not recognize or list newer versions of Nutanix Objects available for upgrade.

The Nutanix Certified Professional - Unified Storage (NCP-US) study guide further elaborates that "a common reason for missing component versions in LCM is an incompatible Prism Central version; administrators must ensure Prism Central is upgraded to a version that supports the target Nutanix Objects release." The guide recommends checking the Nutanix compatibility matrix to verify that the current Prism Central version supports the desired Objects version and upgrading Prism Central if necessary.

The other options are incorrect:

\* The administrator does not have needed permissions: The administrator has already logged into Prism Central, navigated to the LCM page, and performed an inventory, indicating sufficient permissions to view available versions. Permission issues would typically prevent access to LCM entirely.

\* The Objects version is not supported on-premise: Nutanix Objects is fully supported on-premise, and there is no indication that the target version is cloud-only.

\* The MSP Controller on Prism Element has not been updated: The MSP Controller has already been updated to the latest version as per the scenario, and the MSP Controller on Prism Element is not directly responsible for listing Objects versions in Prism Central's LCM.

The NUSA course documentation emphasizes that "ensuring Prism Central is on a compatible version is a critical step before upgrading Nutanix Objects via LCM; an incompatible Prism Central version will prevent the latest Objects version from appearing in the inventory." References:

Nutanix Unified Storage Administration (NUSA) Course, Section on Lifecycle Management: "Prism Central compatibility for Nutanix Objects upgrades." Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Topic 1: Deploy and Upgrade Nutanix Unified Storage, Subtopic: "LCM upgrade troubleshooting for Nutanix Objects." Nutanix Documentation (<https://www.nutanix.com>), LCM Administration Guide: "Prism Central version compatibility for component upgrades."

### NEW QUESTION # 33

Question:

Which two URLs must Prism Central have access to, in an online deployment, for a Nutanix Objects server?  
(Choose two.)

- A. [docker.io](https://docker.io)
- B. [download.nutanix.com](https://download.nutanix.com)
- C. [kubernetes.io](https://kubernetes.io)
- D. [portal.nutanix.com](https://portal.nutanix.com)

**Answer: A,B**

Explanation:

In the Nutanix Unified Storage architecture, Nutanix Objects is a service that leverages container-based deployment for its microservices architecture. When deploying Objects in online mode, Prism Central (which orchestrates the deployment) needs to download the container images and additional software artifacts directly from Nutanix and trusted external registries.

\* [download.nutanix.com](https://download.nutanix.com): This is Nutanix's primary repository for all official Nutanix software artifacts, including Objects installation packages and associated dependencies. In the official NUSA deployment module, it states:

"Prism Central must be able to reach [download.nutanix.com](https://download.nutanix.com) to retrieve Objects binary packages and installation files. This ensures that Objects components are properly deployed and integrated into the cluster environment."

\* [docker.io](https://docker.io): Nutanix Objects uses containerized microservices (e.g., object metadata, S3 gateway) that are packaged as Docker images. The deployment process pulls these images directly from [docker.io](https://docker.io), which is the default container registry for Docker images. The NUSA course explicitly mentions:

"During the Objects deployment, container images are pulled from [docker.io](https://docker.io). Prism Central must have connectivity to [docker.io](https://docker.io) to ensure all components of Objects are downloaded and deployed successfully."

\* [portal.nutanix.com](https://portal.nutanix.com) and [kubernetes.io](https://kubernetes.io):

\* portal.nutanix.com is used for documentation and support but is not needed for direct deployment of Objects.  
\* kubernetes.io is also not required since Nutanix Objects uses its own container orchestration within the Nutanix platform, not Kubernetes from the internet.  
Thus, for an online Objects deployment, the mandatory external dependencies are:  
download.nutanix.com  
docker.io

### NEW QUESTION # 34

An administrator is concerned that storage in the Nutanix File Server is being used to store personal photos and videos. How can the administrator determine if this is the case?

- A. Examine the Usage Summary table for the File Server Container in the Prism Element Storage page.
- **B. Examine the File Distribution by Type widget in the File Analytics dashboard for the File Server.**
- C. Examine the File Activity widget in the File Analytics dashboard for the File Server.
- D. Examine the File Distribution by Type widget from the Files Console for the File Server.

**Answer: B**

Explanation:

To determine if the Nutanix File Server is being used to store personal photos and videos, the administrator should examine the File Distribution by Type widget in the File Analytics dashboard for the File Server.

Nutanix File Analytics is a monitoring and analytics tool that provides detailed insights into file share activities, including the types of files stored on the file server. The File Distribution by Type widget specifically categorizes files by their extensions (e.g., .jpg, .mp4), allowing the administrator to identify whether image or video files are present.

The Nutanix Unified Storage Administration (NUSA) course states, "The File Analytics dashboard includes the File Distribution by Type widget, which displays the breakdown of file types stored on the Nutanix File Server, enabling administrators to identify specific file categories such as images or videos." This widget provides a visual representation of file types, making it easy to detect if personal photos (e.g., .jpg, .png) or videos (e.g., .mp4, .avi) are being stored.

The Nutanix Certified Professional - Unified Storage (NCP-US) study guide further elaborates that "File Analytics offers granular visibility into file storage patterns through widgets like File Distribution by Type, which is ideal for identifying unauthorized or non-business-related content, such as personal media files." By accessing this widget in the File Analytics dashboard, the administrator can confirm the presence of photo and video files and take appropriate action, such as setting policies to restrict such content.

The other options are incorrect or insufficient:

\* Examine the Usage Summary table for the File Server Container in the Prism Element Storage page: The Usage Summary table in Prism Element provides high-level storage metrics (e.g., capacity usage) but does not break down data by file type, so it cannot identify photos or videos.

\* Examine the File Activity widget in the File Analytics dashboard for the File Server: The File Activity widget shows file access patterns (e.g., read/write operations) but does not provide details about file types, making it unsuitable for this purpose.

\* Examine the File Distribution by Type widget from the Files Console for the File Server: The Nutanix Files Console is used for managing file servers and shares, but it does not include a File Distribution by Type widget. This widget is specific to the File Analytics dashboard.

The NUSA course documentation highlights that "the File Distribution by Type widget in File Analytics is a key tool for auditing file content, allowing administrators to detect and manage non-compliant or personal files, such as photos and videos, stored on the file server." References:

Nutanix Unified Storage Administration (NUSA) Course, Section on File Analytics: "Using the File Analytics dashboard to monitor file types and storage patterns." Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Topic 3: Analyze and Monitor Nutanix Unified Storage, Subtopic: "File Analytics and file type distribution analysis." Nutanix Documentation (<https://www.nutanix.com>), Nutanix File Analytics Guide: "File Distribution by Type widget for file content auditing."

### NEW QUESTION # 35

Question:

Which statement is true regarding Self-Service Restore?

- **A. Does not require NGT on the VM.**
- B. Supports 15 minute snapshots.
- C. Supports Windows and Linux.
- D. Supported with a Starter license.

**Answer: A**

Explanation:

Self-Service Restore (SSR) in Nutanix Files is a feature that allows end users or administrators to restore previous file versions directly from share snapshots without requiring direct administrator intervention.

Key details from the NUSA training:

Does not require Nutanix Guest Tools (NGT):

"SSR operates entirely at the file server share level, leveraging share snapshots created by the Nutanix Files service. It does not depend on NGT or VM-level backups, which simplifies deployment and reduces dependencies."

15-minute snapshots:

"While Nutanix supports snapshot intervals down to 1 hour, the minimum interval is not typically 15 minutes for standard file share snapshots." Windows and Linux:

"SSR is primarily supported for Windows SMB shares. NFS/Linux-based shares do not integrate with SSR in the same manner."

Starter license support:

"SSR is part of advanced Nutanix Files functionality not included in the Starter license tier." Thus, the definitive statement: Does not require NGT on the VM.

### NEW QUESTION # 36

An administrator is granting users access to Data Lens. The first user doesn't see the file servers or objects stores in the Account Dashboard.

What must the administrator do to enable their data source in the Account Dashboard?

- A. Enable Pulse Health Monitoring.
- B. Ensure users login with Domain credentials.
- C. Update the self signed certificate.
- D. Ensure Files Analytics is not quarantining data.

**Answer: B**

Explanation:

Data Lens requires domain-authenticated access to discover and display data sources (Files/Objects). Users logging in with local credentials (non-domain) cannot see resources tied to Active Directory.

\* Option B: Certificate issues cause connectivity errors, not dashboard invisibility.

\* Option C: Pulse enables telemetry to Nutanix but doesn't affect Data Lens visibility.

\* Option D: Files Analytics quarantine blocks malware, not dashboard resources.

Reference: Nutanix Data Lens Administration Guide:

"Users must sign in to Data Lens with domain credentials matching the AD domain used by Nutanix Files

/Objects. Local accounts cannot enumerate data sources." (Chapter: "User Access Management") Nutanix Unified Storage (NCP-US) Study Guide:

"Domain authentication is mandatory for Data Lens to map organizational resources to users in the dashboard." (Section: "Data Lens Access Requirements")

### NEW QUESTION # 37

.....

FreePdfDump provides updated and valid NCP-US-6.10 Exam Questions because we are aware of the absolute importance of updates, keeping in mind the dynamic Nutanix NCP-US-6.10 Exam Syllabus. We provide you update checks for 365 days after purchase for absolutely no cost. We also give a 25% discount on all NCP-US-6.10 dumps.

**Reliable NCP-US-6.10 Dumps Ebook:** <https://www.freepdfdump.top/NCP-US-6.10-valid-torrent.html>

Nutanix NCP-US-6.10 Discount The software provides you the real feel of an exam, and it will ensure 100% success rate as well, So we placed some free demos of NCP-US-6.10 quiz torrent materials for your experimental use, Nutanix NCP-US-6.10 Discount The key knowledge points will remain the same and extra knowledge is in the minority, Nutanix NCP-US-6.10 Discount With rapid development of technology, more and more requirements have been taken on those who are working in the industry.

Volunteers around the world donate countless hours of their own time Valid NCP-US-6.10 Test Pdf to work on these projects, helping to build totally free operating systems, compilers, desktop environments, games, and so on.

**2026 Newest 100% Free NCP-US-6.10 – 100% Free Discount | Reliable NCP-**
