CIPM exam is designed for professionals who are responsible for managing privacy programs, including privacy officers, data protection officers, information security officers, and compliance officers. The IAPP CIPM Exam is a computer-based exam that consists of 90 multiple-choice questions and is a comprehensive assessment of the candidate's ability to manage privacy programs and ensure compliance with privacy regulations.

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q49-Q54):

NEW QUESTION # 49

SCENARIO

Please use the following to answer the next QUESTION:

For 15 years, Albert has worked at Treasure Box - a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change.

He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures.

For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available.

Albert does want to show a positive outlook during his interview. He intends to praise the company's commitment to the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing.

He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures.

In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal evidence indicates that many people still harbor mistrust. Albert wants to help the company recover.

He knows there is at least one incident the public is unaware of, although Albert does not know the details.

He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail.

In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks.

With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job.

Based on Albert's observations regarding recent security incidents, which of the following should he suggest as a priority for

Treasure Box?

- A. Appointing an internal ombudsman to address employee complaints regarding hours and pay.
- B. Working with the Human Resources department to make screening procedures for potential employees more rigorous.
- **C. Using a third-party auditor to address privacy protection issues not recognized by the prior internal audits.**
- D. Evaluating the company's ability to handle personal health information if the plan to acquire the medical supply company goes forward

Answer: C

Explanation:

This answer is the best suggestion that Albert should make based on his observations regarding recent security incidents, as it can help to ensure that Treasure Box's privacy program and practices are assessed and verified by an independent and objective party who has the necessary expertise, experience and credentials to evaluate the company's compliance with the applicable laws, regulations, standards and best practices for data protection. Using a third-party auditor can also help to identify any gaps, weaknesses or risks that may have been overlooked or missed by the prior internal audits, and to recommend or implement any improvements or corrective actions. A third-party audit can also help to enhance the company's reputation and trust among its customers, partners and stakeholders, as well as demonstrate its commitment and accountability for privacy protection.

NEW QUESTION # 50

Your company's lead applied scientist believes there's an opportunity to proactively address customer issues using machine learning. She requests access to all of the company's customer data and several publicly available datasets. All the following are appropriate next steps EXCEPT?

- A. Requesting further information from your scientist to understand the goal of the model and the eventual operational description.
- B. Providing a public disclosure to all customers describing the purpose and nature of processing.
- C. Checking your company's public privacy notice to ensure this processing is in line with current disclosures.
- **D. Understanding the geographic location of your customers.**

Answer: D

NEW QUESTION # 51

What is the best way to understand the location, use and importance of personal data within an organization?

- A. By interviewing employees tasked with data entry.
- B. By analyzing the data inventory.
- **C. By evaluating methods for collecting data.**
- D. By testing the security of data systems.

Answer: C

Explanation:

The best way to understand the location, use and importance of personal data within an organization is by evaluating methods for collecting data. This will help to identify the sources, purposes, and categories of data that the organization processes, as well as the data flows and transfers within and outside the organization. By doing so, the organization can assess the risks and opportunities associated with data processing and design appropriate privacy policies and controls. Reference: [IAPP CIPM Study Guide], page 29-30; [Data Inventory]

NEW QUESTION # 52

For an organization that has just experienced a data breach, what might be the least relevant metric for a company's privacy and governance team?

- **A. The number of security patches applied to company devices.**
- B. The number of employees who have completed data awareness training.
- C. The number of Privacy Impact Assessments that have been completed.
- D. The number of privacy rights requests that have been exercised.

Answer: A

Explanation:

The number of security patches applied to company devices might be the least relevant metric for a company's privacy and governance team after a data breach. While security patches are important for preventing future breaches, they do not directly measure the impact or response of the current breach. The other metrics are more relevant for assessing how the company handled the breach, such as how it complied with the privacy rights of affected individuals, how it evaluated the privacy risks of its systems, and how it trained its employees on data awareness. References: CIPM Study Guide, page 28.

NEW QUESTION # 53

All of the following would be recommended for effective identity access management (IAM) EXCEPT?

- A. User responsibility.
- B. Credentials.
- C. Demographics.
- D. Biometrics.

Answer: C

Explanation:

Step-by-Step Comprehensive Detailed Explanation with All Information Privacy Manager CIPM Study Guide References Identity and Access Management (IAM) is essential for securing access to systems and data. Let's evaluate the options:

A . User responsibility:

Ensuring users understand and comply with IAM policies is crucial for effective implementation.

B . Demographics:

Demographics (e.g., age, gender) are not relevant factors in IAM practices, as they do not contribute to authenticating or authorizing access.

C . Biometrics:

Biometric identifiers, such as fingerprints or facial recognition, are commonly used for secure authentication.

D . Credentials:

Credentials, such as usernames, passwords, or tokens, are fundamental elements of IAM systems.
