Users do not need to spend too much time on CIS-SPM questions torrent, only need to use their time pieces for efficient learning, the cost is about 20 to 30 hours, users can easily master the test key and difficulties of questions and answers of CIS-SPM Prep Guide, and in such a short time acquisition of accurate examination skills, better answer out of step, so as to realize high pass the qualification test, has obtained the corresponding qualification certificate.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q72-Q77):

NEW QUESTION # 72

Which system property needs to be set to True to be able to allocate budgets in Project Workspace?

- A. sn_plng_att_core.default.expense_type
- B. sn_invst_pln.budget_allocation_attribute
- C. sn_invst_pln.enable_budget_allocation_v2
- D. com.snc.project.rollup.cost

Answer: C

NEW QUESTION # 73

Which field must be populated to request a person with a specific role when creating a resource assignment?

- A. Group
- B. Role
- C. Skill

- D. Resource

Answer: B

NEW QUESTION # 74

If a user creates a new demand from the demand workbench, what state will the system save the record in?

- A. open
- **B. qualified**
- C. draft
- D. approved

Answer: B

Explanation:

According to the Using the Demand Workbench document, if a user creates a new demand from the demand workbench, the system saves the record in the qualified state and displays it on the bubble chart. The other options are not correct, as they are not the default state for a new demand created from the demand workbench. The approved state is the final state for a demand that has passed all the assessments. The open state is the initial state for a demand that is created from the Service Catalog. The draft state is the state for a demand that is created from the Demand form.

NEW QUESTION # 75

Which of the following can be used to calculate planned cost when creating a resource plan?

Choose 2 answers

- **A. Rate card**
- B. Demand rate
- **C. Project rate**
- D. Default rate

Answer: A,C

Explanation:

According to the ServiceNow documentation¹, a rate card is a table that defines the hourly cost of labor for different roles or resources. A project rate is a fixed rate that is applied to all resources assigned to a project, regardless of their roles or individual rates. Both of these can be used to calculate the planned cost of a resource plan by multiplying the hours allocated to each resource by the corresponding rate. The other options are incorrect because:

A . Demand rate: A demand rate is a rate that is applied to a demand, not a resource plan. It is used to estimate the cost of fulfilling a demand before it is converted into a project².

C . Default rate: A default rate is a rate that is applied to a resource when no other rate is specified. It is not a valid option for calculating the planned cost of a resource plan, as it is only used as a fallback option³.

NEW QUESTION # 76

A project expense line is cost associated with a specific source, except for:

- A. Software.
- **B. Program**
- C. Resource.
- D. Fixed Assets.

Answer: B

Explanation:

According to the Project Expense Lines document, a project expense line is cost associated with a specific source, such as fixed

assets, resource, or software. The program field on the project expense line form is not a source of cost, but a reference to the program that the project belongs to. Therefore, the correct answer is B. Program. The other options are not correct, as they are sources of cost for a project expense line.

NEW QUESTION # 77
