

Reliable 1Z0-1072-25 Test Blueprint, Exam 1Z0-1072-25 Success

What's more, part of that Real4exams 1Z0-1072-25 dumps now are free: <https://drive.google.com/open?id=1h6azFFlQSBXeg6dDADeg0jDKgdlzJPvP>

Our company has employed a lot of leading experts in the field to compile the 1Z0-1072-25 Exam Materials, in order to give candidate a chance to pass the 1Z0-1072-25 exam. So many candidates see our Real4exams web page occasionally, and they are attracted by our high quality and valid dumps. They bought it without any hesitation. However, they passed the exam successfully. It turned out that their choice was extremely correct.

While making revisions and modifications to the Oracle 1Z0-1072-25 practice exam, our team takes reports from over 90,000 professionals worldwide to make the Oracle Cloud Infrastructure 2025 Architect Associate exam questions foolproof. To make you capable of preparing for the Oracle 1Z0-1072-25 Exam smoothly, we provide actual Oracle 1Z0-1072-25 exam dumps.

Exam 1Z0-1072-25 Success, Latest 1Z0-1072-25 Dumps Ppt

The secret that Real4exams helps many candidates pass 1Z0-1072-25 exam is Oracle exam questions attentively studied by our professional IT team for years, and the detailed answer analysis. We constantly updated the 1Z0-1072-25 Exam Materials at the same time with the exam update. We try our best to ensure 100% pass rate for you.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 2	<ul style="list-style-type: none">• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN• FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 3	<ul style="list-style-type: none">• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 4	<ul style="list-style-type: none">• Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block• File• Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which authentication option should you use to ensure third-party APIs communicate with OCI resources?

- A. Auth Tokens
- B. SSH Key Pair with 2048-bit algorithm
- **C. API Signing Key**
- D. OCI Username and Password

Answer: C

Explanation:

When ensuring that third-party APIs communicate securely with OCI resources, the appropriate authentication option is API Signing Key.

API Signing Key: This method uses an RSA key pair to authenticate and sign API requests. The API signing key provides a secure and reliable way to ensure that the API requests to OCI are coming from an authorized source. It is commonly used for programmatic access to OCI services.

Other Options:

SSH Key Pair: Primarily used for secure shell access to compute instances, not for API authentication.

Auth Tokens: Typically used for authentication in environments where APIs don't support the API Signing Key, such as OCI CLI or SDKs.

OCI Username and Password: Generally used for the Console login, not for securing API communications.

Relevant OCI Documentation:

API Signing Key Authentication

This documentation provides details on using API Signing Keys for secure API communication in OCI.

NEW QUESTION # 51

Which statement is true about File System Replication in Oracle Cloud Infrastructure (OCI)?

- A. You can replicate the data in one file system to another file system in the same region or a different region.
- B. You cannot specify a replication interval when you create the replication resource.
- C. You can replicate the data in one file system to another file system only in the same region.
- D. Only a file system that has been exported can be used as a target file system.

Answer: A

Explanation:

File System Replication in Oracle Cloud Infrastructure (OCI) allows you to replicate data from one file system to another either within the same region or across different regions. This capability is particularly useful for disaster recovery, data protection, and global data distribution scenarios.

Cross-Region Replication: The replication feature enables you to create a copy of your file system in a different region, ensuring that your data is available even in the event of a regional failure.

Same-Region Replication: You also have the option to replicate data within the same region, which can be useful for scenarios such as high availability and local backups.

Reference:

Oracle Cloud Infrastructure Documentation: File System Replication

NEW QUESTION # 52

How can OCI IAM be configured to facilitate cross-region access?

- A. Users can access resources in all regions by default.
- B. Identity domain replication must be enabled.
- C. The identity domain automatically replicates to the other region.
- D. The administrator can grant users permissions to access specific resources in the other region.

Answer: D

Explanation:

In Oracle Cloud Infrastructure (OCI), cross-region access is facilitated by configuring IAM policies that grant users or groups permissions to access resources in other regions. IAM policies in OCI are global, meaning they apply across all regions by default. However, an administrator can specifically configure these policies to allow or restrict access to resources in different regions.

Example: An administrator can write a policy that allows a user to manage compute instances in a specific region by including the region's name in the policy statement.

Oracle Cloud Infrastructure Documentation: IAM Policies

NEW QUESTION # 53

With OCI's pricing of \$0.0085 USD per Gigabyte for Outbound Data Transfer in North America, how much will they spend per month for 7 Petabytes of Outbound Data Transfer?

- A. \$59,415.00
- B. \$150,000.00
- C. \$0.00 (free with OCI)
- D. \$59,500.00

Answer: D

Explanation:

To calculate the monthly cost for 7 Petabytes (PB) of outbound data transfer at a rate of \$0.0085 per GB in North America:

Calculation:

1 PB = 1,000,000 GB

7 PB = 7,000,000 GB

Cost = 7,000,000 GB * \$0.0085/GB = \$59,500.00

Thus, the cost for 7 PB of outbound data transfer per month is \$59,500.00.

NEW QUESTION # 54

Which Traffic Management Steering Policy facilitates the distribution of DNS traffic based on the geographical location of end users?

- A. ASN Steering
- **B. Geolocation Steering**
- C. IP Prefix Steering
- D. Proximity Steering

Answer: B

Explanation:

Geolocation Steering in OCI's Traffic Management Steering Policy allows you to distribute DNS traffic based on the geographical location of the end users. This method helps direct users to the nearest regional endpoint, optimizing latency and improving user experience.

Use Cases: Geolocation Steering is commonly used to deliver region-specific content, comply with data residency laws, or optimize service performance by directing traffic to the closest available servers.

NEW QUESTION # 55

.....

Our 1Z0-1072-25 exam questions are perfect, unique and the simplest for all exam candidates for varying academic backgrounds. This is the reason that our 1Z0-1072-25 study guide assures you of a guaranteed success in the exam. The second you download our 1Z0-1072-25 learning braindumps, then you will find that they are easy to be understood and enjoyable to practice with them. And there are three versions of the 1Z0-1072-25 preparation engine for you to choose: the PDF, Software and APP online.
