- B. SAP Cloud ALM Processes app
- C. Availability and Dependencies of Solution Processes Excel
- **D. Business Driven Configuration Questionnaire**

Answer: D

In SAP Central Business Configuration, the Business Driven Configuration Questionnaire (BDCQ) is used to collect the values entered into configuration activities. The BDCQ is a key tool in the implementation process, allowing users to define business-specific settings based on their requirements. It ensures that the configuration aligns with the organization's business processes and industry standards.

* Business Driven Configuration Questionnaire (BDCQ): The BDCQ is designed to guide users through the configuration of SAP S/4HANA Cloud Public Edition by asking relevant questions about business processes. The responses provided in the questionnaire are used to configure the system automatically. This approach simplifies the configuration process and ensures consistency across the implementation. The SAP Central Business Configuration Guide confirms that the BDCQ is the primary tool for collecting configuration values.
