최신 CIS-Strategic Portfolio Management CIS-SPM 무료 샘플문제 (Q97-Q102):

질문 # 97

What role can create or modify a rate model?

- A. time_card_admin.
- B. push_admin.
- C. release_admin.
- D. it_pps_admin.

정답: D

질문 # 98

Use this table to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace.

- A. pm_home_page_config
- B. pm_project
- C. project_template_config
- D. pm_toplevel_project

정답: A

설명:

Explanation

According to the ServiceNow documentation¹, the pm_home_page_config table is used to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace. The other tables are used for different purposes:

pm_project: Stores information about projects².

pm_toplevel_project: Stores information about top-level projects³.

project_template_config: Stores information about project templates.

질문 # 99

In the default system, when working with demands, what two assessment metrics are supported when taking an assessment survey? Choose 2 answers

- A. Strategic Alignment
- B. Cost
- C. Risk
- D. Size

정답: A,C

질문 # 100

Which statement defines the Project Workspace?

- A. A central location for viewing and assessing business demands
- B. A central location to view of all projects in a portfolio to prioritize work
- C. A central location transform the navigation of lists and forms into an interactive graphical experience
- D. A central location for creating and managing projects

정답: D

설명:

According to the ServiceNow documentation¹, the Project Workspace is a central location for creating and managing projects. It provides a graphical interface that allows users to view and edit project information, such as tasks, resources, risks, issues, and dependencies. The Project Workspace also enables users to collaborate with team members and stakeholders, track project progress, and generate reports.

The other options are incorrect because:

A . A central location to view of all projects in a portfolio to prioritize work: This describes the Portfolio Workbench, not the Project Workspace².

C . A central location transform the navigation of lists and forms into an interactive graphical experience: This describes the Lens, not the Project Workspace³.

D . A central location for viewing and assessing business demands: This describes the Demand Workbench, not the Project Workspace.

질문 # 101

What minimum role is required to assign a time sheet policy to a user?

- A. it_project_manager.
- B. It is not possible to assign a time sheet policy to a user.
- C. ppm_admin.
- D. timecard_admin.

정답: D

설명:

According to the web search results¹, the timecard_admin role is the minimum role that is required to assign a time sheet policy to a user. A time sheet policy is a rule that controls the creation and operation of time sheets for resources who log time against work items. The timecard_admin role can create and modify time sheet policies, time sheet groups, and time sheet periods, as well as approve time sheets or submit time cards on behalf of team members. The other options are incorrect because:

A . ppm_admin: The ppm_admin role is a higher-level role that can access all Project and Portfolio Management modules and features, but it is not the minimum role required for assigning a time sheet policy to a user².

C . it_project_manager: The it_project_manager role can create and manage projects, but not assign time sheet policies to users³.

D . It is not possible to assign a time sheet policy to a user: This is false, as it is possible to assign a time sheet policy to a user by using the Time Sheet Policy field on the User form⁴.
