### NEW QUESTION # 160

When upgrading to Cloud Pak for Data v4.7, why must an export/import of governance data be performed?

- A. Containers are ephemeral and cannot persist the data.
- B. Components of Information Server have been removed from the product.
- C. The underlying Db2 repository has been altered.
- D. Catalog data must be relocated to persistent storage.

**Answer: C**

Explanation:

During the upgrade to Cloud Pak for Data version 4.7, significant changes were made to the underlying metadata repository, which is powered by Db2. These changes affect how governance data is stored and accessed, and an export/import is necessary to ensure compatibility and data integrity. The export step extracts governance metadata using the supported utility, and after the upgrade, it is re-imported into the upgraded structure.
