Pass Guaranteed Quiz NS0-185 - Perfect Simulated NetApp Storage Installation Engineer, ONTAP Professional Exam Test

Professional certification can not only improve staff's technical level but also enhance enterprise's competition. Valid Network Appliance NS0-185 latest exam cram pdf will be necessary for every candidate since it can point out key knowledge and most of the real test question. NS0-185 Latest Exam Cram pdf provides you the simplest way to clear exam with little cost.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q82-Q87):

NEW QUESTION # 82

Node 3 has taken over Node 4. You are attempting to access Node 4 on its management interface but cannot do it. In this scenario, how would you access Node 4's management interface?

- A. You have not waited long enough for the failover timeout.
- B. You must use the Service Processor; node management LIFs do not fall over between nodes.

- C. Use SSH to a cluster interconnect switch.
- D. Connect to Node 3 and use the HA interconnect.

Answer: B

NEW QUESTION # 83

You are deploying a cluster with four AFF A300 nodes and Cisco 3232C switches. When you arrive at the customer's site, you notice that there are multiple breakout cables and four Cisco 3232C switches. In this scenario, which statement is true?

- A. Two switches are required for cluster and two for management.
- B. A 4-node cluster requires four switches.
- C. Cisco best practices require four switches.
- D. Your customer ordered a MetroCluster IP configuration.

Answer: D

NEW QUESTION # 84

After completing an installation, the customer wants to know how they can manually open a new technical case with NetApp Global Support.

What are three ways to accomplish this task? (Choose three.)

- A. Use the support site.
- B. Use AutoSupport.
- C. Use the NetApp Field Portal.
- D. Use the mobile app.
- E. Use a telephone.

Answer: A,D,E

Explanation:

The question asks for manual methods a customer can use to open a new technical support case with NetApp Global Support. In NetApp operational/support concepts, there are multiple engagement paths, but only some are "manual case creation" mechanisms. A web-based support site workflow is a standard manual case-creation path for customers. In NetApp support processes (including guidance in NetApp-managed support tooling for storage services), web ticketing/case creation is explicitly described as a supported way to open a case.

A second supported manual method is by telephone ("Call Us" / phone support), which is also described as a direct support option alongside web case creation. This matches option D.

A third manual method commonly provided for customers is a mobile application that supports support engagement (including case workflows). In contrast, AutoSupport is primarily an automated telemetry /notification mechanism; while AutoSupport can trigger automated case creation under certain conditions, it is not a customer-driven "manual open a new case" method. ONTAP documentation even discusses suppressing or resuming AutoSupport case generation, reinforcing that AutoSupport case behavior is automated and policy-driven rather than a manual "open a case" action. Thus option E does not meet the "manually open" requirement.

Option B (NetApp Field Portal) is generally a field/partner/internal operational portal used by NetApp personnel and partners rather than a standard customer manual case creation channel. From an installation knowledge-transfer perspective, the customer-facing paths that satisfy the requirement are the support website and phone, and the mobile app where available for case workflows. Therefore, the three correct choices are A, C, and D.

NEW QUESTION # 85

When creating a new 3.8 TB SSD-based aggregate, what is the default RAID type used with ONTAP 9.8?

- A. RAID-TEC
- B. RAID 4
- C. RAID DP
- D. RAID 0

Answer: C

Explanation:

ONTAP automatically selects RAID-DP as the default RAID type for SSD-based aggregates, including 3.8 TB SSDs, in ONTAP 9.8.

RAID-DP provides double-parity protection, allowing the aggregate to withstand two simultaneous disk failures without data loss. RAID-TEC is reserved for very large aggregates and is not the default. RAID 4 and RAID 0 do not provide adequate protection for production systems.

Therefore, the correct answer is D (RAID DP).

NEW QUESTION # 86

You are a NetApp Professional Services engineer. You have completed an ONTAP cluster installation and need to collect configuration information to enable creation of a Service Event Report (SER).

Which tool would you use?

- A. NetAppDocs output report
- B. Active IQ Config Advisor worksheet
- C. Active IQ scheduled reports
- D. ONTAP System Manager

Answer: A

Explanation:

Service Event Reports require standardized installation and configuration data. NetAppDocs generates structured output reports specifically designed for SER creation, including hardware, cabling, and configuration details. Other tools do not produce SER-formatted documentation.

NEW QUESTION # 87

.....

They are committed to assisting you in Network Appliance NS0-185 exam preparation and boosting the NS0-185 exam candidate's confidence to pass it. The NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam questions are designed and verified by Network Appliance exam trainers. They check and ensure each NS0-185 Practice Questions are real, updated, and accurate. So rest assured that with the NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) practice exams you can get success in challenging the NS0-185 exam easily.

Reliable NS0-185 Test Camp: <https://www.surepassexams.com/NS0-185-exam-bootcamp.html>

You can install our NS0-185 study practice test on your computer or other device as you like without any doubts, Network Appliance Simulated NS0-185 Test We have achieved breakthroughs in application as well as interactive sharing and aftersales service, All of SurePassExams's practice questions and answers about Network Appliance certification NS0-185 exam have high quality and 95% similarity with the real exam questions, Now let's take a look at why a worthy product of your choice is our NS0-185 actual exam.

Placing and Removing Tab Stops on the Ruler, However, if you fail the exam regretfully, we promise you a full refund, You can install our NS0-185 study practice test on your computer or other device as you like without any doubts.

Excellent NS0-185 – 100% Free Simulated Test | Reliable NS0-185 Test Camp

We have achieved breakthroughs in application NS0-185 as well as interactive sharing and aftersales service, All of SurePassExams's practice questions and answers about Network Appliance certification NS0-185 exam have high quality and 95% similarity with the real exam questions.

Now let's take a look at why a worthy product of your choice is our NS0-185 actual exam, If you purchase our actual test questions and answers you will be not worried about exams, we guarantee you 100% pass NS0-185 exam and get certifications.
