100-140 Exam Overviews - 100-140 Top Exam Dumps

As customer-oriented company, we believe in satisfying the customers at any costs. Instead of focusing on profits, we determined to help every customer harvest desirable outcomes by our 100-140 training materials. So our staff and after-sales sections are regularly interacting with customers for their further requirements and to know satisfaction levels of them. We want to finish long term objectives through customer satisfaction and we have achieved it already by our excellent 100-140 Exam Questions. In this era of cut throat competition, we are successful than other competitors. What is more, we offer customer services 24/7. Even if you fail the exams, the customer will be reimbursed for any loss or damage after buying our 100-140 guide dump. One decision will automatically lead to another decision, we believe our 100-140 guide dump will make you fall in love with our products and become regular buyers.

Cisco Certified Support Technician (CCST) IT Support Sample Questions (Q407-Q412):

NEW QUESTION # 407

The IT department identifies that a database server crashes frequently due to high query loads during peak hours. What should the next step be in devising a plan to resolve this problem?

- A. Advise users to avoid using the database during peak hours
- B. Schedule a complete database redesign to optimize performance
- C. Increase the physical memory of the server immediately
- D. Plan to distribute the query load using load balancing techniques

Answer: D

Explanation:

Planning to distribute the query load through load balancing is a strategic approach that can effectively mitigate the issue without extensive downtime or resource investment. It addresses the immediate cause--high query loads--by distributing these loads more evenly across the system or additional resources.

Option A is incorrect because while increasing physical memory may provide temporary relief, it does not address the root cause of high query loads.

Option B is incorrect because a complete database redesign, while potentially beneficial, is a long-term and resource-intensive solution that may not quickly resolve the immediate issue.

Option D is incorrect because advising users to avoid using the database during peak hours is impractical and does not solve the underlying technical problem.

NEW QUESTION # 408

A user reports the following:

I recently got a prompt on my Mac to give an app permissions. I accidentally clicked Deny. Now I can't open the app.

You need to tell the user where to go to grant the necessary permissions to the application.

Which feature should they use?

- A. Privacy and Security
- B. Desktop & Dock
- C. Passwords > Security Permissions!
- D. Users & Groups > Add Group

Answer: A

Explanation:

On macOS, you grant or revoke app permissions in the System Settings under "Privacy and Security," where you can enable access for the denied app.

NEW QUESTION # 409

During operation, a user reports that their desktop PC randomly reboots without warning. What is the most likely hardware component to investigate first?

- A. The power supply unit (PSU)
- B. The keyboard and mouse
- C. The network interface card (NIC)
- D. The sound card

Answer: A

Explanation:

Correct Answer. A. The power supply unit (PSU) Random reboots can often be attributed to issues with the power supply unit, which may be failing or inadequate to meet the system's power demands.

Option B is incorrect because peripherals like the keyboard and mouse are unlikely to cause system reboots.

Option C is incorrect because while network issues can disrupt connectivity, they do not typically cause reboots.

Option D is incorrect because a sound card malfunction would not usually lead to system reboots.

NEW QUESTION # 410

An office network's devices are configured to access the internet, but users report they can only access local network resources. What should a technician check first to resolve this issue?

- A. Whether each device's default gateway is correctly configured
- B. The speed of the connection on each network device
- C. Whether each device's DNS server address is correctly configured
- D. The security settings on the network firewall

Answer: A

Explanation:

Correct Answer. B. Whether each device's default gateway is correctly configured The default gateway allows devices on a network to communicate with devices on other networks (like the internet). Incorrect default gateway settings can prevent devices from accessing external networks.

Option A is incorrect. DNS settings affect domain name resolution but would not prevent external network access if the default gateway is misconfigured.

Option C is incorrect. Connection speed affects performance but not the ability to access external networks.

Option D is incorrect. While firewall settings are important, the first check should be network configuration related to gateway settings.

NEW QUESTION # 411

What is the first step a technician should take when initiating a Remote Assistance session to ensure both parties understand the support process?

- A. Configure the user's system settings to allow automatic future connections
- B. Request the user's login credentials to manage the session more effectively
- C. Send the user a detailed email about what to expect after the session has ended
- D. Explain the process and obtain the user's explicit consent to proceed

Answer: D

Explanation:

Correct Answer. B. Explain the process and obtain the user's explicit consent to proceed Explaining the process and obtaining

explicit consent from the user ensures transparency and compliance with privacy policies, setting clear expectations for the support session.

Option A is incorrect because configuring automatic future connections may infringe on user privacy and security without ongoing consent.

Option C is incorrect because the explanation should occur before the session begins, not after it ends.

Option D is incorrect because requesting login credentials is generally against best practices for maintaining user security and privacy.

NEW QUESTION # 412

Whether you want to improve your skills, expertise or career growth of 100-140 exam, with VCEDumps's 100-140 training materials and 100-140 certification resources can help you achieve your goals. Our 100-140 Exams files feature hands-on tasks and real-world scenarios; in just a matter of days, you'll be more productive and embracing new technology standards.
