

2V0-16.25시험기출문제 - 2V0-16.25합격보장가능인증덤프

- 1) 시험명: 2022년도 하반기 간호조무사 자격시험
2) 시험시행일: 2022년 3월 19일
3) 응시현황

응시대상자수	결시자수	부정행위자수	응시자 준수사항 위반자 수		응시자수 (%)
23,197	1,103	-	휴대폰 소지등	신분증 미지참	22,075 (95.2)

4) 과목별 문항 수, 배점 및 과락 점수

교시	과목명	문제 수	배점	총점	합격자 점수기준	
					과락기준	총점 합격기준
1교시	1. 기초간호학 개요	35	1	35	14	60점 이상
2교시	2. 보건간호학 개요	15	1	15	6	
3교시	3. 공중보건학개론	20	1	20	8	
4교시	4. 실기	30	1	30	12	
계		100		100

여러분이 어떤 업계에서 어떤 일을 하든지 모두 항상 업그레이되는 자신을 원할 것입니다..it업계에서도 마찬가지.모두 자기자신의 업그레이는 물론 자기만의 공간이 있기를 바랍니다.전문적인 IT인사들은 모두 아시다싶이 VMware 2V0-16.25인증시험이 여러분의 이러한 요구를 만족시켜드립니다.그리고 우리 PassTIP는 이러한 꿈을 이루어드립니다.

VMware 2V0-16.25 시험요강:

주제	소개
주제 1	Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
주제 2	Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.
주제 3	VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

주제 4	• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
주제 5	• IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.

PassTIP의 VMware 2V0-16.25덤프는 VMware 2V0-16.25시험문제변경에 따라 주기적으로 업데이트를 진행하여 덤프가 항상 가장 최신버전이도록 업데이트를 진행하고 있습니다.구매한 VMware 2V0-16.25덤프가 업데이트되면 저희측에서 자동으로 구매시 사용한 메일주소에 업데이트된 최신버전을 발송해드리는데 해당 덤프의 구매시간이 1년미만인 분들은 업데이트서비스를 받을수 있습니다.

최신 VCP-VVF Admin 2V0-16.25 무료샘플문제 (Q25-Q30):

질문 # 25

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Assign the SUSPECT_USERS group the Administrator role to the vCenter Object and uncheck propagate.
- B. Disconnect the vCenter from Active Directory.
- C. Assign the SUSPECT_USERS group the Read-only role to the vCenter Object and check propagate.
- D. Assign the SUSPECT_USERS group the No access role to the vCenter Object and check propagate.

정답: D

설명:

To ensure compromised users cannot access vCenter resources:

- * Assign the No Access role at the vCenter level.
- * Enable propagation so this restriction applies to all child objects.
- * This guarantees zero permissions for SUSPECT_USERS.

Other options:

- * B. Administrator with uncheck propagate# Still gives dangerous access at root level.
- * C. Disconnect Active Directory# Disrupts all AD users, not just suspect ones.
- * D. Read-only role# Still grants access, not acceptable during investigation.

질문 # 26

Which VMware Cloud Foundation (VCF) Operations capability enables monitoring and optimization of a VMware vSphere Foundation (VVF) environment?

- A. Infrastructure Visibility
- B. Log Insight Integration
- C. Capacity Analytics
- D. Intelligent Alerts

정답: C

설명:

The capability in VMware Cloud Foundation (VCF) Operations that directly enables monitoring and optimization of a VMware vSphere Foundation (VVF) environment is Capacity Analytics.

* Capacity Analytics provides real-time and predictive insights into resource utilization, capacity forecasting, and optimization.

* It analyzes historical and real-time utilization data to predict future workload demands, enabling administrators to proactively plan expansions or right-size workloads.

* This includes what-if scenario modeling, workload optimization, and resource reclamation to ensure workloads are efficiently placed, avoiding bottlenecks and waste.

Why not the other options?

* A. Intelligent Alerts# Provides proactive alerts and recommendations but is more focused on issue detection and notification, not optimization.

* C. Log Insight Integration# Enables log analysis and troubleshooting, not capacity optimization.

* D. Infrastructure Visibility# Provides monitoring and observability but does not perform predictive optimization.

functional areas: Operations management provides monitoring and optimization

질문 # 27

Which component of VMware vSphere Foundation (VVF) is essential for supporting containerized workloads within the vSphere environment?

- A. vSphere Kubernetes Service
- B. VCF Automation
- C. VCF Fleet Manager
- D. VCF Operations

정답: A

설명:

To support containerized workloads within VMware vSphere Foundation (VVF), the essential component is vSphere Kubernetes Service (vSphere with Tanzu).

* Provides native Kubernetes integration with vSphere clusters.

* Enables running Pods, Tanzu Kubernetes clusters, and containerized workloads on vSphere infrastructure.

Other options:

* VCF Automation (A): Automates VCF lifecycle but not containers.

* VCF Fleet Manager (B): Manages multi-instance environments, not workload containers.

* VCF Operations (C): Provides monitoring/analytics but not container runtime.

질문 # 28

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- A. Drag and drop the widget in the dashboard design pane.
- B. Create the widget in Explore Logs and click Add to Dashboard.
- C. Clone the widget from an existing dashboard.
- D. Import the widget in the dashboard design pane.
- E. Open Management Pack Builder and clone the widget.

정답: A,B

설명:

Two supported methods exist for adding widgets to VCF Operations for Logs dashboards:

* From Explore Logs- Create a widget (e.g., query result) and select Add to Dashboard. (B)

* Dashboard Design Pane- Use the design interface to drag and drop widgets. (C) Other options:

- * A. Clone widget from existing dashboard# Not a supported method.
- * D. Import widget in design pane# Import is for dashboards, not individual widgets.
- * E. Management Pack Builder# Not related to Logs dashboard widgets.

질문 # 29

An administrator has licensed vSphere components in Connected mode and then switched to Disconnected mode to meet the company security restrictions, which cannot be violated.

What must the administrator do to ensure the VMware vSphere Foundation license remains valid?

- A. Nothing. The license is perpetual.
- B. Provide an internet connection to VCF Operations, then download a new license file from the VCF Business Services console at least once every 180 days.
- C. Switch to Connected mode, validate that VCF Operations has downloaded a new license file from VCF Business Services console, and then switch to Disconnected mode at least once every 365 days.
- **D. Manually exchange a registration and license file between the VCF Operations instance and the VCF Business Services console at least once every 180 days.**

정답: D

설명:

For Disconnected mode licensing in vSphere Foundation:

* Administrators must manually export a registration file, upload it to the VCF Business Services console, and then import the license file back into VCF Operations.

* This process must be repeated every 180 days to maintain license validity.

Other options:

* A. Switch to Connected mode once every 365 days# Incorrect; 180-day requirement.

* C. License is perpetual# Not correct; subscription-based license requires refresh.

* D. Provide internet connection every 180 days# Violates security restriction (Disconnected mode is required).
