Salesforce Certified Experience Cloud Consultant Sample Questions (Q107-

Q112):

NEW QUESTION # 107

The Experience Cloud site manager of Cloud Kicks has enabled reputation for its community members. As per the recommendation given by the Experience Cloud consultant, a decision was made to use the out of the box features.

Which two things happen automatically when the site manager enables automation? Choose 2 answers

- A. Inactive and active members are assigned default reputation points.
- B. Default point system and set of reputation levels become available.
- C. Customer portal members gain the ability to provide badges to other members.
- D. Chatter influence is removed from the Contribution section on the Profile page.

Answer: A,B

Explanation:

Reputation is a feature that allows you to reward community members for their contributions and engagement.

When you enable reputation for your community, some things happen automatically, such as:

* Inactive and active members are assigned default reputation points. Inactive members get zero points, while active members get 10 points.

* Default point system and set of reputation levels become available. You can use the default point system or customize it to suit your needs. You can also use the default reputation levels or create your own.

NEW QUESTION # 108

AW Computing is using the Build Your Own (LWR) template to create a site for its customers. The site will showcase blog posts written by AW Computing thought leaders.

Which component should the site creator use to dynamically populate the site with blog posts as new ones are added?

- A. Grid component with list.views
- B. CMS - Single
- C. Grid component with CMS Collections
- D. CMS Connect (JSON)

Answer: C

Explanation:

To dynamically populate the site with blog posts as new ones are added, CK should use a Grid component with CMS Collections. A Grid component is a component that displays content in a grid layout with rows and columns. A CMS Collection is a collection of content items that are created and managed in Salesforce CMS.

CK can use a Grid component and select a CMS Collection as the content source. This will allow CK to showcase blog posts written by AW Computing thought leaders on its site and automatically update them as new ones are added.

NEW QUESTION # 109

The system administrator at Cloud Kicks (CK) has deactivated their Experience Cloud site to do some maintenance and cleanup. How should the administrator ensure that CK customers do NOT receive a welcome email when the site is once again active?

- A. Remove all profiles from the site's membership and add them again after the site is activated.
- B. Use Data Loader to remove all members' email addresses.
- C. Disable the Send welcome email checkbox for the site.
- D. Use the new Service Not Available (SNA) feature.

Answer: C

Explanation:

To ensure that customers do not receive a welcome email when the site is once again active, the administrator should disable the Send welcome email checkbox for the site. This will prevent the site from sending an email to existing members when the site is activated. The administrator can disable the Send welcome email checkbox in the Administration section of Experience Builder.

NEW QUESTION # 110

Northern trail Outfitters has created a microsite digital experience for its Gold-Level VIP customers. The digital experience is not yet active.

The community manager would like to send welcome emails on a specific day, which include a promotion for participating in the community.

In which order should the community manager perform activation steps?

- A. Set the Community to Active, and available profiles and permission sets to the Admin Workspace, enable Contacts as community users, and set welcome emails to Enabled.
- B. Add available profiles and permission sets to the Admin Workspace, enable Contacts as community users, set welcome emails to Enabled, and set the community to Active.
- C. Set the community to Active, and available profiles and permission sets to the Admin Workspace, and create a process to send the welcome emails.
- D. Publish the community, which will send out the welcome emails.

Answer: B

Explanation:

The order in which the community manager should perform activation steps is A. To activate a site in Experience Cloud, you need to complete several steps, such as adding profiles and permission sets, enabling contacts as community users, setting welcome emails, and setting the site to active. The order of these steps is important, because some steps depend on others. For example, you need to add profiles and permission sets before you can enable contacts as community users, and you need to set welcome emails before you can set the site to active.

NEW QUESTION # 111

Universal Containers has recently launched a site for its retailers. Retailers are able to collaborate with other retailers around topics; however, retail managers aren't able to see records owned by their peers and subordinates.

What should be done to resolve the issue?

- A. Retail managers need to be given Super User access.
- B. A Sharing Rule needs to be created.
- C. Retail managers need to be put in the executive role in the Role Hierarchy.
- D. A Sharing Set needs to be created.

Answer: A

Explanation:

Super User access is a feature that allows you to grant access to records owned by other users who have the same role or a role below them in the role hierarchy. You can use Super User access to give retail managers access to records owned by their peers and subordinates.

NEW QUESTION # 112

.....

All of the traits above are available in this web-based Salesforce Certified Experience Cloud Consultant (EX-Con-101) practice test of Test4Engine. The main distinction is that the Salesforce Certified Experience Cloud Consultant (EX-Con-101) online practice test works with not only Windows but also Mac, Linux, iOS, and Android. Above all, taking the Salesforce Certified Experience Cloud Consultant (EX-Con-101) web-based practice test while preparing for the examination does not need any software installation.
