- D. Change strategy covers activities to set up change management properly.
- E. Change leadership involves activities to enable all management levels to handle the cloud implementation and deal with resistance.

Answer: A,D,E

Explanation:
SAP's Organizational Change Management (OCM) framework, aligned with the SAP Activate methodology, is structured around several dimensions to ensure successful adoption of SAP S/4HANA Cloud Public Edition. These dimensions guide the transition of individuals, teams, and organizations to the new system.
* Option A: Change realization includes activities to realize the business benefits associated with the cloud implementation.Correct.
Change realization focuses on achieving the intended business outcomes of the implementation, such as improved efficiency or cost savings. TheSAP Activate Methodology Guidestates, "Change realization encompasses activities to ensure that the business benefits of the cloud implementation are achieved, including post-go-live optimization and benefit tracking."

* Option B: Change effectiveness contains activities that can be applied to evaluate the impact of change management interventions.Incorrect. While evaluating change management impact is important, it is not a distinct dimension in SAP's OCM framework. Evaluation activities are typically part of change realization or communication. TheSAP OCM Guidenotes, "Change effectiveness is assessed within other dimensions, such as realization, rather than as a standalone dimension."

* Option C: Change leadership involves activities to enable all management levels to handle the cloud implementation and deal with resistance.Correct. Change leadership equips managers to lead the transition, address resistance, and champion the project. TheSAP S/4HANA Cloud OCM Guide explains, "Change leadership includes activities to empower management at all levels to guide the organization through the cloud implementation, manage resistance, and foster a positive change culture."
