

Pass Guaranteed 2026 The Best NSE8_813: Latest Fortinet NSE 8 - Recertification Exam Exam Bootcamp

IT certification exam materials providers are increasing recently years so that you will feel confused while choosing Fortinet NSE8_813 latest exam questions vce. Here is good news that TestkingPDF dumps are updated and it is valid and latest. If you purchase dumps right now you can get the best discount and price. NSE8_813 Latest Exam Questions vce will be your best choice for your test. Wish you pass exam successfully with our products.

Fortinet NSE8_813 Exam Syllabus Topics:

Section	Objectives
	- IPsec & SSL VPN Implementation 1. ADVPN, redundancy and high availability 2. Site-to-site and remote access VPN
Secure Connectivity & VPN Technologies	- Secure SD-WAN 1. Routing, application steering and optimization 2. Integration with security services
	- FortiGuard Services 1. IPS, antivirus, web filtering, and anti-spam
Threat Protection & Intelligence	- Advanced Threat Detection & Response 1. FortiSandbox, automation and orchestration
	- FortiManager 1. Centralized configuration, policy and provisioning
Centralized Management & Analytics	- FortiAnalyzer 1. Logging, reporting, analysis and troubleshooting

- Fortinet Security Fabric Architecture

- 1. Fabric integration and management
- 2. Multi-cloud and hybrid network security

Enterprise Security Architecture & Design

- Advanced Firewall & Policy Design

- 1. NAT, VDOM, and traffic control
- 2. Complex security policies and profiles

- FortiGate HA & Clustering

High Availability & Resilience

- 1. Failover and redundancy design
- 2. FGCP, active-active / active-passive modes

- Network & Security Diagnostics

Advanced Troubleshooting & Optimization

- 1. Log analysis, traffic flow and session debugging

Free Fortinet NSE8_813 Vce Dumps & NSE8_813 Reliable Exam Braindumps

The NSE8_813 training vce offered by TestkingPDF will be the best tool for you to pass your actual test. The NSE8_813 questions & answers are especially suitable for the candidates like you for the coming exam test. The contents of Fortinet study dumps are edited by our experts who have rich experience, and easy for all of you to understand. So, with the skills and knowledge you get from NSE8_813 practice pdf, you can 100% pass and get the certification you want.

Fortinet NSE 8 - Recertification Exam Sample Questions (Q38-Q43):

NEW QUESTION # 38

Refer to the exhibit.

An HTTPS access proxy is configured to demonstrate its function as a reverse proxy on behalf of the web server it is protecting. It verifies user identity, device identity, and trust context, before granting access to the protected source. It is assumed that the FortiGate EMS fabric connector has already been successfully connected.

You need to ensure that ZTNA access through the FortiGate will redirect users to the FortiAuthenticator to perform username/password and multifactor authentication to validate access prior to accessing resources behind the FortiGate.

In this scenario, which two further steps need to be taken on the FortiGate? (Choose two.)

- A. Create a firewall rule that allows access from the remote endpoint to the resources behind the FortiGate.
- B. Create a SAML user/server object referring to the FortiAuthenticator.
- C. Create an authentication rule that sets the sso-auth-method to the FortiAuthenticator.

- D. Create an authentication scheme with the "method" as SAML.

Answer: B,D

Explanation:

Create SAML user/server object referring to the FortiAuthenticator:

To integrate FortiAuthenticator for user authentication via username/password and multifactor authentication, a SAML server object must be created on the FortiGate. This object points to the FortiAuthenticator as the Identity Provider (IdP) for handling authentication requests.

Create an authentication scheme with the "method" as SAML:

To utilize SAML for authentication, an authentication scheme must be created with SAML as the method. This enables the FortiGate to redirect users to the FortiAuthenticator for authentication before granting access to protected resources.

NEW QUESTION # 39

A customer wants to enable SYN flood mitigation in a FortiDDoS device. The FortiDDoS must reply with one SYN/ACK packet per SYN packet from a new source IP address.

Which SYN flood mitigation mode must the customer use?

- A. SYN/ACK cookie
- B. ACK cookie
- C. SYN cookie
- D. SYN retransmission

Answer: C

NEW QUESTION # 40

Refer to the exhibit showing an SD-WAN configuration.

```
config system sdwan
    config zone
        edit "virtual-wan-link"
        next
        edit "z1"
        next
    end
    config members
        edit 1
            set interface "port1"
            set gateway 172.16.200.2
        next
        edit 2
            set interface "dmz"
            set gateway 172.16.208.2
        next
        edit 3
            set interface "port15"
            set zone "z1"
            set gateway 172.16.209.2
        next
        edit 4
            set interface "port16"
            set zone "z1"
            set gateway 172.16.210.2
        next
    end
    config health-check
```

```

edit "1"
    set server "10.1.100.2"
    set members 4 3 2 1
    config sla
        edit 1
        next
    end
    config service
        edit 1
            set name "1"
            set mode sla
            set dst "all"
            set src "172.16.205.0"
            config sla
                edit "1"
                set id 1
                next
            end
            set priority-members 1 2 3 4
            set tie-break fib-best-match
        next
    end
end

```

          [1/0] via 172.16.208.2, dmz
          [1/0] via 172.16.209.2, port15
          [1/0] via 172.16.210.2, port16
S      10.1.100.22/32 [10/0] via 172.16.209.2, port15
          [10/0] via 172.16.210.2, port16

```

[10/0] via 172.16.210.2, port16

According to the exhibit, if an internal user pings 10.1.100.2 and 10.1.100.22 from subnet 172.16.205.0/24, which outgoing interfaces will be used?

- A. port16 and port15
- B. port1 and port1
- C. port1 and port15
- D. port16 and port1

Answer: C

Explanation:

According to the exhibit, the SD-WAN configuration has two rules: one for traffic to 10.1.100.0/24 subnet, and one for traffic to 10.1.100.16/28 subnet. The first rule uses the best quality strategy, which selects the SD-WAN member with the best measured quality based on performance SLA metrics. The second rule uses the manual strategy, which specifies port1 as the SD-WAN member to select. Therefore, if an internal user pings 10.1.100.2 and 10.1.100.22 from subnet 172.16.205.0/24, the outgoing interfaces will be port16 and port1 respectively, assuming that port16 has the best quality among the SD-WAN members.

NEW QUESTION # 41

You configured a firewall policy with only a Web filter profile for accessing the Internet. Access to websites belonging to the "Information Technology" category are blocked and to the "Business" category are allowed. SSL deep inspection is not enabled on this policy.

A user wants to access the website <https://www.it-acme.com> which presents a certificate with CN=www.acme.com. The it-acme.com domain is categorized as "Information Technology" and the acme.com domain is categorized as "Business".

Which statement regarding this scenario is correct?

- A. The website will be allowed by category "Business" as the certificate name takes precedence over the URL.
- B. Only with SSL deep inspection enabled will the FortiGate be able to categorize this website.
- C. The FortiGate is able to read the URL within HTTPS sessions when using SSL certificate inspection so the website will be blocked by the "Information Technology".
- D. The website will be blocked by category "Information Technology" as the SNI takes precedence over the certificate name.

Answer: D

NEW QUESTION # 42

You are deploying a FortiExtender (FEX) on a FortiGate-60F. The FEX will be managed by the FortiGate. You anticipate high utilization. The requirement is to minimize the overhead on the device for WAN traffic.

Which action achieves the requirement in this scenario?

- A. Add a switch between the FortiGate and FEX.
- B. Enable CAPWAP connectivity between the FortiGate and the FortiExtender
- C. Change connectivity between the FortiGate and the FortiExtender to use VLAN Mode
- D. Add a VLAN under the FEX-WAN interface on the FortiGate

Answer: C

Explanation:
