We have always set great store by superior after sale service, since we all tend to take responsibility for our customers who decide to choose our NetSec-Pro training materials. We pride ourselves on our industry-leading standards of customer care. Our worldwide after sale staffs will provide the most considerate after-sale service for you in twenty four hours a day, seven days a week, that is to say, no matter you are or whenever it is, as long as you have any question about our NetSec-Pro Exam Torrent or about the exam or even about the related certification，you can feel free to contact our after sale service staffs who will always waiting for you on the internet.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	• Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 2	• Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.

Topic 3	• Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

Reliable NetSec-Pro Dumps - Valid NetSec-Pro Test Pdf

Once our professionals find the relevent knowledge on the NetSec-Pro exam questions, then the whole research groups will pick out the knowledge points according to the test syllabus. Also, they will also compile some questions about the NetSec-Pro practice materials in terms of their experience. Now, we have successfully summarized all knowledge points in line with the NetSec-Pro outline. And meanwhile, we keep a close eye on the changes of the exam to make sure what you buy are the latest and valid.

Palo Alto Networks Network Security Professional Sample Questions (Q19-Q24):

NEW QUESTION # 19
Which two components of a Security policy, when configured, allow third-party contractors access to internal applications outside business hours? (Choose two.)

- A. User-ID
- B. App-ID
- C. Schedule
- D. Service

Answer: A,C

Explanation:
To allow third-party contractors controlled access, security policies must combine user identification and time- based access controls:
User-ID
"User-ID enables security policies to be based on user identity rather than IP addresses, ensuring precise policy enforcement for specific users such as contractors." (Source: User-ID Overview) Schedule
"Schedules allow policies to be active only during specific times, providing time-based access control (e.g., after business hours)."
(Source: Security Policy Schedules) Together, they ensure that only authorized users (contractors) have access, and only when explicitly allowed.

NEW QUESTION # 20
In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- A. Prisma Cloud dashboard
- B. Strata Logging Service
- C. Service connection firewall
- D. Strata Cloud Manager (SCM)

Answer: B,D

Explanation:
Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service.
Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.
"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

NEW QUESTION # 21
An NGFW administrator is updating PAN-OS on company data center firewalls managed by Panorama. Prior to installing the update, what must the administrator verify to ensure the devices will continue to be supported by Panorama?

- A. Panorama is configured as the primary device in the log collecting group for the data center firewalls.
- B. Panorama is running the same or newer PAN-OS release as the one being installed.
- C. All devices are in the same template stack.
- D. Device telemetry is enabled.

Answer: B

Explanation:
The firewall must be running a PAN-OS version that is supported by Panorama. This means thatPanorama must be running the same or a newer PAN-OS versionas the one being installed on the firewalls to maintain compatibility.
"Before you upgrade the firewall, ensure that Panorama is running the same or a later PAN-OS version than the firewall. Panorama must always be at the same or a higher version to maintain compatibility." (Source: Panorama Admin Guide - Upgrade Process)

NEW QUESTION # 22
During a security incident investigation, which Security profile will have logs of attempted confidential data exfiltration?

- A. Enterprise DLP Profile
- B. File Blocking Profile
- C. Vulnerability Protection Profile
- D. WildFire Analysis Profile

Answer: A

Explanation:
Enterprise DLP Profileis specifically designed to detect and logdata exfiltration attempts, including those involving confidential or sensitive data.
"Enterprise DLP logs capture incidents involving potential data exfiltration. They help identify sensitive data transfers, even in seemingly legitimate traffic." (Source: Enterprise DLP Logging and Alerts) File Blocking and Vulnerability Protection handle files or exploit detection, while WildFire focuses on malware analysis-not direct data exfiltration.

NEW QUESTION # 23
How does a firewall behave when SSL Inbound Inspection is enabled?

- A. It acts as meddler-in-the-middle between the client and the internal server.
- B. It decrypts inbound and outbound SSH connections.
- C. It decrypts traffic between the client and the external server.
- D. It acts transparently between the client and the internal server.

Answer: A

Explanation:
SSL Inbound Inspectionallows the firewall to decrypt incoming encrypted traffic to internal servers (e.g., web servers) by acting as aman-in-the-middle (MITM). The firewall uses the private key of the server to decrypt the session and apply security policies before re-encrypting the traffic.
"SSL Inbound Inspection requires you to import the server's private key and certificate into the firewall. The firewall then acts as a man-in-the-middle (MITM) to decrypt inbound sessions from external clients to internal servers for inspection." (Source: SSL Inbound Inspection)

NEW QUESTION # 24
......

Using an updated Palo Alto Networks Network Security Professional (NetSec-Pro) exam dumps is necessary to get success on the first attempt. So, it is very important to choose a Palo Alto Networks NetSec-Pro exam prep material that helps you to practice

actual Palo Alto Networks NetSec-Pro Questions. ActualTestsQuiz provides you with that product which not only helps you to memorize real Palo Alto Networks NetSec-Pro questions but also allows you to practice your learning.
