We strongly recommend using our Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) exam dumps to prepare for the Google Professional-Cloud-Security-Engineer certification. It is the best way to ensure success. With our Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) practice questions, you can get the most out of your studying and maximize your chances of passing your Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) exam.

Exam Details

The Google Professional Cloud Security Engineer exam has a length of 2 hours. It costs \$200 plus additional taxes where applicable. At the moment, this test is only available in the English language, and questions in it come in multiple-choice and multiple select formats. When scheduling the exam, you can either opt for the online proctored option and take it from a remote location or select the onsite proctored form if you have a nearby testing center. Of course, pricing remains the same regardless of the chosen option.

While Google does not highlight any mandatory requirements for taking this test, they strongly recommend that candidates should have at least 3 years of working experience, with a minimum of one year specifically dedicated to designing or managing solutions using GCP. Also, the applicants should have a good understanding of all the topics included in the syllabus.

Preparing for the Google Professional-Cloud-Security-Engineer Exam requires dedicated study time, practice tests, and hands-on experience working with Google Cloud Platform. Candidates can benefit from a comprehensive understanding of Google Cloud Platform, as well as familiarity with other cloud platforms and security frameworks. Google offers training resources and certification preparation guides to help candidates prepare for the exam, including on-demand courses, instructor-led training, and certification preparation workshops.

The study material has been made and updated after consulting with a lot of professionals and getting customers' reviews.

Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q220-Q225):

NEW QUESTION # 220

You want to make sure that your organization's Cloud Storage buckets cannot have data publicly available to the internet. You want to enforce this across all Cloud Storage buckets. What should you do?

- A. Remove Owner roles from end users, and configure Cloud Data Loss Prevention.
- B. Remove*.setIamPolicypermissions from all roles, and enforce domain restricted sharing in an organization policy.
- **C. Configure uniform bucket-level access, and enforce domain restricted sharing in an organization policy.**
- D. Remove Owner roles from end users, and enforce domain restricted sharing in an organization policy.

Answer: C

Explanation:

Explanation

- Uniform bucket-level

access:<https://cloud.google.com/storage/docs/uniform-bucket-level-access#should-you-use>

- Domain Restricted

Sharinghttps://cloud.google.com/resource-manager/docs/organization-policy/restricting-domains#public_data_s

NEW QUESTION # 221

Your company conducts clinical trials and needs to analyze the results of a recent study that are stored in BigQuery. The interval when the medicine was taken contains start and stop dates. The interval data is critical to the analysis, but specific dates may identify a particular batch and introduce bias. You need to obfuscate the start and end dates for each row and preserve the interval data. What should you do?

- **A. Use bucketing to shift values to a predetermined date based on the initial value.**
- B. Extract the date using TimePartConfig from each date field and append a random month and year
- C. Use date shifting with the context set to the unique ID of the test subject
- D. Use the FFX mode of format preserving encryption (FPE) and maintain data consistency

Answer: A

Explanation:

"Date shifting techniques randomly shift a set of dates but preserve the sequence and duration of a period of time. Shifting dates is usually done in context to an individual or an entity. That is, each individual's dates are shifted by an amount of time that is unique to that individual."

NEW QUESTION # 222

You are the security admin of your company. You have 3,000 objects in your Cloud Storage bucket. You do not want to manage access to each object individually. You also do not want the uploader of an object to always have full control of the object. However, you want to use Cloud Audit Logs to manage access to your bucket. What should you do?

- A. Set up an ACL with OWNER permission to a scope of allUsers.
- B. Set up a default bucket ACL and manage access for users using IAM.
- **C. Set up Uniform bucket-level access on the Cloud Storage bucket and manage access for users using IAM.**
- D. Set up an ACL with READER permission to a scope of allUsers.

Answer: C

Explanation:

NEW QUESTION # 223

A customer's internal security team must manage its own encryption keys for encrypting data on Cloud Storage and decides to use customer-supplied encryption keys (CSEK).

How should the team complete this task?

- A. Use the gsutil command line tool to upload the object to Cloud Storage, and specify the location of the encryption key.
- B. Generate an encryption key in the Google Cloud Platform Console, and upload an object to Cloud Storage using the specified key.
- C. Upload the encryption key to a Cloud Storage bucket, and then upload the object to the same bucket.
- D. **Encrypt the object, then use the gsutil command line tool or the Google Cloud Platform Console to upload the object to Cloud Storage.**

Answer: D

Explanation:

NEW QUESTION # 224

Your organization wants to be compliant with the General Data Protection Regulation (GDPR) on Google Cloud. You must implement data residency and operational sovereignty in the EU.

What should you do?

Choose 2 answers

- A. **Limit Google personnel access based on predefined attributes such as their citizenship or geographic location by using Key Access Justifications**
- B. **Limit the physical location of a new resource with the Organization Policy Service resource locations constraint."**
- C. Use identity federation to limit access to Google Cloud resources from non-EU entities.
- D. Use VPC Flow Logs to monitor intra-VPC and inter-VPC traffic in the EU.
- E. Use Cloud IDS to get east-west and north-south traffic visibility in the EU to monitor intra-VPC and inter-VPC communication.

Answer: A,B

Explanation:

https://cloud.google.com/architecture/framework/security/data-residency-sovereignty#manage_your_operational_sovereignty

NEW QUESTION # 225
