Salesforce Certified Advanced Administrator certification is highly respected in the industry and can help professionals advance their careers. If you are a Salesforce Administrator looking to take your skills to the next level, the Salesforce Advanced-Administrator Certification Exam is definitely worth considering.

Salesforce Certified Advanced Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object.

What should the administrator consider about the order of execution for flows?

- A. The last created date of the flow will determine the order.
- B. The flows will execute in alphabetical order based on their names.
- C. The flow type will determine the order of execution.
- **D. The order of flow execution is unpredictable.**

Answer: D

Explanation:

The order of execution for flows that are configured to run before the record is saved on the same object is unpredictable and may vary depending on factors such as flow version, flow name, or flow creation date.

Therefore, it is recommended to avoid creating multiple flows with the same trigger conditions and instead consolidate them into a single flow.

NEW QUESTION # 42

The administrator at AW Computing has received an email for a system error indicating that their organization has reached its hourly limit processing workflow time triggers.

Which two processes should the administrator review? Choose 2 answers

- **A. Debug Logs**
- B. Paused now Interviews
- C. Apex Triggers
- **D. Time-Based Workflows**

Answer: A,D

NEW QUESTION # 43

Universal Containers has a workflow rule that sends an email alert to the VP of Sales when a large deal is won. The VP is reporting that these emails are not being delivered. What tool could be used to determine the problem? Choose 2 answers

- A. Debug log
- B. Email log
- C. Workflow monitor
- **D. System audit trail**

Answer: D

NEW QUESTION # 44

Ursa Major Solar customer records have a lot of fields and Lightning components to give users a variety of information and available functions. Recently, users have noted that their pages take a long time to load and it's starting to negatively impact their experience.

What should the administrator do to help diagnose where improvements can be made?

- A. Check the debug logs found in the Environment section of Setup.
- B. Review the debug logs from the Developer Console.
- **C. Click Analyze from the Lightning App Builder toolbar.**
- D. Use the Apex debugger while loading a customer record.

Answer: C

Explanation:

The Analyze feature in the Lightning App Builder toolbar is a tool that helps you optimize the performance of your record pages by providing recommendations and insights on how to improve page load time and user experience. It can help you identify which fields and components are taking the most time to load and suggest ways to reduce their impact. You can also compare your page performance with other pages in your org or with Salesforce best practices. References:

NEW QUESTION # 45

An administrator is informed that an employee has just resigned and needs all access removed immediately. This user is the owner of 4,000 records and the sole recipient of 57 email alerts. Management will need at least a month to find a replacement. The email administrator has already revoked their email access.

What action should be taken to ensure the user's access is immediately revoked?

- A. Go into the user record and set the login hours to None.
- B. Go into the user record and uncheck the Lightning User checkbox.
- C. Go into the user record and delete the user.
- **D. Go into the user record and freeze the user.**

Answer: D
