

FCSS_SDW_AR-7.6 Pass Dumps & PassGuide

FCSS_SDW_AR-7.6 Prüfung & FCSS_SDW_AR-7.6 Guide

Außerdem sind jetzt einige Teile dieser EchteFrage FCSS_SDW_AR-7.6 Prüfungsfragen kostenlos erhältlich:
<https://drive.google.com/open?id=1YWNzdN2TGTpKOV7MW5nFP63Uo5fm00ob>

EchteFrage verspricht den Kunden, dass Sie die Fortinet FCSS_SDW_AR-7.6 IT-Zertifizierungsprüfung 100% bestehen können. Die Qualität von EchteFrage wird nach den IT-Experten überprüft. Das wichtigste Merkmal unserer Produkte ist ihre Relevanz. Der Schulungskurs dauert nur 20 Stunden. Und Sie werden die Fortinet FCSS_SDW_AR-7.6 Zertifizierungsprüfung dann mühelos bestehen. Wenn Sie EchteFrage wählen, werden Sie dann sicher nicht bereuen. Denn es wird Ihnen Erfolg bringen.

Fortinet FCSS_SDW_AR-7.6 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">SD-WAN Troubleshooting: This domain focuses on diagnosing SD-WAN rule behavior, routing issues, and ADVPN tunnel problems.
Thema 2	<ul style="list-style-type: none">SD-WAN Basic Setup: This domain covers initial SD-WAN configuration, member and zone setup, and Performance SLA creation for link monitoring.
Thema 3	<ul style="list-style-type: none">Rules and Routing: This section focuses on configuring SD-WAN rules for traffic steering and routing policies for path selection and failover.
Thema 4	<ul style="list-style-type: none">Centralized Management: This domain addresses FortiManager-based SD-WAN deployment, branch configuration implementation, and overlay orchestration using SD-WAN Manager.
Thema 5	<ul style="list-style-type: none">Advanced IPsec: This section covers hub-and-spoke topologies, ADVPN configuration, and scalable multihub and multiregion IPsec deployments.

FCSS_SDW_AR-7.6 Fragen Antworten, FCSS_SDW_AR-7.6 Musterprüfungsfragen

Wenn Sie sich noch anstrengend um die FCSS_SDW_AR-7.6 Zertifizierungsprüfung bemühen, dann kann EchteFrage in diesem Moment Ihnen helfen, Problem zu lösen. EchteFrage bietet Ihnen Schulungsunterlagen von hoher Qualität, damit Sie die Prüfung bestehen und exzellentes Mitglied der Fortinet FCSS_SDW_AR-7.6 Zertifizierung werden können. Wenn Sie sich entscheiden, durch die Fortinet FCSS_SDW_AR-7.6 Zertifizierungsprüfung sich zu verbessern, dann wählen Sie bitte EchteFrage. EchteFrage zu wählen ist keinesfalls nicht falsch. Unser EchteFrage verspricht, dass Sie beim ersten Versuch die Fortinet FCSS_SDW_AR-7.6 Zertifizierungsprüfung bestehen und somit das Zertifikat bekommen können. So können Sie sich sicher verbessern.

Fortinet FCSS - SD-WAN 7.6 Architect FCSS_SDW_AR-7.6 Prüfungsfragen mit Lösungen (Q60-Q65):

60. Frage

(When you deploy SD-WAN, you can choose from several common designs. Each design best applies to specific contexts. Which two statements correctly associate a common SD-WAN design with its main indication or constraint? Choose two answers.)

- A. Use a standalone design for sites with only one WAN link to the cloud.
- **B. Use a cloud on-ramp topology to improve the performance of cloud applications.**
- C. Use a direct internet access (DIA) design to increase the traffic security and allow local devices with limited capabilities.
- **D. Use remote breakout to centralize traffic inspection and limit local management requirements.**

Antwort: B,D

Begründung:

The FCSS SD-WAN 7.6 curriculum describes multiple standard SD-WAN deployment designs, each mapped to a specific operational goal or constraint.

A cloud on-ramp topology is designed to optimize connectivity to cloud services such as SaaS and IaaS. This design provides the most efficient and reliable path to cloud applications by establishing direct tunnels to cloud gateways or cloud workloads and by avoiding backhauling traffic through a central data center. As a result, its primary indication is improving the performance of cloud applications, which makes option A correct.

A remote breakout (centralized breakout) design forwards all internet-bound traffic from branch sites to a central hub for security inspection. This allows security policies, inspection, and logging to be centralized on a high-capacity FortiGate at the hub. Because branch devices do not need advanced local security configurations, this design also limits local management requirements, which makes option C correct.

Option B is incorrect because a standalone SD-WAN design is not selected simply because a site has only one WAN link. SD-WAN provides its main benefits when multiple WAN paths exist, and single-link sites do not gain meaningful traffic-steering advantages.

Option D is incorrect because a direct internet access (DIA) design performs local internet breakout at the branch and therefore requires strong local security capabilities. DIA does not inherently increase traffic security and is not intended for devices with limited capabilities.

Therefore, the two correct associations are A and C.

61. Frage

Refer to the exhibits.

☐

The exhibits show an SD-WAN event log, the member status, and the SD-WAN rule configuration.

Which two conclusions can you draw from the information shown? (Choose two.)

- **A. FortiGate updated the outgoing interface list on the rule so it prefers port2.**
- B. The administrator configured the SD-WAN rule ID 1 with the default strategy mode.
- **C. Port2 has a lower latency than port1.**
- D. The administrator configured the service ID 1 with the highest priority member for port2.

Antwort: A,C

Begründung:

The SD-WAN rule (config service edit 1) is configured with set mode priority. This means the rule selects the best interface based on a defined performance metric, as opposed to a simple static priority or SLA. The event log (image_41cfb5.png) shows Metric latency and Message Service prioritized by performance metric will be redirected in sequence order. This indicates that the rule is using latency to determine the preferred member. Given that the log message is about a change, and the most logical reason for a change in a priority mode is that a different member is now the best performer, it implies that the latency on port2 has become lower than that on port1.

The log message Service prioritized by performance metric will be redirected in sequence order confirms that FortiGate is changing the member being used for this service. Because the mode is priority, FortiGate dynamically selects the member that currently meets the best performance criteria, which in this case is latency. The log implies a new member has been selected as the most optimal, and with the default configuration, the members are sorted based on their performance, so the outgoing interface list is effectively updated to prefer the new best-performing member (port2).

62. Frage

Refer to the exhibit.

The exhibit shows the details of a session and the index numbers of some relevant interfaces on a FortiGate device that supports hardware offloading.

Based on the information shown in the exhibits, which two conclusions can you draw? (Choose two.)

- A. The auxiliary session can be offloaded to hardware.
- B. The original direction of the symmetric traffic flows from port3 to port2.
- C. By default, FortiGate offloads symmetric and asymmetric flows.
- D. The reply direction of the asymmetric traffic flows from port2 to port3.

Antwort: B,D

Begründung:

The session details show the symmetric flow's original direction as port3 → port2.

The asymmetric flow's reply direction is listed as port2 → port3.

63. Frage

Refer to the exhibit. For your ZTP deployment, you review the CSV file shown in exhibit and note that it is missing important information. Which two elements must you change before you can import it into FortiManager? (Choose two.)

- A. You must define a value for each device and each metadata variable that defines an IP address.
- B. You must associate a device blueprint with each device
- C. You must define a name for each device
- D. You must define a value for each device and each user-defined metadata variable.

Antwort: B,C

Begründung:

64. Frage

(Which two features must you configure before FortiGate can steer traffic according to SD-WAN rules? Choose two answers.)

- A. Firewall policies
- B. Overlay links
- C. Traffic shaping
- D. Security profiles
- E. Underlay links

Antwort: A,E

Begründung:

For FortiGate to steer traffic using SD-WAN rules, two foundational elements must be in place: available WAN paths (underlay links) and firewall policies that allow traffic to reach the SD-WAN interface.

Underlay links (Option B) are mandatory because SD-WAN operates by selecting among multiple WAN transports (for example, broadband, MPLS, LTE, or IPsec tunnels). These links are configured as SD-WAN members and form the physical or logical paths over which traffic can be steered. Without underlay links, SD-WAN has no paths to evaluate or select.

Firewall policies (Option E) are also mandatory because FortiGate only processes and forwards traffic that is explicitly permitted by a firewall policy. When SD-WAN is enabled, firewall policies must reference the SD-WAN interface or SD-WAN zone as the outgoing interface. If no such policy exists, traffic will not be forwarded and SD-WAN rules will never be evaluated.

Why the other options are incorrect:

Security profiles (Option A) are optional and relate to inspection, not SD-WAN steering.

Overlay links (Option C) are used in specific designs such as ADVPN or hub-and-spoke overlays, but SD-WAN can steer traffic without overlays (for example, DIA-only designs).

Traffic shaping (Option D) is not required for SD-WAN decision-making; it is an optional optimization feature.

Therefore, the two required features that must be configured before FortiGate can steer traffic according to SD-WAN rules are underlay links and firewall policies, which correspond to B and E.

65. Frage

.....

Um unsere EchteFrage eine der zuverlässigen Marken im Gebiet der IT zu werden, bieten wir Sie die vollständigsten und die neusten Prüfungsaufgaben der Fortinet FCSS_SDW_AR-7.6. Mit Hilfe unserer Software bestanden fast alle Käufer Fortinet FCSS_SDW_AR-7.6, die als eine sehr schwere Prüfung gilt, mit Erfolg. Deshalb haben wir Konfidenz, Ihnen unseren Produkten zu empfehlen. Wir können noch garantieren, falls Sie die Fortinet FCSS_SDW_AR-7.6 mit Hilfe unserer Software noch nicht bestehen, geben wir Ihnen die volle Gebühren zurück. Alles in allem hoffen wir, dass Sie sich beruhigt vorbereiten.
