Answer: B

NEW QUESTION # 167

A developer customized the Cart-Show controller route with a LINK cartridge that adds social media data. There is a new requirement to add a datalayer object to the Cart-Show controller route.

How should the developer achieve this to ensure that no code change will be needed if the client decides to remove the LINK cartridge?

- A. Replace the Cart-Show controller route in client cartridge and add datalayer object to the viewData variable. Ensure that the client cartridge is on the left of the U.HK cartridge in cartridge path.
- B. Replace the Cart-Show controller route in client cartridge and add datalayer object to the viewData variable.
- **C. Append Cart-Show controller route in the client cartridge and add datalayer object to the viewData variable.**

Answer: C

NEW QUESTION # 168

A client sells its product in single-brand stores as well as in multi-brand stores. When shown in the store locator list, the client wants the single-brand stores to have a particular background color to highlight them.

Which Business Manager action should be completed to allow the developer to apply different styling to the single-brand stores?

- A. Adjust the relevant Site Preference in the Stores group
- **B. Create a new SingleBrandStore custom object configuration.**
- C. Add a Boolean custom attribute to the Store system object
- D. Configure the existing Store custom object type definition

Answer: B

NEW QUESTION # 169

Universal Containers wants to add a model field to each product. Products will have locale-specific model values.

How should the Digital Developer implement the requirement?

- **A. Store translated model values in different fields; one field for each locale.**
- B. Set the model field as a localizable attribute.
- C. Add model to a new custom object with localizable attributes.
- D. Utilize resource bundles for translatable values.

Answer: A

NEW QUESTION # 170

A Digital Developer has detected storefront pages being rendered with an error message. After inspecting the log files, the Developer discovered that an enforced quota is being exceeded.

What action should the Developer take to stop the quota violation?

- A. Take no action, the overage will be resolved when concurrent visitors are reduced.
- B. Rewrite the code that is causing the overage.
- **C. Change the Business Manager configuration for the quota settings.**
- D. Ask support to remove the quota limit.

Answer: C

NEW QUESTION # 171

.....
