EC-COUNCIL 312-39 PDF Format for Easy Access

If you are not satisfied with the function of PDF version which just only provide you the questions and answers, the APP version of 312-39 exam cram materials can offer you more. APP version can not only simulate the real test scene but also point out your mistakes and notice you to practice many times. This version of EC-COUNCIL 312-39 Exam Cram materials is rather powerful. If you are willing, you can mark your performance every day and adjust your studying and preparation relatively. 312-39 exam cram

materials will try our best to satisfy your demand.

EC-COUNCIL Certified SOC Analyst (CSA) Sample Questions (Q85-Q90):

NEW QUESTION # 85

Which of the following attack can be eradicated by converting all non-alphanumeric characters to HTML character entities before displaying the user input in search engines and forums?

- A. XSS Attacks
- B. Session Management Attacks
- C. Web Services Attacks
- D. Broken Access Control Attacks

Answer: A

NEW QUESTION # 86

Which of the following service provides phishing protection and content filtering to manage the Internet experience on and off your network with the acceptable use or compliance policies?

- A. Apility.io
- B. OpenDNS
- C. I-Blocklist
- D. Malstrom

Answer: B

Explanation:

OpenDNS provides extensive phishing protection and content filtering services. It operates by enforcing internet use policies on and off the network, ensuring that users adhere to acceptable use and compliance policies. Here's how OpenDNS achieves this:

* Phishing Protection: OpenDNS uses predictive security to anticipate and prevent threats before they can reach the network. It does this by using DNS to enforce security, which is often quicker and more effective than traditional methods.

* Content Filtering: OpenDNS allows the network administrator to block unwanted content categories, thus enforcing compliance with organizational policies. This is done through DNS queries, which are checked against OpenDNS's database to ensure they comply with the set policies.

* Off-Network Protection: OpenDNS's roaming client allows the same level of protection and filtering even when devices are not connected to the company network, ensuring consistent enforcement of policies.

References:

* EC-Council's Certified SOC Analyst (C|SA) program provides training and certification for SOC analysts, covering the fundamentals of SOC operations, including phishing protection and content filtering 1.

* Additional resources and study guides from the EC-Council elaborate on the role of SOC analysts and the tools they use, including services like OpenDNS for maintaining network security and integrity 23.

NEW QUESTION # 87

Which of the following Windows Event Id will help you monitors file sharing across the network?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

NEW QUESTION # 88

Which encoding replaces unusual ASCII characters with "%" followed by the character's two-digit ASCII code expressed in hexadecimal?

- A. Base64 Encoding

- B. Unicode Encoding
- C. UTF Encoding
- **D. URL Encoding**

Answer: D

Explanation:

URL encoding, also known as percent-encoding, is a mechanism for encoding information in a Uniform Resource Identifier (URI) under certain circumstances. When characters are not allowed in a URI, they are replaced with a percent sign (%) followed by two hexadecimal digits that represent the ASCII code of the character. For example, a space character is not allowed in a URI and is replaced with %20.

References: The answer is verified as per the EC-Council's Certified SOC Analyst (CSA) course materials and study guides, which discuss various encoding schemes used in cybersecurity practices. URL encoding is specifically mentioned as the method for replacing unusual ASCII characters with a percent sign followed by two hexadecimal digits.

NEW QUESTION # 89

Which of the following threat intelligence helps cyber security professionals such as security operations managers, network operations center and incident responders to understand how the adversaries are expected to perform the attack on the organization, and the technical capabilities and goals of the attackers along with the attack vectors?

- A. Analytical Threat Intelligence
- B. Strategic Threat Intelligence
- **C. Tactical Threat Intelligence**
- D. Operational Threat Intelligence

Answer: C

NEW QUESTION # 90

.....

You can use this 312-39 simulation software without an internet connection after installation. Tracking and reporting features of our EC-COUNCIL 312-39 practice exam software makes it easier for you to identify and overcome mistakes. Customization feature of this format allows you to change time limits and questions numbers of mock exams.
