

C-CPI-2506 New Braindumps Files, Latest C-CPI-2506 Dumps Ebook

What's more, part of that Exam4Free C-CPI-2506 dumps now are free: https://drive.google.com/open?id=1r_FYxaPW6TDBRo6o24myy4ComOYt59qS

The study material is available in three easy-to-access formats. The first one is PDF format which is printable and portable. You can access it anywhere with your smart devices like smartphones, tablets, and laptops. In addition, you can even print PDF questions in order to study anywhere and pass SAP Certified Associate - Integration Developer (C-CPI-2506) certification exam.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 2	<ul style="list-style-type: none">• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 3	<ul style="list-style-type: none">• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 4	<ul style="list-style-type: none">• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

Latest C-CPI-2506 Dumps Ebook, C-CPI-2506 Valid Dumps Ppt

The internet is transforming society, and distance is no longer an obstacle. You can download our C-CPI-2506 exam simulation from our official website, which is a professional platform providing the most professional C-CPI-2506 practice materials. You can get them within 15 minutes without waiting. What is more, you may think these high quality C-CPI-2506 Preparation materials require a huge investment on them. Actually we eliminate the barriers blocking you from our C-CPI-2506 practice materials. The price of our C-CPI-2506 exam question is quite favourable for you to buy.

SAP Certified Associate - Integration Developer Sample Questions (Q48-Q53):

NEW QUESTION # 48

You configured a content modifier as follows: Action: Create | Name: ProductID | Source Type: XPath Source Value: //ProductID | Data Type: java.lang.string. After testing the content modifier, you receive an error message that contains the following fragment: "Java.lang.ClassNotFoundException: java.lang.string..." What caused the error message?

- A. Incorrect data type
- B. Incorrect name
- C. Incorrect source value
- D. Incorrect source type

Answer: A

Explanation:

In SAP Cloud Integration, when defining Content Modifier properties, the Java data type names are case- sensitive.

Correct type # java.lang.String

In the configuration, java.lang.string was used (lowercase "s"), which causes a ClassNotFoundException, since Java cannot find the class.

Other options are correct in form:

Source Type = XPath # Valid.

Source Value = //ProductID # Valid XPath.

Name = ProductID # Valid.

Thus, the error occurred because of incorrect data type specification.

NEW QUESTION # 49

Which Sap platform serves as the foundation for SAP' s integration strategy?

- A. SAP Business Technology Platform (SAP BTP).
- B. SAP Cloud Platform Integration (CPI) serves as the foundation for SAP' s integration strategy.
- C. SAP Netweaver Process Integration (PI) serves as the foundation for SAP' s integration strategy.
- D. SAP S/4HANA serves as the foundation for SAP' s integration strategy.

Answer: A

Explanation:

SAP's integration strategy is founded on the SAP Business Technology Platform (BTP), which provides:

Integration Suite as the strategic iPaaS for process, data, API, and event-driven integration.

Extension Suite for app extensions.

Database & Data Management for unified data access.

Analytics & AI capabilities.

Other options:

SAP CPI # Now part of Integration Suite, not the overall foundation.

SAP S/4HANA # The digital core ERP, but not the integration platform.

SAP NetWeaver PI/PO # Legacy middleware, replaced strategically by Integration Suite on BTP.

Thus, the foundation of SAP's integration strategy is SAP BTP.

NEW QUESTION # 50

What do you use in an integration flow to handle unexpected errors?

- A. Try-catch subprocesses
- B. Exception handler integration flow elements
- C. Status code checks
- D. Exception-handling subprocesses

Answer: D

Explanation:

In SAP Cloud Integration (part of Integration Suite), error handling within integration flows is implemented using:

Exception Subprocesses # Dedicated subprocesses triggered by an Error Start Event to handle unexpected runtime exceptions.

These allow logging, error notifications, or compensating logic.

Other options:

Try-Catch subprocesses # Not a modeling construct in SAP CPI.

Exception handler integration flow elements # Not a standard artifact; error handling is done with exception subprocesses.

Status code checks # Useful for response validation but not full error handling.

Thus, the correct answer is Exception-handling subprocesses.

NEW QUESTION # 51

Which combination of SAP BTP role collections allows a user to manage queues and topic subscriptions in SAP Event Mesh, and monitor its usage and resources?

- A. SecurityAdmin and SecurityDevelop
- B. EventMeshAdmin and EventMeshDevelop
- C. ApplicationAdmin and ApplicationDevelop
- D. IntegrationAdmin and IntegrationDevelop

Answer: B

Explanation:

In SAP BTP, SAP Event Mesh provides messaging capabilities (queues, topics, and subscriptions) that require specific role collections to enable developers and administrators to perform tasks. SAP delivers two dedicated role collections for Event Mesh:

EventMeshDeveloper:

Manages queues and topic subscriptions

Monitors Event Mesh and its queues

Performs testing of queues and message flows

EventMeshAdmin:

Includes all developer capabilities

Provides additional administration rights for lifecycle management of Event Mesh instances and configurations When a user is assigned these role collections, they gain the ability to:

Create and manage queues and topic subscriptions.

Monitor usage and resources such as queue depth, consumers, connections, and spool size within Event Mesh.

Other provided options are incorrect:

ApplicationAdmin/ApplicationDevelop # These are not SAP Event Mesh role collections, they do not provide queue or topic subscription access.

SecurityAdmin/SecurityDevelop # These roles are tied to security configurations and do not allow Event Mesh operations.

IntegrationAdmin/IntegrationDevelop # These roles belong to SAP Integration Suite (Cloud Integration) capability, not Event Mesh. Therefore, the correct and verified answer according to SAP Integration Developer documentation is:

B). EventMeshAdmin and EventMeshDevelop

NEW QUESTION # 52

You want to set up Exchange Properties in an integration flow. Besides a Content Modifier, what can you use?

- A. XML scripting
- B. Batch scripting
- C. Groovy SDK scripting
- D. Python scripting

Answer: C

Explanation:

The Groovy SDK scripting can be used to set up Exchange Properties in an integration flow. The Groovy SDK scripting allows you to access and manipulate message headers, properties, and payloads using Groovy scripts. You can use the `setProperty` method to set an Exchange Property with a name and a value. Reference: [Modernize Integration with SAP Integration Suite | openSAP](#)

NEW QUESTION # 53
