

# H35-211\_V2.5 Certification Dumps - H35-211\_V2.5 Valid Test Testking

BTW, DOWNLOAD part of Real4Prep H35-211\_V2.5 dumps from Cloud Storage: [https://drive.google.com/open?id=1dXwNmSjCl\\_k3llb35D9HfMy9FIN-c3e](https://drive.google.com/open?id=1dXwNmSjCl_k3llb35D9HfMy9FIN-c3e)

Why our H35-211\_V2.5 exam questions are the most popular in this field? On the one hand, according to the statistics from the feedback of all of our customers, the pass rate among our customers who prepared for the H35-211\_V2.5 exam with the help of our H35-211\_V2.5 guide torrent has reached as high as 98% to 100%. On the other hand, the simulation test is available in our software version of our H35-211\_V2.5 Exam Questions, which is useful for you to get accustomed to the H35-211\_V2.5 exam atmosphere. Please believe us that our H35-211\_V2.5 torrent question is the best choice for you.

Huawei H35-211\_V2.5 Exam is intended for IT professionals who have experience in network access technologies and wish to advance their careers in this field. H35-211\_V2.5 exam is recommended for network engineers, network administrators, and IT managers who work with Huawei network access technologies. HCIP-Access V2.5 certification obtained from H35-211\_V2.5 exam is recognized globally and validates the candidate's expertise in Huawei network access technologies.

Huawei H35-211\_V2.5 exam is aimed at professionals who work in the field of network access technologies, including network administrators, network engineers, and network security professionals. H35-211\_V2.5 exam is designed to test a candidate's proficiency in using Huawei's access network products, including routers, switches, WLAN equipment, and access control systems. Candidates who pass the exam will be able to effectively design, deploy, and manage network access solutions using Huawei technologies.

Huawei H35-211\_V2.5 Exam is an intermediate-level certification exam, and it is recommended for candidates who have some experience in access network technologies. H35-211\_V2.5 exam consists of 60 questions, and the candidate has 90 minutes to complete it. H35-211\_V2.5 exam is available in English and Chinese languages, and the passing score is 60%. H35-211\_V2.5 exam is conducted online, and the candidate can take it from anywhere in the world.

## Huawei H35-211\_V2.5 Valid Test Testking - H35-211\_V2.5 Free Test Questions

There are more opportunities for possessing with a certification, and our H35-211\_V2.5 study tool is the greatest resource to get a leg up on your competition, and stage yourself for promotion. When it comes to our time-tested H35-211\_V2.5 latest practice dumps, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our H35-211\_V2.5 Exam Guide, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our H35-211\_V2.5 study tool has the ability to catch the core knowledge. So our customers can pass the exam with ease.

## Huawei HCIP-Access V2.5 Sample Questions (Q56-Q61):

NEW QUESTION # 56

When ont fails or the hardware needs to be replaced, the ONT service needs to be replaced, and then the ONT service needs to be removed on the OLT, and then the new ONT service needs to be registered

- A. wrong
- B. Right

**Answer: A**

#### NEW QUESTION # 57

The total downstream bandwidth of the 10G EPON PON1 port is the sum of the EPON downstream bandwidth and the 10G EPON downstream bandwidth.

- A. False
- B. True

**Answer: A**

Explanation:

According to Huawei HCIP-Access V2.5 learning materials and official Huawei Access Network product documentation, a 10G EPON PON1 port supports both EPON (1.25 Gbit/s) and 10G EPON (10 Gbit/s) transmission modes.

These two modes are not combined - they operate on different wavelengths and serve different types of Optical Network Units (ONUs):

EPON uses a 1490 nm wavelength for downstream transmission with a rate of 1.25 Gbit/s.

10G EPON uses a 1577 nm wavelength for downstream transmission with a rate of 10 Gbit/s.

When an OLT (Optical Line Terminal) port supports dual-mode operation, it automatically adapts to the connected ONU type - but it does not aggregate the bandwidth of both technologies. Each ONU communicates using only one rate (either EPON or 10G EPON).

Therefore, the total downstream bandwidth is not the sum of both rates. It depends solely on the ONU's operational mode. Hence, the statement is False.

References (from HCIP-Access V2.5 and Huawei Technical Documents):

HCIP-Access V2.5 Study Guide - "Huawei Campus Network Overview" Chapter, Section: PON Technologies Overview  
Huawei Access Network 10G EPON Technology White Paper (Huawei Enterprise Documentation Center)  
Huawei MA5800/EA5800 Series OLT Product Description - "Dual-Mode EPON/10G EPON PON Ports"

#### NEW QUESTION # 58

(Multi-select) In U2000, adding a line template to map user traffic flows to GEM Ports supports which mapping modes?

- A. PORT
- B. 802.1p
- C. MAC
- D. VLAN

**Answer: A,B,C,D**

Explanation:

Huawei GPON service provisioning supports mapping upstream/downstream service flows to GEM Ports using multiple classifiers, including MAC address, physical port (PORT), VLAN ID, and 802.1p (priority).

These classifiers are configured in line/service templates (and pushed via U2000) to ensure precise flow-to-GEM binding.

References: HCIP-Access V2.5-GPON service provisioning via U2000 (GEM port mapping classifiers); Huawei OLT Service Configuration Guide (Line/Service templates and flow mapping).

#### NEW QUESTION # 59

Compared with Type C dual-homing protection, which of the following statements about Type C single-homing protection are correct?

- A. Protects important services such as enterprise and base station private line access services.
- B. If the OLT is faulty, services are interrupted.
- C. The networking is simple, and the OLT and ONU management is simple.

- D. When the OLT or uplink of the OLT is faulty, services can be switched to the other OLT.

**Answer: B,C**

Explanation:

Type C dual-homing provides device-level protection with two OLTs; when one OLT/uplink fails, services switch to the peer OLT. In single-homing, ONUs are associated with only one OLT; therefore an OLT failure interrupts services (C). Single-homing has simpler networking and management than dual-homing (D). It does not offer switchover to another OLT (so B is incorrect), and the "important-service" positioning in A is typically applied to dual-homing scenarios that require the highest availability.

References: HCIP-Access V2.5 - GPON Protection Types A/B/C and Application Scenarios; OLT Protection Configuration Guide - Single-homing vs. Dual-homing Characteristics.

### NEW QUESTION # 60

If the number of user ports configured in a service profile is different from that supported by an ONT, all user services on the ONT are unavailable.

- A. FALSE
- B. TRUE

**Answer: A**

Explanation:

A mismatch between the service-profile's user-port configuration and the ONT's actual port capacity does not disable all services. Ports beyond the ONT's capability remain inactive/unused, while valid ports with correct service bindings continue to work. Service availability depends on the consistency of applied profiles and actual hardware resources, not on a complete shutdown.

References: HCIP-Access V2.5 (ONT service-profile application principles and port/resource matching behavior).

### NEW QUESTION # 61

.....

Real4Prep is a reputable platform that has been providing valid, real, updated, and free HCIP-Access V2.5 H35-211\_V2.5 Exam Questions for many years. Real4Prep is now the customer's first choice and has the best reputation in the market. Huawei H35-211\_V2.5 Actual Dumps are created by experienced and certified professionals to provide you with everything you need to learn, prepare for, and pass the difficult Huawei H35-211\_V2.5 exam on your first try.
