## ISO-IEC-27001-Foundation Valid Test Questions & New Exam ISO-IEC-27001-Foundation Braindumps

In the past few years, ISO-IEC-27001-Foundation study materials have helped countless candidates pass the ISO-IEC-27001-Foundation exam. After having a ISO-IEC-27001-Foundation certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. ISO-IEC-27001-Foundation study materials have stood the test of time and market and received countless praises. Through the good reputation of word of mouth, more and more people choose to use ISO-IEC-27001-Foundation Study Materials to prepare for the ISO-IEC-27001-Foundation exam, which makes us very gratified. Please be assured that we will stand firmly by every warrior who will pass the exam. ISO-IEC-27001-Foundation study materials have the following characteristics:

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q10-Q15):

#### NEW QUESTION # 10

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Implementing the actions from internal audits
- B. Communicating feedback from interested parties to the organization
- C. Producing a risk assessment report
- D. Ensuring information security objectives are established

**Answer: D**

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

- \* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"
- \* "ensuring the integration of the ISMS requirements into the organization's processes;"
- \* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

#### NEW QUESTION # 11

Identify the missing word in the following sentence.

According to ISO/IEC 27000, the definition of risk [?] is a "process to comprehend the nature of risk and to determine the level of risk."

- A. Analysis
- B. Assessment
- C. Management
- D. Evaluation

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

ISO/IEC 27000 defines:

- \* Risk analysis: "process to comprehend the nature of risk and to determine the level of risk" (Clause 3.58).
- \* Risk assessment: the overall process of risk identification, risk analysis, and risk evaluation.
- \* Risk evaluation: compares results of risk analysis against risk criteria to determine priority.
- \* Risk management: coordinated activities to direct and control an organization with regard to risk.

Therefore, the missing word in the given definition is "analysis".

This is important for ISMS implementation: organizations must understand the distinctions. Risk analysis is the core technical evaluation stage, while assessment is the broader process including evaluation, and management refers to the overall governance of risks.

Thus, the correct verified answer is B: Analysis.

#### NEW QUESTION # 12

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will be operated as an independent process within the organization
- B. The ISMS will encompass all controls specified within ISO/IEC 27001
- C. The ISMS will be scaled to the controls according to the needs of the organization
- D. The ISMS will be separate from the organization's overall management structure

**Answer: C**

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

#### NEW QUESTION # 13

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- B. Personnel and the organization
- C. All employees, contractors and third-party users
- D. Employees only

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

#### NEW QUESTION # 14

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Regular review of compliance
- B. Return assets to their legal owners
- C. Regular review of contractual compliance
- D. Maintain contact with legal authorities

**Answer: A**

Thus, the correct answer is A.
