

# PL-600 New Braindumps Free & PL-600 Valid Dumps Files

P.S. Free 2026 Microsoft PL-600 dumps are available on Google Drive shared by PracticeTorrent: [https://drive.google.com/open?id=1f5dMjOUOT2v4Csu\\_yAcdo0EwPxLoxn3f](https://drive.google.com/open?id=1f5dMjOUOT2v4Csu_yAcdo0EwPxLoxn3f)

Perhaps you worry about that you have difficulty in understanding our PL-600 training questions. Frankly speaking, we have taken all your worries into account. Firstly, all knowledge of the PL-600 exam materials have been simplified a lot. Also, we have tested many volunteers who are common people. The results show that our PL-600 study braindumps are easy for them to understand. So you don't have to worry that at all and you will pass the exam for sure.

## Microsoft PL-600 Exam Syllabus Topics:

## PL-600 Valid Dumps Files, PL-600 VCE Exam Simulator

Passing the PL-600 exam is your best career opportunity. The rich experience with relevant certificates is important for enterprises to open up a series of professional vacancies for your choices. Our website's PL-600 learning quiz bank and learning materials look up the Latest PL-600 Questions and answers based on the topics you choose. This choice will serve as a breakthrough of your entire career, so prepared to be amazed by high quality and accuracy rate of our PL-600 study guide.

## Microsoft Power Platform Solution Architect Sample Questions (Q53-Q58):

### NEW QUESTION # 53

A company plans to create a Power Platform solution that integrates with Dynamics 365 Sales.

The solution must meet the following requirements:

Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

## Integration requirement

## Solutions

Have read-only visibility of data from an external Azure SQL database.

- Use virtual tables.
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

Answer:

Explanation:

## Integration requirement

## Solutions

Have read-only visibility of data from an external Azure SQL database.

- Use virtual tables.
- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

- Use a custom plug-in.
- Use Dynamics 365 Web API.
- Use a web resource to display data.

## NEW QUESTION # 54

A company uses Dynamics 365 Sales and Power BI.

Sales managers must be able to keep track of changes to their pipeline in the following ways:

- \* Notify the sales managers when an Opportunity changes sales stage.
- \* Notify the sales managers when the pipeline drops below 2.5M USD.
- \* When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

You need to recommend a solution that meets the company requirements.

Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Notify the sales manager when an Opportunity changes sales stage.

- Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
- Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users
- Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Notify the sales managers when the pipeline drops below 2.5 USD.

- Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
- Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector
- Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

- Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector
- Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users
- Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector
- Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

**Answer:**

**Explanation:**

|                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Explanation:**

|                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Notify the sales manager when an Opportunity changes sales stage.                                            | <div>Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector</div> <div>Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users</div> <div>Microsoft Power Automate, data alerts, and Microsoft Office 365 connector</div>                                                                                                       |
| Notify the sales managers when the pipeline drops below 2.5 USD.                                             | <div>Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector</div> <div>Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector</div> <div>Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector</div>                                                                                                    |
| When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity. | <div>Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector</div> <div>Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users</div> <div>Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector</div> <div>Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector</div> |

Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector Use Microsoft Dataverse as the data source.

While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.

Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.

Box 2: Microsoft Power Automate, Power BI data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.

Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector Reference:

<https://www.velosio.com/blog/2021/01/27/tracking-emails-the-right-way-with-power-automate/>

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts>

## NEW QUESTION # 55

You are designing a business strategy for a client who has a Power Platform solution.

The client works with critical data where any data loss creates a high risk.

You need to document the failover process for the stakeholders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions                                                                  | Answer Area |
|--------------------------------------------------------------------------|-------------|
| If the second call is successful, the application continues normally.    |             |
| The application makes a service call to the datacenter.                  |             |
| The application receives an exception after attempting the service call. |             |
| The application automatically tries the call again.                      |             |
| The application redirects calls to an on-premises server.                |             |

**Answer:**

Explanation:

**Answer Area**

|                                                                          |
|--------------------------------------------------------------------------|
| The application makes a service call to the data center.                 |
| The application receives an exception after attempting the service call. |
| The application redirects calls to an on-premises server.                |
| If the second call is successful, the application continues normally.    |

- 1 - The application makes a service call to the data center.
- 2 - The application receives an exception after attempting the service call.
- 3 - The application redirects calls to an on-premises server.
- 4 - If the second call is successful, the application continues normally.

#### NEW QUESTION # 56

A company has a list of contacts in a Microsoft Excel file. The company wants to load the contact information into a Microsoft Power Platform solution.

You need to recommend a data-loading solution.

What should you recommend?

- A. Add the contacts to a static worksheet
- B. Use the Excel Template feature
- C. Use the import from Excel feature.

**Answer: C**

#### NEW QUESTION # 57

You need to recommend solutions to meet the integration requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement                                                     | Solution                                                                                                                                                          |
|-----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| View, assign, and resolve inspection bottlenecks.               | <div><div></div><div>Booking rules</div><div>Schedule board</div><div>Proficiency models</div></div>                                                              |
| Automatically input measurement readings from inspection gauges | <div><div></div><div>Custom connector</div><div>Azure IoT Hub connector</div><div>Azure IoT Central connector</div><div>Microsoft Dataverse connector</div></div> |

Answer:

Explanation:

| Requirement                                                     | Solution                                                                                                                                                          |
|-----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| View, assign, and resolve inspection bottlenecks.               | <div><div></div><div>Booking rules</div><div>Schedule board</div><div>Proficiency models</div></div>                                                              |
| Automatically input measurement readings from inspection gauges | <div><div></div><div>Custom connector</div><div>Azure IoT Hub connector</div><div>Azure IoT Central connector</div><div>Microsoft Dataverse connector</div></div> |

Explanation:

Box 1: Schedule board

Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make. When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector

Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from devices, and more. Use this connector with your Azure IoT Central V3 application.

This connector is available in the following products and regions:

| Service        | Class    | Regions                                                                                                                                                                                                  |
|----------------|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Logic Apps     | Standard | All Logic Apps regions except the following: <ul style="list-style-type: none"> <li>- Azure Government regions</li> <li>- Azure China regions</li> </ul>                                                 |
| Power Automate | Premium  | All Power Automate regions except the following: <ul style="list-style-type: none"> <li>- US Government (GCC)</li> <li>- US Government (GCC High)</li> <li>- China Cloud operated by 21Vianet</li> </ul> |
| Power Apps     | Premium  | All Power Apps regions except the following: <ul style="list-style-type: none"> <li>- US Government (GCC)</li> <li>- US Government (GCC High)</li> <li>- China Cloud operated by 21Vianet</li> </ul>     |
