And the Plat-Dev-301 study tool can provide a good learning platform for users who want to get the test Plat-Dev-301 certification in a short time. If you can choose to trust us, I believe you will have a good experience when you use the Plat-Dev-301 study guide, and you can pass the exam and get a good grade in the test Plat-Dev-301 certification.

Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q51-Q56):

NEW QUESTION # 51
Universal Containers has an Apex trigger on Account that creates an Account Plan record when an Account is marked as a Customer.
Recently a record-triggered flow was added so that whenever an Account is marked as a Customer, a 'Customer Since' date field is updated with today's date. Since the addition of the flow, two Account Plan records are created whenever the Account is marked as a Customer.
What might cause this to happen?

- A. The Apex trigger is not bulk safe and calls insert inside of a for loop.
- B. The Apex trigger does not use a static variable to ensure it only fires once.
- C. The flow is configured to use an "Update Records' element.
- D. The flow is configured to evaluate when a record is created and every time it is edited.

Answer: C

Explanation:
If a flow is configured to evaluate when a record is created and every time it's edited, and an Apex trigger also fires upon the same conditions, it could result in duplicate operations. In this case, two Account Plan records are created because both the flow and the trigger execute upon the Account being marked as a Customer.

NEW QUESTION # 52
A developer wrote an Apex class to make several callouts to an external system.
If the URLs used in these callouts will change often, which feature should the developer use to minimize changes needed to the Apex class?

- A. Named Credentials
- B. Remote Site Settings
- C. Session Id
- D. Connected Apps

Answer: A

Explanation:
The correct feature to use is C, Named Credentials. Named Credentials are a secure way of storing the endpoint and authentication details for callouts to external services. When URLs change frequently, using Named Credentials allows you to manage the endpoint URL in one place without changing the Apex code.
Named Credentials

NEW QUESTION # 53
An Apex trigger creates a Contract record every time an Opportunity record is marked as Closed and Won. This trigger is working great, except (due to a recent acquisition) historical Opportunity records need to be loaded into the Salesforce instance.
When a test batch of records are loaded, the Apex trigger creates Contract records.
A developer is tasked with preventing Contract records from being created when mass loading the Opportunities, but the daily users still need to have the Contract records created.
'What is the most extendable way to update the Apex trigger to accomplish this?

- A. Add a validation rule to the Contract to prevent Contract creation by the user who loads the data.
- B. Use a list custom setting ta disable the trigger for the user who loads the data.
- C. Add the Profile ID of the user who loads the data to the trigger, so the trigger will not fire for this user.
- D. Use a hierarchy custom setting to skip executing the logic inside the trigger for the user who loads the data.

Answer: D

Explanation:
A hierarchy custom setting can be used to create a configuration that the trigger checks before executing its logic. This allows admins to set the configuration to bypass the trigger logic when loading data, without changing the trigger itself or impacting other users.

NEW QUESTION # 54
Which method should be used to convert a Date to a String in the current user's locale?

- A. String.format
- B. Date. format
- C. Date.paras
- D. String.valueof

Answer: B

Explanation:
The format method of the Date class is used to convert a Date to a String formatted in the current user's locale. This respects the locale settings of the user context under which the code is running, ensuring the date is represented in a way that is familiar to the user.
Apex Developer Guide

NEW QUESTION # 55
What is a benefit of JavaScript remoting over Visualforce Remote Objects?

- A. Does not require any JavaScript code
- B. Allows for specified re-render targets
- C. Does not require any Apex code
- D. Supports complex server-side application logic

Answer: D

Explanation:
JavaScript remoting in Visualforce allows for the execution of complex server-side application logic without the need to refresh the entire page, providing a more dynamic user experience. It supports more complex operations than Visualforce Remote Objects, which are intended for basic CRUD operations.

NEW QUESTION # 56
......

With all this reputation, our company still take customers first, the reason we become successful lies on the professional expert team we possess , who engage themselves in the research and development of our Plat-Dev-301 learning guide for many years. So we can guarantee that our Plat-Dev-301 exam materials are the best reviewing material. Concentrated all our energies on the study Plat-Dev-301 learning guide we never change the goal of helping candidates pass the exam. Our Plat-Dev-301 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our Plat-Dev-301 exam materials, and you won't be regret.

Plat-Dev-301 Study Group: https://www.prepawaytest.com/Salesforce/Plat-Dev-301-practice-exam-dumps.html

We are not only just provide the Salesforce Plat-Dev-301 real questions & answers, but also teach you the learning experience that makes preparation for Plat-Dev-301 real test easy and effective, 100% Valid Solutions for Plat-Dev-301 Study Group, When you receive an update reminder from Plat-Dev-301 practice questions, you can update the version in time and you will never miss a key message, As long as you purchase our Plat-Dev-301 exam simulating and you are able to persist in your studies, you can basically pass the exam.

The fourth edition of Algorithms surveys the most Plat-Dev-301 Test Dumps.zip important computer algorithms currently in use and provides a full treatment of data structures and algorithms for sorting, searching, graph Plat-Dev-301 processing, and string processing including fifty algorithms every programmer should know.

Salesforce Plat-Dev-301 Exam | Plat-Dev-301 Latest Test Prep - Help you Prepare Plat-Dev-301: Salesforce Certified Platform Developer II - Multiple Choice Exam Easily

Gururaj Desh" Deshpande, Founder and Chairman, Sycamore Networks, Inc, We are not only just provide the Salesforce Plat-Dev-301 Real Questions & answers, but also teach you the learning experience that makes preparation for Plat-Dev-301 real test easy and effective.

100% Valid Solutions for Salesforce Developer, When you receive an update reminder from Plat-Dev-301 practice questions, you can update the version in time and you will never miss a key message.
