Only if you receive the certificate the companies require you can have the opportunities for raising-salary and promotion. Thousands of companies think highly of this certification. You will be popular if you pass exam with PL-900 Latest Test Cram sheet.

Microsoft Power Platform Fundamentals Sample Questions (Q256-Q261):

NEW QUESTION # 256

A company plans to create Power Platform apps that consume industry-standard and proprietary data sources.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 257

A company is evaluating Power Platform services.

Users in the company have Teams as their core application. The users have the following requirements:

* Managers must frequently review complex key performance indicator (KPI) and service-level agreement (SLA) visualizations for customers. Managers do not have any Power Platform licenses assigned.

* Users require the ability to create and host apps with their own data store.

* Because the company uses numerous SharePoint lists to store business data, it requires an extensible interface to update the data.

You need to explain how each Power Platform service can be used within Teams.

Which services should you use for each requirement? To answer, move the appropriate services to the correct requirements. You may use each service once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 258

Hotspot Question

A company plans to use Power BI to visualize data from business systems.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

The following list provides advantages to using aggregations:

Query performance over big data - as users interact with visuals on Power BI reports, DAX queries are submitted to the dataset.

Boost query speeds by caching data at the aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.

Box 2: Yes

With Power BI Desktop, you can connect to many different types of data sources, then shape the data to meet your needs, enabling you to create visual reports to share with others. Shaping data means transforming the data: renaming columns or tables, changing text to numbers, removing rows, setting the first row as headers, and so on. Combining data means connecting to two or more data sources, shaping them as needed, then consolidating them into a useful query.
