- B. `edited_config = mgr.edit_config(target='running', config=config_to_apply)`

- D. `edited_config = mgr.edit_config(target='failover', config=config_to_apply)`

**Answer: B**

Explanation:

To change the configuration immediately but have it revert after a reboot, the configuration must be applied to the running datastore, not the startup (which persists across reboots). Changes to the running datastore are lost after a reboot unless they are also saved to startup.
