## Latest SCP-NPM Torrent Pdf - SCP-NPM Actual Exam & SCP-NPM Test Engine

If you prepare well in advance, you'll be stress-free on the SolarWinds Network Performance Monitor (NPM) Exam SCP-NPM exam day and thus perform well. Candidates can know where they stand by attempting the SolarWinds SCP-NPM practice test. It can save you lots of time and money. The question on the SolarWinds SCP-NPM Practice Test is quite similar to the SolarWinds SCP-NPM questions that get asked on the SCP-NPM exam day.

### SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q29-Q34):

#### NEW QUESTION # 29

How can you quickly generate a report in NPM to show the top 50 interfaces by percent utilization?

- A. Create an advanced SQL query report
- B. Create a web-based report and filter the data to restrict to the top 50 interfaces
- C. Copy a similar default report and edit it for different time-frames
- D. Copy a similar default report and edit it for the top 50 interfaces

**Answer: D**

Explanation:

NPM provides several default reports that can be used as templates for creating custom reports. One of them is the Top 100 Interfaces by Percent Utilization report, which shows the average and peak utilization of the most used interfaces in the network. To create a report that shows only the top 50 interfaces, you can copy this report and edit it to change the number of rows displayed. You can also modify other parameters such as the time period, the grouping, the sorting, and the filtering criteria. To copy and edit a default report, follow these steps1:

Click Reports > All Reports > Manage Reports.

Find the Top 100 Interfaces by Percent Utilization report and click Duplicate & Edit.

On the Layout Builder panel, click Edit Table.

On the Edit Resource panel, change the Maximum Number of Rows to 50.

Optionally, change other settings such as the Time Period, the Group By, the Sort By, and the Filter Results.

Click Submit.

Optionally, change the Report Name, the Report Description, and the Report Category.

Click Next and then Save.

You can now run or schedule the report to show the top 50 interfaces by percent utilization. References: 1:

Create a custom report for NPM showing availability of devices in the last 30 days

#### NEW QUESTION # 30

You need to implement service level agreement (SLA) reporting for a new hosted data center service. Which SLA performance metric should you track?

- A. Response time
- B. CPU utilization
- C. Memory utilization
- D. Interface discards

**Answer: A**

Explanation:

Response time is the amount of time it takes for a service request to return a response. It is a critical SLA performance metric for a hosted data center service, as it directly affects the user experience and satisfaction. High response time can indicate network congestion, server overload, or other performance issues that can degrade the quality of the service. By tracking response time, you can monitor the availability and reliability of the service, identify and troubleshoot potential problems, and ensure that the service meets the SLA expectations and standards. Reference: How to measure your SLA: 5 Metrics you should be Monitoring and Reporting, Data Center SLA Frequently Offer a 100% Uptime Guarantee, How To Measure SLA Performance in 4 Steps (With Tips).

### NEW QUESTION # 31

NPM polls static properties, and calculates bandwidth consumption based on the total amount of \_\_\_\_\_ coming through the firewall.

- A. Bytes
- B. Kilobytes
- C. Megabytes
- D. Nibbles

**Answer: A**

### NEW QUESTION # 32

NetPath can analyze paths to which network segments?

- A. All of the above
- B. Cloud Networks
- C. On-premise networks
- D. Hybrid Networks

**Answer: A**

Explanation:

NetPath is a feature of NPM that helps you identify network problems faster by automatically creating a map of the problem area, with a wide variety of supporting information. NetPath displays the performance details of devices inside and outside of your network. NetPath can analyze paths to any network segment, whether it is on-premise, cloud, or hybrid. NetPath uses distributed monitoring and path analysis to discover how applications are delivered through the network to your users. You can deploy agents on Windows computers that act as synthetic users and use advanced probing to discover and test the network path that traffic takes to any network endpoint, such as your local file print server, your website, or external websites. NetPath can also incorporate data from NPM, NCM, and NTA about your on-premises gear, as well as data from the Internet nodes and providers<sup>12</sup>. References: 1: Discover your network paths in NPM<sup>3</sup>, 2: NetPath - Easy Visual Network Path Analysis | SolarWinds<sup>4</sup>

### NEW QUESTION # 33

You monitor three Cisco routers with NPM. NPM reports utilization statistics for two of the routers. NPM only shows Availability and Response Time statuses for the third router. Why do you not see utilization statistics on the third router?

- A. SNMP is not configured correctly on the third node
- B. The third node is monitored with SNMP instead of ICMP
- C. The third node is monitored with WMI instead of SNMP
- D. The third node is monitored with the NPM agent

**Answer: A**

### NEW QUESTION # 34

.....

As a worldwide leader in offering the best SCP-NPM test torrent, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in SCP-NPM certification training application as well as interactive sharing and after-sales service. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our SCP-NPM Guide Torrent to help you pass the SCP-NPM exam.
