Do you worry about not having a long-term fixed study time? Do you worry about not having a reasonable plan for yourself? C1000-173 exam dumps will solve this problem for you. Based on your situation, including the available time, your current level of knowledge, our study materials will develop appropriate plans and learning materials. Whatever you want to choose, you want to learn from which stage. In our study materials, you can find the right one for you. At the same time, the C1000-173 Exam Prep is constantly updated. After you have finished learning a part, you can choose a new method according to your own situation. Our study materials are so easy to understand that no matter who you are, you can find what you want here.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.

Topic 2	<ul style="list-style-type: none"> • Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.
Topic 3	<ul style="list-style-type: none"> • Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.
Topic 4	<ul style="list-style-type: none"> • Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 5	<ul style="list-style-type: none"> • Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes • OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.

C1000-173 Exam Preparation: IBM Cloud Pak for Data v4.7 Architect & C1000-173 Best Questions

One more thing to give you an idea about the top features of IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam questions before purchasing, the PassExamDumps are offering free PassExamDumps C1000-173 Exam Questions demo download facility. This facility is being offered in all three PassExamDumps C1000-173 exam practice question formats.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q85-Q90):

NEW QUESTION # 85

In terms of managing security for data stores in Watson Assistant, what practices should be emphasized? (Select two)

- A. Encrypting all stored data, both at rest and in transit
- B. Implementing role-based access control
- C. Regularly updating access credentials
- D. Using a public network for easier access

Answer: A,C

NEW QUESTION # 86

What are two ways to customize Knowledge Accelerators to meet specific requirements?

- A. Change Knowledge Accelerator content inline.
- B. Use a GitHub Repo to manage any changes.

- C. Customize the content in a separate namespace.
- D. Place Knowledge Accelerator content in a "development" vocabulary separate from the main stream "enterprise vocabulary".
- E. Create a separate project for any customized content.

Answer: D,E

Explanation:

Customization of Knowledge Accelerators in IBM Cloud Pak for Data is a structured process to preserve the integrity of base content while allowing for extension. The recommended approaches include:

Creating a separate project for customizations, so that changes are isolated and easily managed without affecting the source accelerator.

Using a "development" vocabulary where custom terms and structures are created. This is separate from the "enterprise vocabulary," which contains the unmodified, original Knowledge Accelerator content. Inline editing of the original content is discouraged. Use of GitHub or namespaces is not part of the official customization workflow.

NEW QUESTION # 87

Which features of the IBM Knowledge Catalog service are unavailable with the Data Governance Express offering?

- A. Semantic search and metadata analysis
- B. Lineage and semantic search
- C. Data quality features in analytics projects and ETL
- D. Advanced metadata export and lineage

Answer: D

Explanation:

IBM Knowledge Catalog's Data Governance Express offering is a lightweight configuration meant for streamlined governance needs. It includes core capabilities like cataloging and basic lineage but does not support advanced metadata export or full-scale lineage visualization and tracking features. These advanced features are only available in the full IBM Knowledge Catalog service. The Express tier is designed for simpler use cases and quicker onboarding with limited governance overhead.

NEW QUESTION # 88

Which plug-in is used by the Cloud Pak for Data Audit Logging service to forward audit records to a SIEM system?

- A. Apache Kafka output
- B. Fluentd output
- C. OSS/J
- D. Logstash output

Answer: B

Explanation:

The Audit Logging service in IBM Cloud Pak for Data uses Fluentd as the core log forwarding mechanism.

Fluentd output plug-ins are configured to route audit logs to external SIEM systems such as Splunk or QRadar. These plug-ins are versatile and support multiple formats and transport protocols. Other options listed-like Logstash, OSS/J, or Kafka-are not the designated default forwarding mechanisms used within the CP4D Audit Logging architecture.

NEW QUESTION # 89

An organization has created an extensive number of data protection rules as part of their Cloud Pak for Data implementation. The governance team is working on developing best practices for their team to maximize this investment.

Which service can be used to create a copy of cataloged asset data with all data protection rules applied?

- A. DataStage
- B. SPSS Modeler
- C. Data Privacy
- D. IBM Data Virtualization

Answer: C

NEW QUESTION # 90

.....

Our C1000-173 test prep embrace latest information, up-to-date knowledge and fresh ideas, encouraging the practice of thinking out of box rather than treading the same old path following a beaten track. As the industry has been developing more rapidly, our C1000-173 exam dumps have to be updated at irregular intervals in case of keeping pace with changes.
