## NCLEX-RN Practice Exam Questions | Reliable NCLEX-RN Exam Price

The 21 century is the information century. Information and cyber technology represents advanced productivity, and its rapid development and wide application have given a strong impetus to economic and social development and the progress of human civilization (NCLEX-RN exam materials). They are also transforming people's lives and the mode of operation of human society in a profound way. So you really should not be limited to traditional paper-based NCLEX-RN Test Torrent in the 21 country especially when you are preparing for an exam, our company can provide the best electronic NCLEX-RN exam torrent for you in this website.

NCLEX-RN exam is conducted by the National Council of State Boards of Nursing (NCSBN). It is a computer-adaptive test, which means the questions' level of difficulty adapts to the individual's ability to answer them. NCLEX-RN Exam is designed to test the individual's level of competence, from simple to complex nursing tasks. The test is carried out at various testing centers across the country, and individuals must register for the exam and submit their credentials to the NCSBN.

## NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q363-Q368):

### NEW QUESTION # 363

A 26-year-old client is diagnosed with an astrocytoma, a benign brain tumor. From the nurse's knowledge of the central nervous system, the nurse knows that benign tumors:

- A. Grow more rapidly than malignant tumors
- **B. Can be just as dangerous as malignant tumors**
- C. Can be removed surgically
- D. Do not warrant concern because they do not become malignant tumors

**Answer: B**

Explanation:

Explanation

(A) Both a benign and a malignant tumor can displace or destroy nearby structures or increase intracranial pressure. (B) Benign or malignant brain tumors grow at different rates depending on the type of tumor. (C) Some benign tumors do become malignant tumors. (D) Whether or not a tumor is operable depends on its location and the amount of damage its removal will cause.

#### NEW QUESTION # 364

Diabetes during pregnancy requires tight metabolic control of glucose levels to prevent perinatal mortality.

When evaluating the pregnant client, the nurse knows the recommended serum glucose range during pregnancy is:

- A. 90 mg/dL and 200 mg/dL
- **B. 70 mg/dL and 120 mg/dL**
- C. 100 mg/dL and 200 mg/dL
- D. 40 mg/dL and 130 mg/dL

**Answer: B**

Explanation:

Explanation

(A) The recommended range is 70-120 mg/dL to reduce the risk of perinatal mortality. (B, C, D) These levels are not recommended. The higher the blood glucose, the worse the prognosis for the fetus. Hypoglycemia can also have detrimental effects on the fetus.

#### NEW QUESTION # 365

The nurse is caring for a client with pancreatitis. Which of the following IV medications would the nurse expect the physician to prescribe for control of pain in this client?

- A. Promethazine (Phenergan)
- **B. Meperidine (Demerol)**
- C. Morphine sulfate
- D. Ketorolac tromethamine (Toradol)

**Answer: B**

Explanation:

(A) Morphine sulfate is contraindicated in clients with pancreatitis because it may cause spasms of the sphincter of Oddi and increase pancreatic pain. (B) Ketorolac tromethamine is currently not approved by the Food and Drug Administration for IV use. (C) Promethazine is a medication that has no analgesic properties. (D) Meperidine is the drug of choice for clients with pancreatitis. It will not cause spasms at the sphincter of Oddi, which can lead to increased pancreatic pain.

#### NEW QUESTION # 366

A client tells the nurse that she has had a history of urinary tract infections. The nurse would do further health teaching if she verbalizes she will:

- A. Wash her hands before and after voiding
- B. Drink at least 8 oz of cranberry juice daily
- C. Maintain a fluid intake of at least 2000 mL daily
- **D. Limit her fluid intake after 6 PM so that there is not a great deal of urine in her bladder while she sleeps**

**Answer: D**

Explanation:

Explanation

(A) Cranberry juice helps to maintain urine acidity, thereby retarding bacterial growth. (B) A generous fluid intake will help to irrigate the bladder and to prevent bacterial growth within the bladder. (C) Hand washing is an effective means of preventing pathogen transmission. (D) Restricting fluid intake would contribute to urinary stasis, which in turn would contribute to bacterial growth.

### NEW QUESTION # 367

When discussing the relationship between exercise and insulin requirements, a 26-year-old client with IDDM should be instructed that:

- A. When exercise is decreased, insulin needs are decreased
- **B. When exercise is increased, insulin needs are decreased**
- C. When exercise is increased, there is no change in insulin needs
- D. When exercise is increased, insulin needs are increased

**Answer: B**

Explanation:

(A) If the client's insulin is increased when activity level is increased, hypoglycemia may result. (B) Exercise decreased the blood sugar by promoting uptake of glucose by the muscles. Consequently, less insulin is needed to metabolize ingested carbohydrates. Extra food may be required for extra activity. (C) This statement directly contradicts the correct answer and is inaccurate. (D) When exercise is decreased, the client's insulin dose does not need to be altered unless the blood sugar becomes unstable.

### NEW QUESTION # 368

.....

For candidates who want to evaluate and enhance their NCLEX NCLEX-RN Test Preparation online, the web-based practice test is a perfect choice.
