[2026] CompTIA CS0-002 Questions: Tips to Get Results Effortlessly

The privacy protection of users is an eternal issue in the internet age. Many illegal websites will sell users' privacy to third parties, resulting in many buyers are reluctant to believe strange websites. But you don't need to worry about it at all when buying our CS0-002 study materials. We assure you that we will never sell users' information because it is damaging our own reputation. In addition, when you buy our CS0-002 Study Materials, our website will use professional technology to encrypt the privacy of every user to

prevent hackers from stealing.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

During an Incident, it is determined that a customer database containing email addresses, first names, and last names was exfiltrated. Which of the following should the security analyst do NEXT?

- A. Email the customers to inform them of the breach.
- B. Consult with the legal department for regulatory impact.
- C. Encrypt the database with available tools.
- **D. Follow the incident communications process.**

Answer: D

Explanation:

An incident communications process is a set of procedures that defines how to communicate with internal and external stakeholders during and after an incident, such as customers, employees, management, regulators and media. An incident communications process can help to provide accurate, timely and consistent information about the incident, its impact and the actions taken to resolve it. An incident communications process can also help to maintain trust and reputation, comply with legal obligations and prevent misinformation or confusion.

NEW QUESTION # 49

A security analyst inspects the header of an email that is presumed to be malicious and sees the following:

Which of the following is inconsistent with the rest of the header and should be treated as suspicious?

- A. The sender's email address
- B. The subject line
- **C. The destination email server**
- D. The use of a TLS cipher

Answer: C

NEW QUESTION # 50

A company wants to run a leaner team and needs to deploy a threat management system with minimal human interaction. Which of the following is the server component of the threat management system that can accomplish this goal?

- A. STIX
- **B. TAXII**
- C. CVSS
- D. OpenIOC

Answer: B

Explanation:

TAXII stands for Trusted Automated eXchange of Indicator Information, and it is a server component of a threat management system that can facilitate the exchange of threat intelligence data between different sources and consumers, using a standard protocol and format. TAXII can help deploy a threat management system with minimal human interaction, by automating the collection, processing, and dissemination of threat intelligence data.

NEW QUESTION # 51

A manufacturing company uses a third-party service provider for Tier 1 security support. One of the requirements is that the provider must only source talent from its own country due to geopolitical and national security interests. Which of the following can the manufacturing company implement to ensure the third-party service provider meets this requirement?

- A. Implement blacklisting for IP addresses from outside the country.
