Mock AI-102 Exam & AI-102 Valid Exam Duration

BONUS!!! Download part of PDFBraindumps AI-102 dumps for free: https://drive.google.com/open?id=10okwyuPn7XbvS1aaxbr0imHQ-yCzb64b

Our AI-102 question torrent not only have reasonable price but also can support practice perfectly, as well as in the update to facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the AI-102 Exam Question can be said to have high quality performance. We can sure that you will never regret to download and learn our AI-102 study material, and you will pass the AI-102 exam at your first try.

Microsoft AI-102 certification exam is suitable for professionals who are interested in developing AI solutions for various industries, including healthcare, finance, and retail. It is also ideal for developers, data scientists, and solution architects who want to enhance their skills in designing and implementing AI solutions in the Azure environment.

Microsoft AI-102 Exam is a certification that validates a candidate's knowledge and skills in designing and implementing AI solutions on the Microsoft Azure platform. It is an advanced-level exam that requires a solid understanding of Azure services and tools, as well as expertise in AI technologies such as machine learning, natural language processing, and computer vision.

AI-102 Valid Exam Duration, AI-102 Reliable Braindumps Sheet

The Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice test questions prep material has actual Designing and Implementing a Microsoft Azure AI Solution exam questions for our customers so they don't face any hurdles while preparing for Microsoft AI-102 certification exam. The study material is made by professionals while thinking about our users. We have made the product user-friendly so it will be an easy-to-use learning material. We even guarantee our users that if they couldn't pass the Microsoft AI-102 Certification Exam on the first try with their efforts, they can claim a full refund of their payment from us (terms and conditions apply).

To be eligible for the Microsoft AI-102 certification exam, you should have a strong understanding of Azure and AI technologies. You should also have experience in developing and deploying AI solutions using Azure services. Designing and Implementing a Microsoft Azure AI Solution certification exam is ideal for solution architects, developers, and data scientists who want to demonstrate their expertise in designing and implementing AI solutions using Microsoft Azure. Passing AI-102 Exam validates your skills and knowledge in using Azure AI technologies to meet business requirements and solve real-world challenges.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q364-Q369):

NEW QUESTION # 364
You have a SQL query that combines customer data and order data. The query includes calculated columns.
You need to create a database object that would allow other users to rerun the same SOL query. What should you create?

- A. a scalar function
- B. a view
- C. an Index
- D. a table

Answer: B

Explanation:
* A view is a virtual table based on the result set of a query.
* Views allow you to encapsulate complex queries (including joins and calculated columns) and make them reusable by other users.
* Index improves performance but does not store or rerun queries.
* Scalar function returns a single value, not a tabular result.
* Table stores raw data, not queries.
Reference: Create views in SQL Server

NEW QUESTION # 365
Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 366
You are developing a webpage that will use the Video Indexer service to display videos of internal company meetings.
You embed the Player widget and the Cognitive Insights widget into the page.
You need to configure the widgets to meet the following requirements:
* Ensure that users can search for keywords.
* Display the names and faces of people in the video.
* Show captions in the video in English (United States).
How should you complete the URL for each widget? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 367
You are developing the document processing workflow.
You need to identify which API endpoints to use to extract text from the financial documents. The solution must meet the document processing requirements.

Which two API endpoints should you identify? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. /vision/v3.2/read/analyzeResults
- B. /vision/v3.2/describe
- C. /vision/v3.2/read/analyze
- D. /formercognizer/v2.0/custom/models{modelId}/ analyze
- E. /formrecognizer/v2.0/prebuilt/receipt/analyze

Answer: B,E

NEW QUESTION # 368
Case Study 1 - Wide World Importers
Overview
Existing Environment
A company named Wide World Importers is developing an e-commerce platform.
You are working with a solutions architect to design and implement the features of the e- commerce platform. The platform will use microservices and a serverless environment built on Azure.
Wide World Importers has a customer base that includes English, Spanish, and Portuguese speakers.
Applications
Wide World Importers has an App Service plan that contains the web apps shown in the following table.
Azure Resources
You have the following resources:
* An Azure Active Directory (Azure AD) tenant
- The tenant supports internal authentication.
- All employees belong to a group named AllUsers.
- Senior managers belong to a group named LeadershipTeam.
* An Azure Functions resource
- A function app posts to Azure Event Grid when stock levels of a product change between OK, Low Stock, and Out of Stock. The function app uses the Azure Cosmos DB change feed.
* An Azure Cosmos DB account
- The account uses the Core (SQL) API.
- The account stores data for the Product Management app and the Inventory Tracking app.
* An Azure Storage account
- The account contains blob containers for assets related to products.
- The assets include images, videos, and PDFs.
* An Azure AI Services resource named wwics
* An Azure Video Analyzer for Media (previously Video Indexer) resource named wwivi
Requirements
Business Goals
Wide World Importers wants to leverage AI technologies to differentiate itself from its competitors.
Planned Changes
Wide World Importers plans to start the following projects:
* A product creation project: Help employees create accessible and multilingual product entries, while expediting product entry creation.
* A smart e-commerce project: Implement an Azure AI Search solution to display products for customers to browse.
* A shopping on-the-go project: Build a chatbot that can be integrated into smart speakers to support customers.
Business Requirements
Wide World Importers identifies the following business requirements for all the projects:
* Provide a multilingual customer experience that supports English, Spanish, and Portuguese.
* Whenever possible, scale based on transaction volumes to ensure consistent performance.
* Minimize costs.
Governance and Security Requirements
Wide World Importers identifies the following governance and security requirements:
* Data storage and processing must occur in datacenters located in the United States.
* Azure AI Services must be inaccessible directly from the internet.
Accessibility Requirements

Wide World Importers identifies the following accessibility requirements:
* All images must have relevant alt text.
* All videos must have transcripts that are associated to the video and included in product descriptions.
* Product descriptions, transcripts, and all text must be available in English, Spanish, and Portuguese.
Product Creation Requirements
Wide World Importers identifies the following requirements for improving the Product Management app:
* Minimize how long it takes for employees to create products and add assets.
* Remove the need for manual translations.
Smart E-Commerce Requirements
Wide World Importers identifies the following requirements for the smart e-commerce project:
* Ensure that the Azure AI Search solution meets a Service Level Agreement (SLA) of 99.9% availability for searches and index writes.
* Provide users with the ability to search insight gained from the images, manuals, and videos associated with the products.
* Support autocompletion and autosuggestion based on all product name variants.
* Store all raw insight data that was generated, so the data can be processed later.
* Update the stock level field in the product index immediately upon changes.
* Update the product index hourly.
Shopping On-the-Go Requirements
Wide World Importers identifies the following requirements for the shopping on-the-go chatbot:
* Answer common questions.
* Support interactions in English, Spanish, and Portuguese.
* Replace an existing FAQ process so that all Q&A is managed from a central location.
* Provide all employees with the ability to edit Q&As. Only senior managers must be able to publish updates.
* Support purchases by providing information about relevant products to customers. Product displays must include images and warnings when stock levels are low or out of stock.
Product JSON Sample
You have the following JSON sample for a product.
You are developing the smart e-commerce project.
You need to implement autocompletion as part of the Azure AI Search solution.
Which three actions should you perform? Each correct answer presents part of the solution.
(Choose three.)
NOTE: Each correct selection is worth one point.

- A. Set the analyzer property for the three product name variants.
- B. Set the searchAnalyzer property for the three product name variants.
- C. Make API queries to the autocomplete endpoint and include suggesterName in the body.
- D. Make API queries to the search endpoint and include the product name fields in the searchFields query parameter.
- E. Add a suggester that has the three product name fields as source fields.
- F. Add a suggester for each of the three product name fields.

Answer: A,C,E

Explanation:
Scenario: Support autocompletion and autosuggestion based on all product name variants.
A: Call a suggester-enabled query, in the form of a Suggestion request or Autocomplete request, using an API. API usage is illustrated in the following call to the Autocomplete REST API.
POST /indexes/myxboxgames/docs/autocomplete?search&api-version=2020-06-30
{
"search": "minecraf",
"suggesterName": "sg"
}
B: In Azure AI Search, typeahead or "search-as-you-type" is enabled through a suggester. A suggester provides a list of fields that undergo additional tokenization, generating prefix sequences to support matches on partial terms. For example, a suggester that includes a City field with a value for "Seattle" will have prefix combinations of "sea", "seat", "seatt", and "seattl" to support typeahead.
G. Use the default standard Lucene analyzer ("analyzer": null) or a language analyzer (for example, "analyzer": "en.Microsoft") on the field.
