

New C-BCBTP-2502 Exam Preparation, C-BCBTP-2502 Dumps Collection

 **Get the Top SAP C_BCBTP_2502 Exam PDF Questions — Achieve on Your First Effort!**

Are you aiming to succeed the SAP C_BCBTP_2502 exam questions on your very first try? Certification exams in 2025 are demanding than ever, demanding extensive knowledge and practical experience. To increase your chances of accomplishment, you need exact and current learning guides. HelloDumps provides [SAP C_BCBTP_2502 dumps](#) and expert-reviewed study materials to help you practice effectively. The greatest part? You can now enjoy an exclusive 35% deal on all study materials!

Why Choose HelloDumps for Your C_BCBTP_2502 Exam Preparation?

 **Valid C_BCBTP_2502 Exam Questions – Obtain an Lead Over Others**
HelloDumps offers actual exam-like questions, closely corresponding with the latest C_BCBTP_2502 composition, difficulty level, and syllabus of the SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite certification. Practicing these questions helps you understand the test structure and enhances your achievement.

 **Obtain SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Exam Questions 2025 Here: <https://heliodumps.com/c-bcbtp-2502-pdf-dumps.html>**

 **Three Practical Learning Formats**
We provide study materials in various formats to suit different learning styles:

-  **PDF Layout** – Study on any device, anytime, anywhere.
-  **Desktop Preparation Test** – Simulates real exam conditions with customizable mock tests.
-  **Web-Based Drill Test** – No installation required—practice directly from

What does it mean to win a competition? Users of our C-BCBTP-2502 actual exam can give you good answers. They have improved their strength and proved their strength. Now they have more opportunities and they have the right to choose. Of course, the effective learning methods they learned during the use of our C-BCBTP-2502 Preparation materials also greatly enhanced their work. All of them had praised that our C-BCBTP-2502 exam questions are the best choice they had made to buy. So what are you waiting for? Just rush to buy our C-BCBTP-2502 practice guide!

SAP C-BCBTP-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
Topic 2	<ul style="list-style-type: none">• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

Free PDF Quiz C-BCBTP-2502 - Perfect New SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Exam Preparation

Our company has built the culture of integrity from our establishment. You just need to pay the relevant money for the C-BCBTP-2502 practice materials. Our system will never deduct extra money from your debit cards. Also, your payment information of the C-BCBTP-2502 Study Materials will be secret. No one will crack your passwords. Our payment system will automatically delete your payment information once you finish paying money for our C-BCBTP-2502 exam questions.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which SAP BTP component supports microservices-based application development?

- A. SAP Concur
- B. SAP Business Network
- C. SAP SuccessFactors
- **D. SAP Kyma Runtime**

Answer: D

Explanation:

As enterprises move toward modern, scalable application architectures, the move from monolithic codebases to microservices becomes essential. SAP Kyma Runtime is the specific component of SAP BTP designed to support this transition. It is a fully managed Kubernetes-based environment that allows developers to extend SAP applications using serverless functions and microservices. Kyma provides a cloud-native way to build and run containerized applications, offering high scalability and flexibility. Positioning Kyma within the SAP Business Suite ecosystem is critical for "side-by-side" extensibility. It allows developers to build specialized services—such as a custom loyalty engine or a unique logistics tracker—using their preferred programming languages and frameworks (like Node.js, Go, or Python) while maintaining a seamless connection to the SAP core. Kyma is particularly powerful for "event-driven" architectures; it can listen for events in SAP S/4HANA (like a "New Sales Order created" event) and instantly trigger a microservice to perform a specific action in a third-party system. This decouples the innovation layer from the stable core, allowing for rapid updates and deployments without risking the stability of the primary business processes.

NEW QUESTION # 23

Which of the following are key products of SAP Business Technology Platform (SAP BTP)? (Choose two).

- **A. SAP HANA Cloud**
- B. SAP Ariba
- **C. SAP Integration Suite**
- D. SAP SuccessFactors

Answer: A,C

Explanation:

SAP Business Technology Platform (SAP BTP) is organized into four primary functional pillars: Database and Data Management, Analytics, Application Development and Integration, and Intelligent Technologies.

SAP HANA Cloud serves as the foundation of the Database and Data Management pillar, providing a single, integrated powerhouse for all enterprise data. It offers the speed of in-memory processing combined with the scalability of the cloud, allowing businesses to manage large volumes of data while providing a "single source of truth." On the other hand, SAP Integration Suite is the cornerstone of the Integration pillar. It is an integration platform-as-a-service (iPaaS) that allows organizations to seamlessly connect SAP and non-SAP applications, whether they reside on-premise or in the cloud. It provides pre-built content and connectors that significantly reduce the complexity of landscape orchestration. In contrast, SAP Ariba and SAP SuccessFactors are specialized Software-as-a-Service (SaaS) applications. While they are part of the broader SAP ecosystem and often run on or

integrate via BTP, they are considered line-of-business (LoB) solutions rather than core components of the technology platform itself. Understanding this distinction is vital for positioning BTP as the underlying "glue" that enables the "Intelligent Enterprise" strategy by providing the technical tools necessary to extend and integrate these LoB applications.

NEW QUESTION # 24

Which of the following capabilities does SAP AI Core provide?

- A. Transactional data management for ERP systems.
- B. Strictly rule-based automation without AI capabilities.
- C. Predictive analytics and machine learning model deployment.
- D. Hardware infrastructure for AI development.

Answer: C

Explanation:

SAP AI Core is a vital service within the "Intelligent Technologies" pillar of SAP BTP, designed to handle the heavy lifting of artificial intelligence at an enterprise scale. Its primary capability is providing a standardized, highly scalable runtime for predictive analytics and machine learning (ML) model deployment. In the modern SAP Business Suite, "intelligence" is no longer just a buzzword; it is a functional requirement. SAP AI Core allows businesses to take raw data from their systems, train sophisticated models, and then deploy those models into production environments where they can serve real-time predictions.

This service is unique because it supports the full lifecycle of an AI model, including execution and monitoring. It allows developers to integrate AI features into their applications while maintaining "AI Ethics" and transparency, which are critical for enterprise compliance. Unlike standard transactional databases that focus on record-keeping, SAP AI Core focuses on "inference"-using data to generate new insights and automate complex decisions. By positioning SAP AI Core as the engine for intelligence, SAP BTP ensures that organizations can move beyond basic automation toward advanced, self-learning processes that improve over time, such as predictive maintenance in manufacturing or intelligent lead scoring in sales.

NEW QUESTION # 25

What is a key advantage of SAP BTP for the automotive industry?

- A. Eliminates AI applications in predictive maintenance.
- B. Supports connected vehicle ecosystems with IoT and AI.
- C. Restricts automation in supply chain management.
- D. Prevents data-driven innovations in vehicle manufacturing.

Answer: B

Explanation:

The automotive industry is undergoing a massive shift from traditional manufacturing to "Mobility-as-a-Service." SAP BTP is central to this shift because it supports connected vehicle ecosystems with IoT and AI

. By integrating telematics data from vehicles directly into the SAP Business Suite via SAP BTP, manufacturers can monitor vehicle performance in real-time. This enables "Predictive Maintenance," where the system identifies a potential part failure before it happens, automatically alerts the driver, and schedules a service appointment at the nearest dealership.

Beyond the vehicle itself, SAP BTP enhances the entire automotive value chain. It uses the Integration Suite to connect manufacturers with a vast network of tier-one and tier-two suppliers, ensuring that the "Just-in-Time" (JIT) production model remains resilient against global disruptions. Additionally, SAP Analytics Cloud on BTP allows automotive companies to analyze consumer trends and driving patterns to inform the design of future electric and autonomous vehicles. This transformation positions SAP BTP not just as an IT platform, but as a core business driver that enables automotive companies to innovate at the speed of software while maintaining the high safety and quality standards required in vehicle manufacturing.

NEW QUESTION # 26

Which SAP BTP service allows businesses to create low-code/no-code applications?

- A. SAP Concur
- B. SAP Build Apps
- C. SAP Business Network
- D. SAP BusinessObjects
